Louis I. Kahn Louis Isadore Kahn, 1977 **Louis I. Kahn** Louis I. Kahn, Heinz Ronner, Sharad Jhaveri, Alessandro Vasella, 1977 **Hugo Häring** Peter Blundell Jones, 1999 Peter Blundell Jones Professor of Architecture at the University of Sheffield has long been concerned with the organic movement in architecture and has written extensively about it including a substantial work on Hans Scharoun The present book is not just a biography of Haring but an unusually detailed analysis of his architectural work including many unbuilt projects which have never before been published It also includes an account of Haring's theory with translated extracts from his many writings Through setting Haring within his historical context and differentiating his position from figures such as Mies Le Corbusier and Hannes Meyer Peter Blundell Jones suggests a radical reframing of the early Modern Movement He was aided in the development of the book by Haring's personal assistant in the late years Margot Aschenbrenner who was trained as a philosopher Jaquette Louis Kahn Louis I. Kahn, 2003 This unique anthology draws from Louis Kahn speeches essays and interviews some never previously published to capture the evolution and central tenets of the influential American architect thinking from his early work of the 1940s to his death in 1974 Professor Twombly introduction and headnotes offer incisive commentary on the texts **Louis I. Kahn Complete work 1935-74** RONNER, VASELLA, JHAVERI, 1976-01-01 This book owes its concept to the transparency of the work process of Louis I Kahn whose ideas are preserved in the wealth of sketches and drawings **The Grove Encyclopedia of American Art** Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Frank Furness: The Complete Works** George E. Thomas, Jeffrey A. Cohen, Michael J. Lewis, 1996-12 This encyclopedic book is the first complete monograph of Furness's work More than 670 projects are presented through 700 photographs and drawings **Louis I. Kahn's Trenton Jewish Community Center** Susan G. Solomon, 2000 The Building Studies series examines important buildings through original documents detailed text photography and drawings in an affordable format **Beyond the Cube** Jean-François Gabriel, 1997-08-12 This book offers an in depth look at space frame architecture including space frame projects completed by such notable architects as I M Pei

Buckminster Fuller Philip Johnson and Louis Kahn Both theory and practice are included to offer a comprehensive overview of the history current use and future outlook for creating space frame structures The 15 distinguished contributors to this book have extensive background in the architecture of space frames and offer an international perspective on the subject The text is illustrated with hundreds of line drawings black and white photos and an eight page color insert Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic A Critical History of Modern Architecture is certain to influence any future debate on the evolution of modern architecture Studies in Tectonic Culture is nothing less than a rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press **Twenty-Five+**

Buildings Every Architect Should Understand Simon Unwin, 2023-11-03 The underlying theme of Twenty Five Buildings Every Architect Should Understand is the relationship of architecture to the human being how it frames our lives and orchestrates our experience how it can help us make sense of the world and contribute to our sense of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect With the addition of numerous shorter analyses this new edition covers an even greater range of architectural ideas providing students and architects with further inspiration for exploration in their own design work Architects live by ideas But where do they come from And how do they

shape buildings There is no one right way to do architecture This book illustrates many Its aim is to explore the rich diversity of architectural creativity by analysing a wide range of examples to extract the ideas behind them **Twenty Five Buildings Every Architect Should Understand** is a companion to Simon Unwin's **Analysing Architecture the Universal Language of Place Making** most recent edition 2021 and part of the trilogy which also includes his **Exercises in Architecture Learning to Think as an Architect** second edition 2022 Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice **Twenty Five Buildings** focusses on analysing examples using the methodology offered by **Analysing Architecture** which operates primarily through the medium of drawing An underlying theme of **Twenty Five Buildings Every Architect Should Understand** is the relationship of architecture to the human being how it frames our lives and orchestrates our experiences how it can help us give form to the world and contributes to our senses of identity and place Exploring these dimensions through case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading and hopefully an inspiration for every architect In this new edition supplementary analysis and discussion has been added to each of the twenty five case studies drawing attention to their influences from and on other architects A number of extra shorter analyses have been included too following the practice of presenting extra small dishes interspersed among main courses in high end restaurants These additional short analyses account for the sign after Twenty Five in the title of this edition and double the number of buildings analysed to around fifty

Plans, Sections and Elevations Richard Weston, 2004 CD ROM contains files for all of the plans sections and elevations included in the book

Key Houses of the Twentieth Century Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources
