Louis Kahns Situated Modernism:

Louis Kahn's Situated Modernism Sarah Williams Goldhagen, Sarah Goldhagen Williams, Louis I. Kahn, 2001-01-01 She demonstrates instead that Kahn's architecture is grounded in his deeply held modernist political social and artistic ideals which guided him as he sought to rework modernism into a socially transformative architecture appropriate for the postwar world

Tradition as Mediation: Louis I. Kahn Dana Margalith, 2018-07-11 This book explores Louis I Kahn's approach to tradition as revealed in two of his important unbuilt projects Focusing on Kahn's designs for the Dominican Motherhouse of St Catherine de Ricci Media Pennsylvania 1965 1969 and the Hurva Synagogue Jerusalem Israel 1967 1974 the book challenges prevailing aesthetic and methodological assessments of Kahn's use of tradition It reveals how an authentic and critical theoretical historical and humanistic study of tradition nourished Kahn's designs enabling him to mediate historical rituals ideas and beliefs and to develop innovative designs rooted deep in human culture while addressing real modern concerns The book evaluates Kahn's works as a creative recreation and re interpretation of the past shedding light on the potential value of the meaningful consideration of tradition in modern times

Louis Kahn Carter Wiseman, 2020-11-10 The man who envisioned and realized such landmark buildings as the Salk Institute the Kimbell Art Museum and the National Assembly complex in Bangladesh Louis Kahn was born in what is now Estonia immigrated to America and became one of the towering figures in his adopted country's built world His works are unmistakable in their elegance monolithic power and architectural honesty Written by Carter Wiseman one of Kahn's most respected commentators this book offers a succinct accessible examination of the life and work of one of America's greatest architects It traces the influence of his immigrant origins his upbringing in poverty his education the impact of the Great Depression and the arrival of Modernism on his life and work Finally it provides insight into why as the legacy of many of his contemporaries has receded in importance Kahn's has remained so durably influential *Louis Kahn A Life in Architecture* provides the best concise introduction available to this singular life and achievement

Modern Architecture and Religious Communities, 1850-1970 Kate Jordan, Ayla Lepine, 2018-04-17 Social groups formed around shared religious beliefs encountered significant change and challenges between the 1860s and the 1970s This book is the first collection of essays of its kind to take a broad thematically driven case study approach to this genre of architecture and its associated visual culture and communal experience Examples range from Nuns holy spaces celebrating the life of St Theresa of Lisieux to utopian American desert communities and their reliance on the philosophy of Teilhard de Chardin Modern religious architecture converses with a broad spectrum of social anthropological cultural and theological discourses and the authors engage with them rigorously and innovatively As such new readings of sacred spaces offer new angles and perspectives on some of the dominant narratives of the nineteenth twentieth and twenty first centuries empire urban expansion pluralism and modernity In a post traditional landscape religious architecture suggests expansive ways of exploring themes including nostalgia and revivalism engineering and

technological innovation prayer and spiritual experimentation and the beauty of holiness for a brave new world Shaped by the tensions and anxieties of the modern era and powerfully expressed in the space and material culture of faith the architecture presented here creates a set of new turning points in the history of the built environment **Reading Kenneth Frampton** Gevork Hartoonian,2022-05-10 This book focuses on the first edition of Kenneth Frampton's *Modern Architecture A Critical History* published in 1980 It searches for clues and positions that will provide the reader with an unprecedented insight into the significance of Frampton's historiography of modern architecture It explores selected themes in line with Frampton's many faceted contribution certain aspects of which can be noted between the lines of his ongoing criticism of the present day architecture which inevitably lead us to a critical understanding of the past the modernity of architecture's contemporaneity The compiled chapters attempt to open a window onto the constellation of themes that allowed Frampton to hold on to his anteroom view of history even amidst the flow of time and flood of temporalities spanning 1980-2020 The book elucidates how Frampton's critical presentation of the history of modern movement architecture and the book's classificatory mode periodization contribute to our understanding of the contemporaneity of architecture today Architecture Post Mortem Donald Kunze,David Bertolini,Simone Brott,2016-04-15 *Architecture Post Mortem* surveys architecture's encounter with death decline and ruination following late capitalism As the world moves closer to an economic abyss that many perceive to be the death of capital contraction and crisis are no longer mere phases of normal market fluctuations but rather the irruption of the unconscious of ideology itself Post mortem is that historical moment wherein architecture's symbolic contract with capital is put on stage naked to all Architecture is not irrelevant to fiscal and political contagion as is commonly believed it is the victim and penetrating analytical agent of the current crisis As the very apparatus for modernity's guilt and unfulfilled drives modernity's debt architecture is that ideological element that functions as a master signifier of its own destruction ordering all other signifiers and modes of signification beneath it It is under these conditions that architecture theory has retreated to an Alamo of history a final desert outpost where history has been asked to transcend itself For architecture's hoped-for utopia always involves an apocalypse This timely collection of essays reformulates architecture's relation to modernity via the operational death drive architecture is but a passage between life and death This collection includes essays by Kazi K Ashraf David Bertolini Simone Brott Peggy Deamer Didem Ekici Paul Emmons Donald Kunze Todd McGowan Gevork Hartoonian Nadir Lahiji Erika Naginski and Dennis Maher *Air-Conditioning in Modern American Architecture, 1890-1970* Joseph M. Siry,2021-02-01 *Air Conditioning in Modern American Architecture 1890-1970* documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early

1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism's discourse of functionality profoundly shaped the work of some of the movement's leading architects such as Dankmar Adler, Louis Sullivan, Frank Lloyd Wright, Ludwig Mies van der Rohe, Gordon Bunshaft, and Louis Kahn. For them, the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating, cooling, ventilating, and artificial lighting. Bridging the history of technology and the history of architecture, Siry discusses air conditioning's technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism. A monumental work by a renowned expert in American modernist architecture, this book asks us to see canonical modernist buildings through a mechanical engineering-oriented lens. It will be especially valuable to scholars and students of architecture, modernism, the history of technology, and American history.

Topophilia and Topophobia Xing Ruan, Paul Hogben, 2020-10-28 This book is about the love and hate relations that humans establish with their habitat, which have been coined by discerning modern thinkers as topophilia and topophobia. Whilst such affiliations with the topos, our manmade as well as natural habitat, have been traced back to antiquity, a wide range of twentieth-century cases are studied here and reflected upon by dwelling on this framework. The book provides a timely reminder that the qualitative aspects of the topos, sensual as well as intellectual, should not be disregarded in the face of rapid technological development and the mass of building that has occurred since the turn of the millennium. *Topophilia and Topophobia* offers speculative and historical reflections on the human habitat of the century that has just passed, authored by some of the world's leading scholars and architects, including Joseph Rykwert, Yi Fu Tuan, Vittorio Gregotti, and Jean Louis Cohen. Human habitats ranging broadly from the cities of the twentieth-century highbrow modern architecture, both in Western countries and in Asia, to non-architect-planner designed vernacular settlements and landscapes are reviewed under the themes of topophilia and topophobia across the disciplines of architecture, landscape studies, philosophy, human geography, and urban planning.

Constructing Building Enclosures Clifton Fordham, 2020-07-21 *Constructing Building Enclosures* investigates and interrogates tensions that arose between the disciplines of architecture and engineering as they wrestled with technology and building cultures that evolved to deliver structures in the modern era. At the center of this history are inventive architects, engineers, and projects that did not settle for conventional solutions, technologies, and methods. Comprised of thirteen original essays by interdisciplinary scholars, this collection offers a critical look at the development and the purpose of building technology within a design framework. Through two distinct sections, the contributions first challenge notions of the boundaries between architecture, engineering, and construction. The authors then investigate twentieth-century building projects exploring technological and aesthetic boundaries of postwar modernism and uncovering lessons relevant to enclosure design that are typically overlooked. Projects include Louis Kahn's Weiss House, Minoru Yamasaki's Science Center, Sigurd Lewerentz's Chapel of Hope, and more. An important read for students, educators, and researchers within architectural history, construction,

history building technology and design this volume sets out to disrupt common assumptions of how we understand this history *The Architecture of Influence* Amanda Reeser Lawrence, 2023-11-21 How do we create the new from the old The Architecture of Influence explores this fundamental question by analyzing a broad swath of twentieth century architectural works including some of the best known examples of the architectural canon modern and postmodern through the lens of influence The book serves as both a critique of the discipline's long standing focus on genius and a celebration of the creative act of revisioning and reimagining the past It argues that all works of architecture not only depend on the past but necessarily alter rewrite and reposition the traditions and ideas to which they refer Organized into seven chapters Replicas Copies Compilations Generalizations Revivals Emulations and Self Repetitions the book redefines influence as an active process through which the past is defined recalled and subsequently redefined within twentieth century architecture
