**in America 1876-1976** A. Thackray, J.L. Sturchio, P.T. Carroll, R.F. Bud, 2012-12-06 This study is an outgrowth of our interest in the history of modern chemistry. The paucity of reliable quantitative knowledge about past science was brought home forcibly to us when we undertook a research seminar in the comparative history of modern chemistry in Britain, Germany, and the United States. That seminar, which took place at the University of Pennsylvania in the spring of 1975, was paralleled by one devoted to the work of the Annales School. The two seminars together catalyzed the attempt to construct historical measures of change in aspects of one science or chemical indicators. The present volume displays our results. Perhaps our labors may be most usefully compared with the work of those students of medieval science who devote their best efforts to the establishment of texts. Only when acceptable texts have been constructed from fragmentary and corrupt sources can scholars move on to the more satisfying business of making history. So too in the modern period a necessary preliminary to the full history of any scientific profession is the establishing of reliable quantitative information in the form of statistical series. This volume does not offer history. Instead, it provides certain element indicators that may be useful to individuals interested in the history of American chemistry and chemical industry and suggestive for policy. **The Politics of**

**National Capitalism** James P. Brennan, Marcelo Rougier, 2009-01-01 In mid twentieth century Latin America there was a strong consensus between Left and Right Communists working under the directives of the Third International, nationalists within the military interested in fostering industrialization, and populists about the need to break away from the colonial legacies of the past and to escape from the constraints of the international capitalist system. Even though they disagreed about the desired end state, Argentines of all political stripes could agree on the need for economic independence and national sovereignty which would be brought about through the efforts of a national bourgeoisie. James Brennan and Marcelo Rougier aim to provide a political history of this national bourgeoisie in this book. Deploying an eclectic methodology combining aspects of the new institutionalism, the new economic history, Marxist political economy, and deep research in numerous rarely consulted archives into what they dub the new business history, the authors offer the first thorough empirically based history of the national bourgeoisie's peak association, the Confederación General Económica (CGE), and of the Argentine bourgeoisie's relationship with the state. They also investigate the relationship of the bourgeoisie to Perón and the Peronist movement by studying the history of one industrial sector, the metalworking industry, and two regional economies, one primarily industrial, Córdoba, and another mostly agrarian, Chaco, with some attention to a third, Tucumán, a cane cultivating and sugar refining region sharing some features of both. While spanning three decades, the book concentrates most on the years of Peronist government, 1946-55 and 1973-76. Ruling Case Law William Mark McKinney, 1917
