National Accounts And The Environment:

National Accounts and the Environment I. Musu, D. Siniscalco, 2012-12-06 In recent years analysts researchers and environmental policy makers have been faced with a serious shortage of empirical data on environmental phenomena In fact the information gathered by various organisations has not yet been systematically classified into a consistent system of accounts This book presents the results of a joint research effort by the Fondazione Eni Enrico Mattei and Italy's Central Statistical Office ISTAT to design a system of accounts for natural and environmental resources The resulting environmental accounts can be integrated with the existing system of national accounts in order to estimate the so called green GDP or net national product NNP

Nature's Numbers National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Integrated Environmental and Economic Accounting, 1999-07-28 In order to really see the forest what's the best way to count the trees Understanding how the economy interacts with the environment has important implications for policy regulatory and business decisions How should our national economic accounts recognize the increasing interest in and importance of the environment Nature's Numbers responds to concerns about how the United States should make these measurements The book recommends how to incorporate environmental and other non market measures into the nation's income and product accounts The panel explores alternative approaches to environmental accounting including those used in other countries and addresses thorny issues such as how to measure the stocks of natural resources and how to value non market activities and assets Specific applications to subsoil minerals forests and clean air show how the general principles can be applied The analysis and insights provided in this book will be of interest to economists policymakers environmental advocates economics faculty businesses based on natural resources and managers concerned with the role of the environment in our economic affairs

National Accounts and the Environment: the Case for a System's Approach Steven J. Keuning, 1992 *Greening National Accounts* Martin O'Connor, Anton Steurer, Marialuisa Tamborra, 2001 This policy briefing series communicates the findings from nine workshops and three plenary meetings under the EVE programme These showed the diversity of research currently being undertaken in the area of environmental values and their policy expression The type of information relevant to the decision process extends from ecological functioning to moral values

Lessons Learned from Environmental Accounting Joy E. Hecht, 2000 Environmental accounting the modification of the national income accounts to take into consideration the economic role of the environment has grown in importance over the past ten years However many countries have not yet implemented such accounts and there is much controversy about whether and how to do so This paper aims to shed light on this situation through nine country case studies Norway The Netherlands Sweden France Canada The Philippines Namibia Germany and the United States

National Accounts and environmentally Sustainable National Income Roefie Hueting, Bart de Boer, 2019-07-01 This book looks at some key economic aspects of the environment Our planet is threatened by a wrong

belief in a wrongly formulated growth The term economic growth can only mean an increase in welfare but is often wrongly identified with production growth that may be destructive to the environment The figure of standard national income NI or Gross Domestic Product GDP is useful for many purposes but inadequate for environmental policy making This book develops the concept of an environmentally Sustainable National Income eSNI eSNI is defined as the maximally attainable level of production using the technology of the year under review whereby the vital environmental functions possible uses of the not human made physical surroundings remain available for future generations Judgement of environmental sustainability requires that both NI and eSNI are looked at jointly alongside each other The distance e NI eSNI provides the relevant information about environmental sustainability Calculations for the Netherlands for 1990 2015 provide a proof of concept National statistical bureaus around the world are advised to provide this information for their own countries so that policy making around the world can use sound information about the national economies and the global environment Dr Roefie Hueting 1929 is an economist and was head of the department of environmental statistics at CBS Statistics Netherlands Ir Bart de Boer 1947 is an electrotechnical engineer who applied systems analysis to environmental issues and sustainability

Environmental Accounting in Theory and Practice K. Uno, Peter Bartelmus, 1998-01-31 Policy failures in environment and development have been blamed on fragmented and eclectic policies and strategies The 1992 United Nations Conference on Environment and Development the Earth Summit in Rio de Janeiro called therefore for an integrated approach in planning and policy making to achieve long term sustainable growth and development The Conference also recognized in its action plan the Agenda 21 that integrated policies need to be supported by integrated information notably requiring the implementation of integrated environmental and economic accounting by its member States During the preparations for the Rio Summit scientists and practitioners of national accounting met in a Special Conference on Environmental Accounting organized by the International Association for Research in Income and Wealth IARIW in Baden Austria Their aim was to explore the need for and methodologies of adjusting national accounts for environmental reasons National accountants had faced mounting criticism that conventional accounting neglected new scarcities in natural capital as well as the social cost of environmental degradation The result of their deliberations was a draft manual later issued by the United Nations Statistics Division UNSD as a handbook of Integrated Environmental and Economic Accounting National Environmental Accounting Joy E. Hecht, 2005 Publisher Description **Measuring and Accounting for Environmental Public Goods** Nicholas Z. Muller, Eli P. Fenichel, Mary Bohman, 2025-04-02 Provides strategies and approaches for integrating natural capital into environmental statistics While the importance of natural resources and the contributions of the environment to welfare are apparent traditional national income and wealth accounting practices do not measure or value environmental public goods This volume examines the conceptual and empirical basis for integrating natural capital forests oceans and air into the economic and environmental statistics that inform public policy It offers innovative approaches to valuing nonmarket

environmental goods and services including strategies for capturing heterogeneity in measurement across types of capital geography and individuals The chapters focus on measuring productivity with adjustments for pollution damage developing a microdata infrastructure to advance our understanding of the distribution of environmental amenities and hazards and estimating long run sustainable development indicators Case studies consider coastal assets forests and marine ecosystems and develop strategies for implementing specific environmental economic accounts such as environmental activity accounts and natural capital accounts for forests and the marine economy As national income accounting standards are updated to incorporate expanded guidance on issues related to natural capital this timely book will help inform decisions on the measurement and treatment of climate air water and other public goods

Macroeconomics and the Environment

Mr.Ved P. Gandhi,1996-06-14 Microeconomic policies dealing with individual industries and economic sectors have traditionally addressed environmental concerns but increasingly the environment is being viewed in terms of the macro economy To improve its understanding of the interrelationship between macroeconomics and the environment the IMF held a seminar in May 1995 at which recognized experts from academic and research institutions nongovernmental organizations and staff from the World Bank and the IMF shared their views on how macroeconomic policies affect the environment and how environmental policies affect the macro economy The present volume edited by Ved P Gandhi contains the papers and proceedings of this seminar

Environmental Valuation and Greening the National Accounts

Weltbank,2013 The national accounts are the single most important source of information about the economy and are widely used in all countries to assess economic performance and for policy analysis However the national accounts have a number of well known shortcomings when it comes to treatment of the environment For example while the income from harvesting timber is recorded in national accounts the simultaneous depletion of natural forest assets is not perhaps more importantly essential life support services provided by forest ecosystems are not explicitly recognized at all Environmental accounts greening the national accounts have been developed to address the shortcomings of the national accounts but valuation of environmental services has been controversial The development of methods to value environmental goods and services continues to evolve apace In an increasing number of countries the practical uptake of these methods has accelerated in numerous areas of public policy that have environmental consequences One policy related domain however where this uptake has been largely conspicuous by its absence is national accounting In this paper we hope to make the case that there is an opportunity to address this situation

Taking Nature Into Account Wouter van Dieren,1995

Taking Nature Into Account makes clear the consequences of continuing to ignore the complex codependency of environment and economy Initiated by the Club of Rome and written in cooperation with the World Wide Fund for Nature the book reviews existing methodologies and makes recommendations for adjusting the way we think about and measure economic progress
