labor productivity and wages selecting equipment and assigning productivity rates and costs acquiring specialty contractor
prices and assigning overhead costs and profit The material is presented from the point of view of a general contractor
working on a competitively bid stipulated sum lump sum contract However other contract methods and the effects they have
on the estimating process are also discussed Furthermore the principles of estimating for the specialty trades are discussed
from the reference of a general building contractor and how the subcontractor's bid will affect the total project cost is
presented Of special note is the book's introduction and utilization of computers in the estimating process enabling readers
to utilize new technology in an effective and efficient manner The book is organized in a way that first teaches the reader to
perform many of the estimating activities manually then guides them in developing a computer spreadsheet The use of
