Mitchell, 1996-09-01 Scholars often use the term structural corruption when discussing modern Japan's political system a system that forces politicians to exchange favors with businessmen in return for funds to finance their political careers Scholars argue that the origins of corruption can be found in the iron triangles formed by politicians bureaucrats and businessmen during the postwar era or during the Pacific War years In this examination of malfeasance in Japanese public office Richard Mitchell systematically surveys political bribery in Japan's historical and cultural contexts from antiquity to the early 1900s Mitchell's narrative serially considers scandals involving courtiers in the ancient imperial government corruption among the shogun's samurai officials and political bribery among bureaucrats and party politicians in the mid nineteenth century Mitchell concludes that bribery was as ubiquitous in premodern Japan as it has been in recent times Focusing on the period since 1868 Mitchell discusses in fascinating detail changes in political bribery in the wake of suffrage expansion estimates of the enormous amount of campaign money needed to win a Diet seat in both the prewar and postwar periods and the low conviction rate of suspected takers of bribes Here is a highly readable and reliable survey of an important yet largely neglected topic in English language studies of Japanese political history *The Publishers' Trade List Annual*, 1978 **National Experience** Blum, John Morton Blum, 2002 *Grey and White Hulls* Ian Bowers, Swee Lean Collin Koh, 2019-09-25 This book undertakes an in depth examination of the diversity in international approaches to the navy coastguard nexus It considers the evolving global maritime security landscape and the emergence and proliferation of maritime law enforcement agencies collectively referred to here as coastguards performing peacetime constabulary duties alongside navies Through a cross regional study of various countries worldwide including those in Asia and Europe this book reveals that there is no one optimal one size fits all organizational structure Instead there is a wide array of drivers that influence a nation state's maritime security architecture and its organizational approach to managing security at sea or broadly speaking securing its national maritime interests What American Women Did, 1789-1920 Linda Miles Coppens, 2015-07-25 This reference book chronicles what American women did from the emergence of the republic through

the end of World War I and the passage of the Nineteenth Amendment A broad spectrum of activities are depicted showing their many accomplishments and how their activities affected the world around them It was an era of great transition for all women A who s who of American women and some men those who showed great support or ironically great opposition to women s reform are described one year at a time beginning with 1789 and ending with 1920 Each year s activities are organized into seven possible categories domesticity work education religion the arts the law and politics and joining forces The book is thoroughly indexed      **Program of the Annual Meeting - American Historical Association** American Historical Association,1980 Some programs include also the programs of societies meeting concurrently with the association

**Faith-Based War** T. Walter Herbert,2014-12-05 The American invasion of Iraq was largely governed by faith based policy The shock and Awe strategy alongside a grossly mismanaged occupation led to the loss of American lives Faith Based War presents an analysis of the imperialist Christian militarism behind the Bush Administration America s self perception as God s Chosen is examined and its catastrophic results detailed The book offers an ethical political and theological perspective on the perversion of Christian teaching behind the war in Iraq and the moral culpability of the American empire

*American Exceptionalism?* Rick Halpern,Jonathan Morris,1997-08-12 The idea that American historical development is different from that of other nations is an old one yet it shows no sign of losing its emotive power Exceptionalism continues to excite beguile and frustrate students of the American past The essays in this volume explore the ways in which the process of class formation in the United States can be said to be distinctive Focusing upon the impact of liberal political thought race and immigration and the role of the war time state they challenge particularist and nation centred modes of explanation Comparing American historical development with Italian South African and Australian examples the essays reinvigorate a tired debate      *Vindicating the Founders* Thomas G. West,2000-11-28 According to the conventional wisdom of our time our nation s Founders were guilty of racism sexism and elitism They were hypocrites who failed to live up to their own enlightened principles The fact that Washington and Jefferson held slaves is taken as definitive proof that they never really believed all men are created equal It is also widely asserted that women even after the American Revolution enjoyed virtually no rights and that the poor and property less were denied the basic tenets of democratic participation Observing that our understanding of the Founders so profoundly influences our opinion of contemporary America Thomas West demonstrates why the Founders were indeed sincere in their belief of universal human rights and in their commitment to democracy More importantly this landmark book explains why their views and particularly the constitutional order they created are still worthy of our highest respect In a straightforward style West debunks numerous widely held myths about the Founders political thought He contrasts the Founders ideas of liberty and equality with today s concluding that contemporary notions of liberalism bear almost no resemblance to the concepts originally articulated by the Founders This controversial convincing and highly original book is important reading for everyone concerned about the origins present and future of the American

experiment in self government      *An American History Curriculum for the Community College Geared to John M.
