education With the conclusion of the Second World War these moves were speeded up Lehigh entered the mainstream of currents in science engineering and industrial management It broadened its financial base modernized its administration built up its capacity in physics and chemistry added programs leading to the M B A Ph D and Ed D degrees and organized research centers During the late 1960s student and faculty discontents born of a collision between rapid internal growth and unsettling international situations briefly delayed orderly progress Trustees and administrators allayed discontents by bringing students and faculty into the work of administration By 1980 the university was still small by modern standards having approximately 4 400 undergraduate and half as many graduate students It had become coeducational and continued concentrating on vocational preparation for careers in engineering science business and teaching all within the context of a liberal arts emphasis on the human condition
