learning professionalisation of lobbying and the possible emergence of a distinct EU public policy style Small States in the European Union Diana Panke, 2016-04-01 The most recent EU enlargements have considerably increased the number of small member states In the EU 27 19 countries have fewer votes in the Council of Ministers than the EU average These small states face a series of size related disadvantages in day to day EU negotiations Against this backdrop the book asks are some small states better at coping with structural disadvantages than others How active are small states in participating in day to day EU negotiations and why do some states use negotiation strategies more frequently than others Under which conditions are the different negotiation strategies effective and when can small states punch above their weight Based on more than 100 interviews with policy makers and an analysis of a unique database on the negotiation activities of EU member states this book explains how active participation is essential for the shaping success of small states and shows that small states are more influential with persuasion based rather than bargaining based strategies Two case studies on the pesticides and the spirit drinks regulations further reveal that persuasion strategies are especially effective if the arguments match the nature of the issue at stake and resonate well with prior beliefs of addressees No other study comprehensively analyzes small states in a comparative perspective examines their activity levels in EU negotiations and outlines which conditions are needed for the effectiveness of a broad range of strategies An indispensable resource for students and researchers interested in how and under which conditions small states can influence policies in negotiations beyond the nation state *The Politics of the Lisbon Agenda* Susana Borrás, Claudio M. Radaelli, 2014-06-03 In the year 2000 in Lisbon the European Union launched an agenda for growth jobs sustainability and competitiveness with a ten year target In 2010 the agenda was re launched with different specific objectives but with the same final goals Why do the European Union leaders engage with these ten year plans What exactly do they commit to when they do so Do they learn from the results or is this a rhetorical exercise that complex organizations need to raise attention to certain issues This volume is the first ever systematic study of the Lisbon agenda of the European Union now called Europe 2020 It explains the rise of the Lisbon agenda as governance architectures and examines its components across time and sectors This book was published as a special issue of the Journal of European Public Policy *Coping with Power Dispersion?* Mads Jensen, Christel Koop, Michaël Tatham, 2017-10-02 The last decades have witnessed a significant shift in policy competencies away from central governments in Europe The reallocation of competencies spans over three dimensions upwards sideways and downwards This collection takes the dispersion of powers as a starting point and seeks to assess how the actors involved cope with the new configurations Chapters discuss the conceptualization of power dispersion and highlight the ways in which we add to this research agenda Some general conclusions are also outlined indicating future avenues of research Taken together the collection contributes answers to the challenge of defining and measuring in a comparative way the control and co ordination mechanisms which power dispersion generates In sum the collection explores the tension between political actors quest for autonomy and the acknowledgement

of their interdependence whilst revealing how as power dispersion deepens central governments have sought to both manage and limit it This book was originally published as a special issue of the Journal of European Public Policy **Elgar Encyclopedia of European Union Public Policy** Paolo R. Graziano, Jale Tosun, 2022-12-13 A holistic and extensive exploration of both the dynamic and incremental changes in EU public policy and the decision processes surrounding them this Elgar Encyclopedia is the definitive reference work in the field of EU public policy **The SAGE Handbook of Public Administration** B Guy Peters, Jon Pierre, 2012-08-16 The original Handbook of Public Administration was a landmark publication the first to provide a comprehensive and authoritative survey of the discipline The eagerly awaited new edition of this seminal international handbook continues to provide a complete review and guide to past and present knowledge in this essential field of inquiry Assembling an outstanding team of scholars from around the world the second edition explores the current state of the art in academic thinking and the current structures and processes for the administration of public policy The second edition has been fully revised and updated with new chapters that reflect emerging issues and changes within the public sector Identifying the Antecedents in Public Performance Bureaucratic Politics Strategy Structure and Policy Dynamics Comparative Administrative Reform Administrative Ethics Accountability through Market and Social Instruments Federalism and intergovernmental coordination A dominant theme throughout the handbook is a critical reflection on the utility of scholarly theory and the extent to which government practices inform the development of this theory To this end it serves as an essential guide for both the practice of public administration today and its on going development as an academic discipline The SAGE Handbook of Public Administration remains indispensable to the teaching study and practice of public administration for students academics and professionals everywhere **European Disunion** J. Italy and the European Union Federiga Bindi, 2011-02-01 A Brookings Institution Press and Scuola Superiore della Pubblica Amministrazione SSPA publication

Federiga Bindi provides for the first time an in depth analysis of Italy's role within the European Union EU in this inaugural volume of a book series published jointly by the Brookings Institution Press and the Scuola Superiore della Pubblica Amministrazione Italian National School of Public Administration or SSPA Italy and the European Union relates in detail the historical cultural and sociological factors that have led to Italy's incomplete Europeanization or full integration within the EU It also brings the reader up to date on the steps taken by the country's leaders to improve Italy's standing and become a more effective member in the organization it helped to found Discussing the author's extensive research The Economist notes Federiga Bindi identified a number of barriers to an effective European policy in Italy a high turnover of governments coalition partners with conflicting aims the failure of bureaucrats to learn from other member states and politicians lack of interest in Europe recently however she found that matters had improved An interdepartmental body for the coordination of EU policies has been created Parliament operates an effective scrutiny system the administration has learnt to learn from others But the other problems remain and they are formidable Her study ends on an exasperated note Italy appears to be stuck in the age of the Guelphs and the Ghibellines in which the victory of one faction over another is what counts and the fact that this may be damaging to the country matters little from The Economist July 31 2010

With, Without, or Against the State? Michaël Tatham, 2016-06-23 Much research has highlighted that sub state entities SSEs such as the German L nder the Spanish autonomous communities or the French regions mobilise at the European level This literature however is silent on how this sub state activity interacts with that of its own member state Do SSEs lobby in Brussels with their member state cooperation without their member state non interaction or against their member state conflict This book fills the current research gap by identifying what pattern of interaction between state and sub state EU interest representation corresponds to and by identifying what the determinants of such a pattern are To achieve this both quantitative and qualitative methods are employed The quantitative section consists of regression analysis on data collected through a survey addressed to heads of regional offices in Brussels and highlights that cooperation is the most frequent outcome followed by non interaction Conflicting interest representation is the least frequent outcome Further analysis reveals that devolution levels do not affect conflict but increase the frequency of cooperation and decrease that of non interaction Meanwhile party political incongruence fails to affect conflict decreases cooperation and increases non interaction This quantitative work is complemented by a series of in depth case study analyses of Scotland UK Salzburg Austria Rh ne Alpes and Alsace both France Based on over a hundred semi structured interviews the case studies along with additional statistical testing confirm the overall findings reached through quantitative means and further suggest that the effect of devolution overrides that of party political incongruence Transformations in Governance is a major new academic

book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Democratic Governance and European Integration Ronald Holzacker,Erik Albæk,2007-01-01 As the power and scope of the European Union moves further beyond traditional forms of international cooperation between sovereign states it is important to analyse how these developments are impacting upon national institutions and processes of democratic representation and legitimacy in the member countries The authors in this book identify four core processes of democratic governance present in any democratic political system that link societal and state processes of decision making opinion formation interest intermediation national executive decision making and national parliamentary scrutiny From a normative perspective they discuss what impacts this process of Europeanization has on democracy in the evolving system They conclude that more changes are seen within the state centric than in the societal centred processes of democracy thus the public seems to have been left behind in the process of constructing Europe The empirical research and normative discussion presented in this book are designed to further our knowledge concerning the Europeanization of social and state processes of democracy and to contribute to the continuing dialogue on democracy in the European Union This book will be of great interest to academics and researchers of political science public policy and international relations as well as those interested in European studies and comparative politics

Negotiations in the EU Council of Ministers Sandrino Smeets,2016-01-01 Insiders and outsiders agree there is something particular about negotiating in Brussels This book analyses ten years of continuous negotiations about EU enlargement to the Western Balkans answering questions such as When and how are decisions typically reached in the European Union What is this culture of consensus that pervades negotiations in the Council of Ministers And why are some member states more successful than others in making their voices heard Using the metaphor of the Caucus race from Alice in Wonderland Smeets book offers a fresh perspective on the decision making realities in Brussels European Quarter By providing unique empirical insight into behind closed doors

debates it explains the faltering accession process of the countries of former Yugoslavia But most of all it reveals the mechanism by which national interests are accommodated so that deals can be reached between the member states
