controversies surrounding Flemish cartographer Gerard Mercator's legacy. He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth's roundness. As Monmonier shows, mariners benefited most from Mercator's projection which allowed for easy navigation of the high seas with rhumb lines, clear cut routes with a constant compass bearing for true direction. But the projection's popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps, world atlases and geopolitical propaganda. Because it distorts the proportionate size of countries, the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism. In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another. In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success. Widely acclaimed for his accessible intelligent books on maps and mapping, Monmonier here examines the uses and limitations of one of cartography's most significant innovations. With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations, why journalists covering the controversy ignored alternative world maps and other key issues, and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps. Rhumb Lines and Map Wars is vintage Monmonier: historically rich, beautifully written, and fully engaged with the issues of our time.

World and Its Peoples, Marshall Cavendish, 2006-09. Describes the geography, people, culture and politics of the countries of the Middle East, Central Asia and North Africa.

The Well-Trained Mind, Susan Wise Bauer, Jessie Wise, 2016-08-09. Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education by doing it yourself. *The Well Trained Mind* will instruct you step by step on how to give your child an academically rigorous, comprehensive education from preschool through high school, one that will train him or her to read, to think, to understand, to be well rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules; the middle school logic stage in which the student begins to think more analytically; and the high school rhetoric stage where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of

online resources new material on teaching children with learning challenges cutting edge math and sciences recommendations answers to common questions about home education and advice on practical matters such as standardized testing working with your local school board designing a high school program preparing transcripts and applying to colleges You do have control over what and how your child learns The Well Trained Mind will give you the tools you ll need to teach your child with confidence and success      A Communication Perspective on Interfaith Dialogue Daniel S. Brown,2013-01-30 Communication theory provides a compelling way to understand how people of faith can and should work together in today s tumultuous world In A Communication Perspective on Interfaith Dialogue fifteen authors present their experiences and analyses of interfaith dialogue and contextualize interfaith work within the frame of rhetorical and communication studies While the focus is on the Abrahamic faiths these essays also include discussion of Hinduism and interracial faith efforts Each chapter incorporates communication theories that bring clarity to the practices and problems of interfaith communication Where other interfaith books provide theological political or sociological insights this volume is committed to the perspectives contained in communication scholarship Interfaith dialogue is best imagined as an organic process and it does not require theological heavyweights gathered for academic banter As such this volume focuses on the processes and means by which interfaith meaning is produced      **Managing Cultural Differences** Robert T. Moran,Philip R. Harris,Sarah Moran,2010-11-11 The international nature of modern Business means that individual and organizational success is no longer dependent solely on business acumen our ability to understand communicate and work with people in different countries and cultures around the world is more important than ever as more companies rely on their global reach to achieve the best profit and performance For this reason international business and cross cultural management are key topics in undergraduate business MBA and executive education programs worldwide as companies and institutions prepare current and future business leaders for the global marketplace      **Atlas of World War II** Stephen G.
