Identity, and the National Question in China and Japan Germaine A. Hoston, 2021-02-09 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model **Nationalism** Philip Spencer, Howard Wollman, 2002-07-09 Spencer and Wollman seek to challenge

After Chartism Margot C. Finn, 1993 Working and middle class radical politics in England from the fall of Chartism in 1848 to the 1870s *The Routledge Dictionary of Twentieth-Century Political Thinkers* Robert Benewick, Philip Green, 2002-09-11 This edition has been revised and extended to include eleven new entries on Berlin Chomsky Derrida Rorty and many others Key features of this unique guide include 170 entries from 96 contributors many of whom are leading authorities in their field alphabetically arranged entries which include brief biographies outlines of major ideas and suggestions for further reading coverage of Western and Third World political theorists as well as those who have influenced new movements based on the issues of ethnicity gender and ecology a thematically organised index *The American Worker and the Absurd Truth about Marxism* Alan Johnson, 2023-03-20 In 1906 Werner Sombart famously quipped that the ship of American socialism had crashed on the reefs of roast beef and apple pie Why did socialism never take ground in the USA This volume opens with the first English translation of Karl Kautsky's 1906 long essay The American Worker an extended response published in Die Neue Zeit to Sombart's 1905 essay Why Is There No Socialism in the United States Other essays and reviews are each marked by an effort to come to terms with the fact that Friedrich Engels's optimism that History would take care of class consciousness in the USA has been proven misplaced Originally published as issue 4 of Volume 11 2003 of Brill's journal Historical Materialism For more details on this journal please click here *The Panthers Can't Save Us Now* Cedric Johnson, 2022-02-22 Ending the horrors of police violence requires addressing economic inequality In the wake of the mass protests following the police murder of George Floyd nearly every major consumer brand had proclaimed their commitments to antiracism often with new ad campaigns to match their tweets Very little in the way of police reform has been achieved Still less was achieved around policies that might help the millions of black Americans living at or below the poverty line Why has anti racism been such a powerful source of mobilization but such a poor means of building political opposition capable of winning big reforms This volume revisits a debate that transpired during Black Live Matter's first wave Writing against the grain of popular left sentiments Johnson cautions against a new ethnic politics Instead he calls for broad based left politics as the only viable means for ending the twin crises of racial inequality and police violence Redistribution public goods and multi ethnic working class solidarity are the only viable response to the horrors of police violence and mass incarceration It just so happens that fighting the conditions that make crime and violence inevitable is also the means by

The Prospects for Liberal

Nationalism in Post-Leninist States Cheng Chen,2010-11-01

The Lost World of Socialists at Europe's Margins Maria

Todorova,2020-09-03 Maria Todorova's book is devoted to the golden age of the socialist idea broadly surveying the period in and around the time of the Second International. It critically examines the promise for an alternative socialist utopia from 1870 to the 1920s. Todorova brings in the experience of the periphery in a comparative context in the belief that the margins can often elucidate better the character of a phenomenon and de-provincialize it from essentialist notions. In doing so, *The Lost World of Socialists at Europe's Margins* moves beyond the traditional historiographical emphasis on ideology by looking at different intersections or entanglements of spaces, generations, genders, ideas, and feelings, and different flows of historical time. The study provides a social and cultural history of early socialism in Eastern Europe with an emphasis on Bulgaria, arguably the country with the earliest and strongest socialist movement in Southeast Europe and one that had a unique relationship to both German and Russian social democracy. Based on a rich prosopographical database of around 3500 biographies of people born in the 19th century, the book addresses the interplay of several generations of leftists looking at the specifics of how ideas were generated, received, transferred, and transformed. Finally, the work investigates the intersection between subjectivity and memory as reflected in a unique cache of archival materials containing over 4000 documentary sources including diaries, oral interviews, and unpublished memoirs. A microhistorical approach to this material allows the reconstruction of structures of feeling that inspired an exceptional group of individuals.

Holding Fast to an Image of the Past Neil Davidson,2014-05-05 Davidson explores classic themes in historical materialism as he explains the moments of transition from the dominance of one mode of production to another, the process of social revolution which accompany these transitions, and the problem of nationalism both as a theoretical challenge to Marxism's capacity for historical explanation and as a practical obstacle to socialist consciousness.

Racial Formation in the United States

Michael Omi,Howard Winant,2014-06-20 Twenty years since the publication of the Second Edition and more than thirty years since the publication of the original book, *Racial Formation in the United States* now arrives with each chapter radically revised and rewritten by authors Michael Omi and Howard Winant, but the overall purpose and vision of this classic remains the same. Omi and Winant provide an account of how concepts of race are created and transformed, how they become the focus of political conflict, and how they come to shape and permeate both identities and institutions. The steady journey of the U.S. toward a majority nonwhite population, the ongoing evisceration of the political legacy of the early post-World War II civil rights movement, the initiation of the war on terror with its attendant Islamophobia, the rise of a mass immigrants' rights movement, the formulation of race-class-gender intersectionality theories, and the election and reelection of a black President of the United States are some of the many new racial conditions *Racial Formation* now covers.
