National Security The Economic And Environmental Dimensions:

National Security Michael Renner, 1989 **National Security : Emerging Dimensions and Threats** Navniit Gandhi, 2010 There is a visible change in the outlook towards security all over the world probably because of the increasing complexity of global problems and their repercussions for millions of people all over the world Insecurity is not just all pervasive but is reiterating its alarming overtones more forcefully than during the cold war era There are now threats very different from a military attack on a nation s territory The concept of National Security hence needs to be redefined The gamut of its perceptions has undergone a paradigm shift The context against which the policy makers seek to establish national security is undergoing tumultuous changes While not downplaying the relevance of strategic means of maintaining national security this book explores the emerging non strategic threats to national security with the obvious grave consequences on human security This book attempts to address several questions Can the concepts of National Security and Human Security be reconciled meaningfully Can their approaches and objectives be inter twined so that we can live a fuller life Can the nations and citizenry both feel equally secure at the same time **The DOE FY 99 Budget Authorization Request ; H.R. 1806, to Provide for the Consolidation of the DOE Offices of Fossil Energy, Renewable Energy, and Energy Efficiency ; S. 965, to Amend Title II of the Hydrogen Future Act of 1996** United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment, 1998 National and International Security Michael Sheehan, 2018-01-18 This title was first published in 2000 This series brings together significant journal articles appearing in the field of comparative politics over the past 30 years The aim is to render accessible to teachers researchers and students an extensive range of essays to provide a basis for understanding the established terrain and new ground This volume introduces the undergraduate to a significant body of the periodical literature on the subject of national and international security **Security and Environment in the Mediterranean** Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century **Varying Dimensions of India's National Security** Anshuman Behera, Sitakanta

Mishra,2022-02-14 This book engages a comprehensive approach to understand both traditional and non traditional security issues in addressing dimensions of India s national security The issues highlighted in the book through fourteen distinct yet inter related chapters offer insightful reading to India s national security This edited book explores the criticalities of various security issues in India internal and external and digs deep into the government responses to each of these issues Stepping away from merely focusing on the state centric understanding of national security this book also includes human security perspectives In this process this book also offers set of policy recommendations which could be used for effectively dealing with the national security challenges The themes covered in this edited book range from offering a conceptual framework of national security to issues such as energy security maritime security nuclear security internal security neighborhood policy dumping terrorism economic security cyber security role of media defense preparedness and use of GIS in security domain This book highlights some of the important security issues around the larger perspective of India s national security This book will be highly useful for the students and scholars of security and strategic studies and international relations and also to the policymakers in the region

Rethinking National Security Frances Scott,1990 Environmental Security Kent Hughes Butts,1993 **Environmental Security** Narottam Gaan,2004 The work is an authentic and comprehensive one on environmental security Some important topics discussed are Environmental security a theoretical quest politics of environment security and problems of widening environmental scarcity of resources global climate change etc Useful for environmentalists researchers

Maritime Security of India Dr. Suresh R,2014-02-01 This book focuses on various aspects of maritime security of India Starting with the changing dimensions of national security it addresses the issues such as non traditional threats to security the threat posed by non state actors the causes of insecurity and also the imperatives of tackling the human security challenges The need for a comprehensive change in India s security policy is well exposed and certain policy prescriptions are also given The oceans are generally meant for better inaction among nations especially in the era of accelerated pace of globalization With regard to the coastal security of India the role of coastal community is significant The needs for inculcating awareness among the coastal community on coastal security matters as well as infrastructure development along the coastal area are also emphasized It is very important to look into the basic problems of coastal people as they face many human security challenges When we look into the coastal security a convergence of the national security concerns and human security concerns is visible The overall development of the coastal area would lead to better human security and better human security would result in enlisting the support of the coastal community to ensure national security programme especially the coastal security In short coastal security is not only about protecting the coastal terrain and territorial waters from direct attacks by the state actors or non state actors but also safeguarding the interests of all stake holders

political thinking about Europe's security The overall picture is optimistic but events such as the Yugoslav civil war suggest perhaps a more dangerous future *Environment, Scarcity, and Violence* Thomas F. Homer-Dixon, 2010-07-01 The Earth's human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world's population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence **Global Climate Change, Environment and Energy** Filiz Katman, 2015-04-01

Global climate change is the result of the combination of natural climate change and man made climate change that directly or indirectly damages global atmosphere components observed over a comparable time period It has both a direct and an indirect impact on the earth Despite its overwhelmingly negative connotations it also brings about opportunities such as the possibility of a green economy This book covers both sides of this debate in providing comprehensive information concerning climate change environment and energy It is composed of several articles discussing these issues from a multidimensional perspective and elaborating upon their interdependence The articles collected here are based upon contributions to the International Symposium on Global Climate Change Environment and Energy Global Challenges and Opportunities for Sustainability hosted by the Istanbul Aydin University Energy Politics and Markets Research Centre on 25 April 2011 The aim of the conference which is reflected in this volume was to fulfil the responsibility owed to the earth and to humanity GLOBAL
