American Design in the Twentieth Century Gregory Votolato,1998 Author Greg Votolato presents the intricate story of how design evolved as a profession and a leisure activity Votolato demonstrates that design in affluent American culture is as much about personalization of the material world as it is about the performance and appearance of manufactured goods 114 illustrations

Nationalism and Internationalism Jeremy Aynsley,1993 Nationalism and Internationalism looks at the way designers have addressed the national and international context of their work during this century Text and 66 illustrations demonstrate the positive response to avant garde ideas and belief in the social relevance of designs on an international level By contrast the varied responses to materials techniques and sources of ideas to reinforce national identity are also considered

Designing Worlds Kjetil Fallan,Grace Lees-Maffei,2016-06 From consumer products to architecture to advertising to digital technology design is an undeniably global phenomenon Yet despite their professed transnational perspective historical studies of design have all too often succumbed to a bias toward Western industrialized nations This diverse but rigorously curated collection recalibrates our understanding of design history reassessing regional and national cultures while situating them within an international context Here contributors from five continents offer nuanced studies that range from South Africa to the Czech Republic all the while sensitive to the complexities of local variation and the role of nation states in identity construction

The change to photocomposition was embraced and in its latter years the Press was innovative in embracing new opportunities in particular with a complete foreign language service offered to export businesses.
