Natos Empty Victory A Postmortem On The Balkan War:

NATO's Empty Victory Ted Galen Carpenter, 2000 The Clinton administration and the other NATO governments boast that the alliance won a great victory in its war against Yugoslavia **The Media and Human Rights** Ekaterina Balabanova, 2014-09-25 In recent years there has been an explosion in the usage and visibility of the language of human rights but what does this mean for the role of the media For evolving ideas about human rights And for the prospect of shared cosmopolitan values Ekaterina Balabanova argues that in order to answer these questions there needs to be a deconstruction of monolithic ways of thinking about the media and human rights incorporating the spectrum of political arguments and worldviews that underpin both Ten case studies are presented which illustrate many of the problems and challenges associated with the relationship between the media and human rights The examples range from cases of humanitarian intervention to analysis of global human rights campaigning on refugee issues from immigration and asylum to genocide freedom of speech and torture Anchored in an appreciation of the political conflicts and compromises at the heart of international human rights agreements The Media and Human Rights is an invaluable resource for students studying media and human rights international politics security studies and political communication *A Legal Geography of Yugoslavia's Disintegration* Ana S. Trbovich, 2008-02-05 A Legal Geography of Yugoslavia's Disintegration explains the violent break up of the former Yugoslavia in early 1990s in the context of two legal principles sovereignty and the self determination of peoples The author recounts Yugoslavia's history with a focus on the country's internal administrative divisions and aspirations of different ethnic groups in order to effectively explain the genesis of the international community's political decision to recognize the right of secession for the largest administrative units of Yugoslavia Trbovich a Serbian author writing from the perspective of a disengaged scholar tackles her subject matter with clarity and detail and offers an intriguing analysis of Kosovo's future status international recognition of secession implications of Yugoslavia's disintegration for other conflicts invoking right to self determination and international intervention in ethnic conflicts China's Future Cato Institute, 2000 This book is the outgrowth of a September 1999 Cato Institute conference Whither China The PRC at 50 p ix Includes bibliographical references and index **Smokescreen** Paul F. J. Aranas, 2012 The United States and NATO regularly employ the illegitimate use of force using alternative norm justifications and a faulty definition of legitimacy Meanwhile the U S education system and mass media largely ignore the history and principles of the United Nations Smokescreen reinforces the need to respect the rule of law enshrined in the UN Charter and offers a path forward out of the haze of purported altruistic justifications Publisher description **Winning Ugly** Ivo H. Daalder, Michael E. O'Hanlon, 2004-05-13 After eleven weeks of bombing in the spring of 1999 the United States and NATO ultimately won the war in Kosovo Serbian troops were forced to withdraw enabling an international military and political presence to take charge in the region But was this war inevitable or was it the product of failed western diplomacy prior to the conflict And

once it became necessary to use force did NATO adopt a sound strategy to achieve its aims of stabilizing Kosovo In this first in depth study of the Kosovo crisis Ivo Daalder and Michael O Hanlon answer these and other questions about the causes conduct and consequences of the war Based on interviews with many of the key participants they conclude that notwithstanding important diplomatic mistakes before the conflict it would have been difficult to avoid the Kosovo war That being the case U S and NATO conduct of the war left much to be desired For more than four weeks the Serbs succeeded where NATO failed forcefully changing Kosovo s ethnic balance by forcing 1 5 million Albanians from their home and more than 800 000 from the country Had they chosen to massacre more of their victims NATO would have been powerless to stop them In the end NATO won the war by increasing the scope and intensity of bombing making serious plans for a ground invasion and moving diplomacy into full gear in order to convince Belgrade that this was a war Serbia would never win The Kosovo crisis is a cautionary tale for those who believe force can be used easily and in limited increments to stop genocide mass killing and the forceful expulsion of entire populations Daalder and O Hanlon conclude that the crisis holds important diplomatic and military lessons that must be learned so that others in the future might avoid the mistakes that were made in this case

Weapons of Mass Migration Kelly M. Greenhill, 2010-03-18 IR theorists foreign policy analysts and migration security studies and human rights scholars will all find this book a valuable addition to their scholarship Political Studies Review At first glance the U S decision to escalate the war in Vietnam in the mid 1960s China s position on North Korea s nuclear program in the late 1990s and early 2000s and the EU resolution to lift what remained of the arms embargo against Libya in the mid 2000s would appear to share little in common Yet each of these seemingly unconnected and far reaching foreign policy decisions resulted at least in part from the exercise of a unique kind of coercion one predicated on the intentional creation manipulation and exploitation of real or threatened mass population movements In Weapons of Mass Migration Kelly M Greenhill offers the first systematic examination of this widely deployed but largely unrecognized instrument of state influence She shows both how often this unorthodox brand of coercion has been attempted more than fifty times in the last half century and how successful it has been well over half the time She also tackles the questions of who employs this policy tool to what ends and how and why it ever works Coercers aim to affect target states behavior by exploiting the existence of competing political interests and groups Greenhill argues and by manipulating the costs or risks imposed on target state populations This coercion by punishment strategy can be effected in two ways the first relies on straightforward threats to overwhelm a target s capacity to accommodate a refugee or migrant influx the second on a kind of norms enhanced political blackmail that exploits the existence of legal and normative commitments to those fleeing violence persecution or privation The theory is further illustrated and tested in a variety of case studies from Europe East Asia and North America To help potential targets better respond to and protect themselves against this kind of unconventional predation Weapons of Mass Migration also offers practicable policy recommendations for scholars government officials and

anyone concerned about the true victims of this kind of coercion the displaced themselves **Cato Handbook for Congress** Cato Institute, Edward H. Crane, David Boaz, 2003 Offering policy recommendations supported by brief rationales this handbook offers the capitalist libertarian perspective on issues currently facing Congress Highlights include advice on campaign finance reform the USA PATRIOT Act the war on drugs monetary policy deregulation taxes education **Kosovo and International Society** Alex J. Bellamy, 2002-08-11 This book explains the international engagement with the Kosovo conflict from the dissolution of Yugoslavia to Operation Allied Force It shows how Kosovo was deliberately excluded from the search for peace in Yugoslavia before going on to demonstrate how a shaky international consensus was forged to support air strikes in 1999 In doing so it exposes many of the myths and conspiracy theories that have developed about the war and explains the dilemmas facing actors in this unfolding drama **Grand Strategy from Truman to Trump** Benjamin Miller, Ziv Rubinovitz, 2020-11-10 American foreign policy is the subject of extensive debate Many look to domestic factors as the driving forces of bad policies Benjamin Miller instead seeks to account for changes in US international strategy by developing a theory of grand strategy that captures the key security approaches available to US decision makers in times of war and peace Grand Strategy from Truman to Trump makes a crucial contribution to our understanding of competing grand strategies that accounts for objectives and means of security policy Miller puts forward a model that is widely applicable based on empirical evidence from post WWII to today and shows that external factors rather than internal concerns are the most determinative **State-Building in Kosovo** Andrea Lorenzo Capussela, 2015-03-19 The history of Kosovo is a complicated one which typifies the darker side of modern Balkan history Milosevic's Serbia withdrew from Kosovo in 1999 and the province was handed over to a special UN body who governed until 2008 when the West allowed Kosovo to become independent The aim was to erect a stable and well governed democracy but the outcome was a fragile state which still threatens the stability of the Balkans and Europe's internal security How did this happen Here Andrea Lorenzo Capussela offers an inside look at the process of building democracy in Kosovo As head of the economics unit of Kosovo's international supervisor Capussela has had access to previously unknown sources and information regarding the roles of the EU and the US in the crisis This will be an essential reading for those studying the Kosovo crisis The Prevention and Intervention of Genocide Samuel Totten, 2017-09-08 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community's efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters

examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions

Darwin and International Relations Bradley A. Thayer, 2021-03-17 Shows a mastery of research and theory in both biology and international relations and weaves the two fields together in a compelling fashion Dr Steven A Peterson Director School of Public Affairs Penn State Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Using ethnological and statistical studies of warfare among tribal societies Bradley A Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations Obligatory reading for social and life scientists alike and deserves to become a standard work in political science International History Review A thoughtful book that can challenge some of our comfortable assumptions Journal of Military History Outstanding This book will become a standard work in political science Roger D Masters Dartmouth College

Putting Defense Back into U.S. Defense Policy Ivan Eland, 2001-09-30 This book examines the implications of counterinsurgency wars for U S defense policy and makes the compelling argument that the United States default position on counterinsurgency wars should be to avoid them In this compelling study Eland questions the core assumptions of the American foreign policy and defense establishments that call for military interventions around the world and high and increasing defense budgets at home He

outlines a security policy more appropriate to the sober realities of the post Cold War era This is an approach that calls for military restraint overseas taking advantage of the already secure U S geostrategic position while safeguarding vital national interests Eland details the military force structure needed for this new role and calculates the reduced defense budget required to pay for these forces This book is a timely wake up call to those who make American foreign and defense policies It demands a badly needed re thinking of America s national interests In the author s view America s natural geostrategic position places it at a natural advantage rendering unnecessary a forward defense posture A non interventionist foreign policy would save money by requiring lower defense budgets An America less willing to get involved in complex overseas disputes unrelated to U S vital interests would also be less likely to make enemies around the world *Transatlantic Diplomacy and the Use of Military Force in the Post-Cold War Era* M. Wintz, 2010-10-11 This book is an analysis and a set of tools of analysis to explain and understand why when where and how the United States and its major NATO allies will agree or disagree on a collective policy regarding using military force abroad

NATO's Peace Enforcement Tasks and Policy Communities Giovanna Bono, 2017-11-30 This book was published in 2003 How has NATO managed to survive and transform itself into a peace enforcement organization Challenging the dominant assumption that NATO intervened in the Balkans because of the threat that conflicts in the region posed to European security this book develops a new set of research questions based on the hypothesis of the existence of policy communities The author demonstrates that there were shifting policy communities in operations that shaped the Alliance's transformation process arguing that NATO would not have succeeded in assuming peace enforcement tasks without other factors ranging from organisational dynamics domestic politics and the impact of ad hoc reactions to external events coming into play Highlighting the role of NATO as an actor in international security this volume is aimed at academics and practitioners in the field of international relations
