Societal Adaptation to Climate Variability and Change Sally M. Kane,Gary W. Yohe,2013-03-09 Changes in climate and climate variability have an effect on people s behaviour around the world and public institutions have an important part to play in influencing our ability to respond to and plan for climate risk We may be able to reduce climate risk by seeking to mitigate the threat on the one hand and by adapting to a changed climate on the other Another theme of the book is the integrated role of adaptation and mitigation in framing

issues and performing analyses Adaptation costs fall most heavily on the poor and special attention needs to be paid to adaptation by the poorest populations An integrating framework is also presented to provide the context for an expansive typology of terms to apply to adaptation The 12 papers collected here use methods from a variety of disciplines and focus on different time frames for decision making from short term to the very long term Readership Technically trained readers familiar with the policy issues surrounding climate change and interested in learning the scientific underpinnings of issues related to societal adaptation

Weapons of War: Environmental Impact, 2013-08-15 The Indian Air Force from a humble beginning in 1932 with 4 Wapiti aircraft six Indian officers and 22 hawai sepoys have traversed a long journey of eighty one years and crossed noteworthy milestones to become the fourth largest air force in the world While facing several limitations challenges IAF have met all the national defence requirements and made several strategic contributions With growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges India s national defence requirements are also increasing The first Gulf War was a monumental turning point in the war time employment of aerospace power Ever since significance of aerospace power in war crisis and peace time has been gaining ascendancy Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground Scrutiny of the emerging global and national trends suggests that employment of the aerospace assets as well as nation s expectation from the IAF will continue to rise Alongside there is an unplanned fall in flying platforms weapon systems and pilot strength of the IAF This study is an attempt to analyse the history of the IAF in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges IAF would be facing in the next two decades and beyond Road map for transformation of the national security framework indigenous aerospace industry and the IAF has also been suggested

Armed Conflict and Environmental Damage Dr. U C Jha, 2014-08-01 Armed conflict and military activities have serious adverse impacts on the environment Modern weaponry troop movements landmines hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and

peacetime military activities Ecological assaults in combat areas are often kept a secret by the government resulting in even greater humanitarian and environmental harm Environmental degradation is increasingly being recognized as one of the most significant challenges of the 21st century and its effects are being felt worldwide Both domestic and international legislations have been inadequate in mitigating the impact of military activities This book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification It puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth [A Research Agenda for Military Geographies](#) Rachel Woodward, A Research Agenda for Military Geographies explores how military activities and phenomena are shaped by geography and how geographies are in turn shaped by military practices A variety of future research agendas are mapped out examining the questions faced by geographers when studying the military and its effects

The History of Cartography, Volume 6 Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps **Climate change Impacts and Household Resilience** Andersen, Lykke E., Breisinger,

Clemens, Jemio, Luis Carlos, Mason-D'Croz, Daniel, Ringler, Claudia, Robertson, Richard D., Verner, Dorte, Wiebelt, Manfred, 2016-04-07 This food policy report is a response to growing concerns about the impacts of climate change on Latin American economies agriculture and people It assesses both local and global effects of changing agricultural yields on the economy subnational regions and different household types including male and female headed households in Brazil Mexico

and Peru The three countries reflect economic and geographic diversity in Latin America and more than half of the region's population Climate change impacts tend to be relatively small at an economywide level in all three countries However sectoral and household level economic impacts tend to be diverse across countries and subnational levels They mainly depend on projected changes in agricultural yields the share of agriculture in regional gross domestic product GDP crop specific international trade balances net food buyer seller position and income diversification of households As for gender results from this study suggest that female headed households may be less vulnerable than male headed households to the effects of climate change highlighting the importance of considering women as a source for solutions for building resilience to climate change Given the relatively small impacts of climate change and the degree of uncertainty associated with them it is too early to define specific policy recommendations All three countries should try to maximize the benefits that may come with higher agricultural world market prices and to minimize the losses from reductions in agricultural yields
