**Diet for a Strong Heart** Michio Kushi,Alex Jack,2003-12-31 The groundbreaking dietary program designed to help keep the heart healthy without drugs surgery or expensive treatments Illustrated      Biophilosophy Rolf Sattler,2012-12-06 This book is an introduction to biophilosophy written primarily for the student of biology the practicing biologist and the educated layperson It does not presuppose technical knowledge in biology or philosophy However it requires a willingness to examine the most basic foundations of biology which are so often taken for granted Furthermore it points to the bottomlessness of these foundations the mystery of life the Unnamable I have tried to further the awareness that biological statements are based on philosophical assumptions which are present in our minds even before we enter the laboratory These assumptions which often harbor strong commitments are exposed throughout the book I have tried to show how they influence concrete biological research as well as our personal existence and society Thus emphasis is placed on the connection between biophilosophy and biological research on the one hand and biophilosophy and the human condition on the other      *History of Miso and Its Near Relatives* William Shurtleff; Akiko Aoyagi,2021-05-05 The world s most comprehensive well documented and well illustrated book on this subject With extensive subject and geographical index 363 photographs and illustrations many in color Free of charge in digital PDF format      **The End of Medicine** Kaare Bursell,2009-01-29 At the tender age of 15 the author set out to discover the answers to two questions What is disease and What does disease signify His quest began in 1966 when he enrolled in the School of Veterinary Medicine and Science at the University of Liverpool After 5 years of study he then worked as a Veterinary Clinician and Surgeon in large animal practice for 8 years This experience did not answer the questions In 1975 he began living thinking and eating according to macrobiotic principles and philosophy and as he did the answers to these questions began to become clearer In 1982 he discovered the work of Rudolf Steiner and as he began to study his lecture cycles and books the answers became revealed The End of Medicine is the result of over 40 years of study experience and learning working with thousands of sick individuals from all walks of life The contents of the book describe how and why illnesses develop what illness signifies and makes a distinction between illness disease and health The

crucial significance of the digestive processes of assimilation and elimination in the onset of illnesses and recovery of health are described in detail The book thus fulfils the indication given by Rudolf Steiner in a lecture given in 1923 where he says a modern system of medicine must always take the metabolic system that is to say the normal processes of digestion as its point of departure and starting from there it must deduce how internal illnesses in the widest possible sense can arise from the metabolism In addition the book contains instruction on how to do self diagnosis and then gives the reader speaking imaginatively a pair of new legs a compass and a map The reader who is sufficiently inspired can then learn to use the new pair of legs comprising a change to a macrobiotic way of eating and doing the ginger compress regimen described learning how to use the compass yin and yang theory and use the map contained in the latter chapters to explore the new territory which opens up before us as we do so
