Natural Approach Language Acquisition In The Classroom:

The Natural Approach Stephen D. Krashen, Tracy D. Terrell, 1983 **The Natural Approach** Stephen D. Krashen, Tracy D. Terrell, 1988 Stephen Krashen's Second Language Acquisition and Second Language Learning gave rise to a debate that has been growing in scale and importance ever since Based on the important acquisition learning distinction described by Earl Stevick as potentially the most fruitful concept for language teachers that has come out of the linguistic sciences during my professional lifetime Krashen's Monitor Theory provided a unique insight into the process at work in language studies It gained the Modern Languages Association's Kenneth B Mildenberger award for the greatest contribution to second language education for that year In this book Stephen Krashen has combined with Tracy Terrell whose prodigious teaching skill and energy has enthralled gatherings of teachers in Europe and USA to derive from that empirically grounded theory a new approach to the teaching of second and foreign languages Responding to the challenge to translate theory into practice the two authors have followed through the findings of the researchers to produce an essentially classroom based practical formulation of teaching method that is relatively simple to use easily adapted to a variety of situations and capable of efficient modification for different types of learners with varied cognitive styles *The Natural Approach - Language Acquisition in the Classroom* Stephen D. KRASHEN, 1988 **Approaches and Methods in Language Teaching** Jack C. Richards, Theodore S. Second Language Acquisition Processes in the Classroom Amy Snyder Ohta, 2001 This book is the first study to examine how interactional style develops within the walls of a foreign language classroom in the first two years of language study Results show learners to be highly sensitive to pragmatic information and that learners can move toward an appropriate interactional style through classroom interactive experience The book shows how learners are most often sources who offer assistance and correction with errors serving most often to stimulate further thinking about what form is correct Analysis shows learners to be active in seeking corrective information in the classroom setting not only from peer partners but also from the teacher They are active in noticing how the teacher's utterances even when addressed to others contrast with their own and utilize corrective feedback intended for other students In addition the results show that teacher initiated corrective feedback addressed to individual learners is only one source of corrective feedback Learners are shown to be active in both teacher fronted and peer interactive settings In newer L2 teaching methodologies which focus on the use of peer interactive tasks the teacher's role has been de emphasized This book however shows how important the teacher's role is The final chapter examines how the teacher can act to maximize the benefits of peer interactive tasks through how they design tasks and present them to the class First the chapter looks at how learners use English their L1 in the classroom concluding that how teachers present activities to the class has an impact on the amount of L1 used by students during peer interaction Following up on this finding the chapter works to address questions that teachers face in lesson planning and teaching It presents a useful list of questions teachers can ask when designing peer interactive tasks in order to maximize the effectiveness of a wide variety of language learning tasks
