The Natural Background of Meaning A. Denkel, 2013-03-09 In *The Natural Background to Meaning* Denkel argues that meaning in language is an outcome of the evolutionary development of forms of animal communication and explains this process by naturalising the Locke Grice approach The roots of meaning are contained in observable regularities which are manifestations of objective connections such as essences and causal relations Denkel's particularistic ontology of properties and causation leads to a view of time that harmonises B theory with transience Time's passage he argues is a necessary condition of communication and meaning The book connects some central topics in the philosophies of language science and ontology treating them within the framework of a single theory It will interest not only professional philosophers doing research on meaning universals causation and time but also students who can consult it as a textbook examining Grice's theory of meaning

**The Natural Background of Meaning** A. Denkel, 2014-01-15 **The Natural Background of Meaning** Arda Denkel, 1999 Argues that meaning in language is an outcome of the evolutionary development of forms of animal communication and explains the process by naturalizing the Locke Grice approach Finds that the roots of meaning are contained in observable regularities which are manifestations of objective connections such as essences and causal relations Explores such implications as a view of time that harmonizes B theory with transience and the passage of time as a necessary condition for communication and meaning For practicing and advanced student philosophers grappling with questions of meaning universals causation and time Annotation copyrighted by Book News Inc Portland OR Hermeneutics and Science

The Nature of Art A. L. Cothey, 2006-09-07 Although various aesthetic themes have preoccupied many major philosophers from Plato to Goodman the central questions of the philosophy of art have remained ill defined This book gives a concise and systematic account of the leading philosophical ideas about art and aesthetics from ancient times to the present day and goes on to propose a new theory of aesthetic satisfaction and artistic abilities

**Proto-Phenomenology and the Nature of Language** Lawrence J. Hatab, 2017-05-05 How is it that sounds from the mouth or marks on a page which by themselves are nothing like things or events in the world can be world disclosive in an automatic manner In this fascinating and important book Lawrence J Hatab presents a new vocabulary for Heidegger s early phenomenology of being in the world and applies it to the question of language He takes language to be a mode of dwelling in which there is an immediate direct disclosure of meanings and sketches an extensive picture of proto phenomenology how it revises the posture of philosophy and how this posture applies to the nature of language Representational theories are not rejected but subordinated to a presentational account of immediate disclosure in concrete embodied life The book critically addresses standard theories of language such that typical questions in the philosophy of language are revised in a manner that avoids binary separations of language and world speech and cognition theory and practise realism and idealism internalism and externalism

Overcrowded Roberto Verganti, 2017-02-03 A more powerful innovation which seeks to discover not how things work but why we need things The standard text on innovation advises would be innovators to conduct creative brainstorming sessions and seek input from outsiders users or communities This kind of innovating can be effective at improving products but not at capturing bigger opportunities in the marketplace In this book Roberto Verganti offers a new approach one that does not set out to solve existing problems but to find breakthrough meaningful experiences There is no brainstorming which produces too many ideas unfiltered but a vision subject to criticism It does not come from outsiders but from one person s unique interpretation The alternate path to innovation mapped by Verganti aims to discover not how things work but why we need things It gives customers something more meaningful something they can love Verganti describes the work of companies including Nest Labs Apple Yankee Candle and Philips Healthcare that have created successful businesses by doing just this Nest Labs for example didn t create a more advanced programmable thermostat because people don t love to program their home appliances Nest s thermostat learns the habits of the household and bases its temperature settings accordingly Verganti discusses principles and practices methods and implementation The process begins with a vision and proceeds through developmental criticism first from a sparring partner and then from a circle of radical thinkers then from external experts and interpreters and only then from users Innovation
