Natural Contract:

The Natural Contract Michel Serres, 1995 Meditations on environmental change and the necessity of a pact between Earth and its inhabitants A Multidisciplinary Actology Malcolm Torry, 2025-07-15 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition understands reality as action in changing patterns Actological Readings in Continental Philosophy read a number of continental philosophers through this lens An Actology of the Given explored the concepts of the gift givenness and giving in the light of reality understood as action in changing patterns An Actological Metaphysic treated a variety of metaphysical and cosmological concepts in the light of reality understood as action in changing patterns An Actological Theology asked what Christian theology looks like when understood actologically Mark's Gospel An Actological Reading was what it says it is This seventh book in the series A Multidisciplinary Actology fills some important gaps by understanding language the humanities ethics mathematics the natural sciences the social sciences psychology politics and organizational behavior actologically that is with reality understood as action in changing patterns **EcoLaw** Margaret Davies, 2022-05-01 This book reimagines law as ecolaw The key insight of ecological thinking that everything is connected to everything else at least on the earth and possibly in the cosmos has become a truism of contemporary theory Taking this insight as a starting point for understanding law involves suspending theoretical certainties and boundaries It involves suspending theory itself as a conceptual project and practicing it as an embodied and material project Although an ecological imagining of law can be metaphorical and can be highly imaginative and suggestive this book shows that it is also literal Law is part of the material everything that is connected to everything else This means that once the previous certainties of legal thinking have been dismantled it is after all possible to think of law as natural as embedded in and emergent from a normative biophysical nature The book proposes that there exists a natural *nomos* animals plants and Earth systems that produce their own values and norms from which human norms and laws emerge This book then proposes a new way to understand law and pursues specific arguments to demonstrate the feasibility of law as ecolaw Drawing inspiration from current trends in the post humanities socioecological thought and developments across the natural sciences in their specific intersections with humanities and social science disciplines this book will appeal both to legal theorists and to others with interests in these areas *Ecocritics and Ecoskeptics* Jonathan F. Krell, 2020 Ecocritics and Ecoskeptics examines environmental themes and questions about the evolving relationship between humans and animals in nine modern and contemporary French novels Considering arguments from both environmentalists and ecoskeptics it concludes that far from distancing itself from humanism as it often has environmentalism must embrace an inclusive and ecological humanism **The Future of Values** Binde, 2004 This volume brings together about 50 scientists and researchers from the four corners of the world to redefine and anticipate tomorrow's values and reflect on the direction these values may lead humanity Publisher's description *French 'Ecocritique'* Stephanie Posthumus, 2017-01-01 Porous

Becomings Andreas Bandak, Daniel M. Knight, 2024-02-23 The contributors to Porous Becomings draw on the work of French philosopher of science Michel Serres 1930 2019 to show how it opens new pathways for anthropological knowledge

Handbook of Research on the Platform Economy and the Evolution of E-Commerce Ertz, Myriam, 2021-10-15 In the past two decades research on electronic commerce and platforms has thrived Tremendous academic research has been conducted on this specific concept Over the last decade with the rise of applications and mobile technology that stream of research has extended to the collaborative economy more colloquially known as the sharing economy The commonality between e commerce and collaborative consumption being that they both occur online and rely predominantly on platforms The Handbook of Research on the Platform Economy and the Evolution of E Commerce is a comprehensive reference book offering a holistic perspective of the platform economy by connecting the e commerce and collaborative economy streams into a common framework As such this integrated perspective offers a clearer understanding of the key trends in research and in managerial action as well as an agenda for future studies and practice This handbook emphasizes how the digital transition will create an increased merging between physical and digital activities as well as the challenges and opportunities pertaining to this trend Covering topics including sharing economy Marketing 4 0 and digital applications this book is essential for marketers managers executives students researchers and academicians Earth Summit Ethics J. Baird

Callicott, Fernando J. R. da Rocha, 1996-08-23 On the eve of the 1992 Earth Summit in Rio de Janeiro Fernando J R da Rocha challenged environmental philosophers to suggest and develop effective ways in which universities might engender ecological literacy and environmental ethics The result was a preconference held in Porto Alegre Brazil whose aim was to put the summit in philosophical perspective influence its outcome and chart a new course linking environment and ethics through university education This book is an outgrowth of the Porto Alegre conference and the international environmental philosophers and educators represented here inaugurate a constructive dialogue that will continue well into the twenty first century Among the contributors to the volume are environmental philosophers Andrew Brennan J Baird Callicott Fernando J R da Rocha and Holmes Ralston III and education theorists Peter Madsen and John Lemons In addition the book introduces English language readers to the work of French philosopher Catherine Larrere Spanish philosopher Nicholas Sosa and Brazil s radical former Secretary for the Environment and deep ecologist Jose Lutzenberger *Federal Power Commission Reports* United States. Federal Power Commission, 1973

The Constitution of the United Kingdom of Great Britain and Ireland, Civil and Ecclesiastical, Etc Francis PLOWDEN (LL.D.), 1802 *The Ninth Amendment: Key to Understanding the Bill of Rights* Duane L Ostler, 2014-10-08 This book explains how the Ninth Amendment is the key to understanding rights in the United States The founders created the Ninth Amendment to protect unlisted natural law rights as they were understood in their day This amendment was never intended to allow future generations to create new rights Rather it was to safeguard the morality and natural rights of the founding generation **Divided Natures** Kerry H Whiteside, 2002-02-01 In

this book Kerry Whiteside introduces the work of a range of French ecological theorists to an English speaking audience He shows how thinkers in France and in English speaking countries have produced different strains of ecological thought and suggests that the work of French ecological theorists could lessen pervasive tensions in Anglophone ecology Much of the theory written in English is shaped by the debate between anthropocentric ecologists who contend that the value of our nonhuman surroundings derives from their role in fulfilling human interests and ecocentric ecologists who contend that the nonhuman world holds ultimate value in and of itself This debate is almost nonexistent among French theorists who tend to focus on the processes linking nature and human identity Whiteside suggests that the insights of French theorists could help English language theorists to extricate themselves from endless debates over the real center of nature s value Among the French theorists discussed are Denis de Rougemont Denis Duclos Ren Dumont Luc Ferry Andr Gorz Félix Guattari Bruno Latour Alain Lipietz Edgar Morin Serge Moscovici and Michel Serres The English language theorists discussed include John Barry Robyn Eckersley Robert Goodin Tim Hayward Holmes Rolston III and Paul Taylor

Federal Energy Regulatory Commission Reports United States. Federal Energy Regulatory Commission, **The Church Eclectic** ,1902 **Federal Register** ,1990-02 *The Cambridge Companion to Postmodernism* Steven Connor,2004-07-15 The Cambridge Companion to Postmodernism offers a comprehensive introduction to postmodernism The Companion examines the different aspects of postmodernist thought and culture that have had a significant impact on contemporary cultural production and thinking Topics discussed by experts in the field include postmodernism s relation to modernity and its significance and relevance to literature film law philosophy architecture religion and modern cultural studies The volume also includes a useful guide to further reading and a chronology This is an essential aid for students and teachers from a range of disciplines interested in postmodernism in all its incarnations Accessible and comprehensive this Companion addresses the many issues surrounding this elusive enigmatic and often controversial topic Francis Bacon of Verulam Kuno Fischer,2025-07-07 Reprint of the original first published in 1857 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage

Responsibility, Ethics and Legitimacy of Corporations Jacob Dahl Rendtorff,2009 Business ethics corporate social responsibility corporate citizenship values driven management corporate governance and ethical leadership are necessary horizons for the legitimacy of corporations in the process of globalization Based on hermeneutics and institutional analysis this book discusses the place of values in corporations and the role of ethics in management With the theories of business ethics as a starting point it is possible to propose a vision of the good citizen corporation The book presents theories concepts of responsibility for stakeholder justice and basic ethical principles of respect for autonomy dignity integrity and vulnerability This is the foundation for an analysis of the ethical relations to internal and external constituencies of the firm i e shareholders owners investors management employees consumers and local community The interaction with the

environment is further analyzed with a focus on ethical principles as the basis for sustainability This investigation culminates with the conceptualization of the firm as a collective and institutional moral agent The content also includes analysis of concrete political developments in the US Europe and the United Nations Finally the book provides a framework for a new corporate strategy based on global business ethics **Access to International Justice** Patrick Keyzer,Vesselin

Popovski,Charles Sampford,2014-11-20 There is much debate about the scope of international law its compatibility with individual state practice its enforceability and the recent and limited degree to which it is institutionalized This collection of essays seeks to address the issue of access to justice the related element of domestic rule of law which does not yet figure significantly in debates about international rule of law Even in cases in which laws are passed institutions are present and key players are ethically committed to the rule of law those whom the laws are intended to protect may be unable to secure protection This is an issue in most domestic jurisdictions but also one which poses severe problems for international justice worldwide The book will be of interest to academics and practitioners of international law environmental law transitional justice international development human rights ethics international relations and political theory
