Religion is one of the most powerful forces running through human history and although often presented as a force for good its impact is frequently violent and divisive This provocative work brings together cutting edge research from both evolutionary and cognitive psychology to help readers understand the psychological structure of religious morality and the origins of religious violence Introduces a fundamentally new approach to the analysis of religion in a style accessible to the general reader Applies insights from evolutionary and cognitive psychology to both Judaism and Christianity and their texts to help understand the origins of religious violence Argues that religious violence is grounded in the moral psychology of religion Illustrates its controversial argument with reference to the 9 11 terrorist attacks and the response to the attacks from both the terrorists and the President Suggests strategies for beginning to counter the divisive aspects of religion Discusses the role of religion and religious criticism in the contemporary world Argues for a position sceptical of the moral authority of religion while also critiquing the excesses of the new atheists for failing to appreciate the moral contributions of religion Awarded Honourable Mention 2010 Prose Awards [Humanistic Wellbeing](#) Joar Vittersø, 2025-02-12 This open access book seeks to change the way we think about happiness and the good life It starts ambitiously by exploring how the biological question What is life can be integrated with the philosophical question What is good It ends with a radical idea for how scientific reasoning can include a value based theory of the good life Anchored in basic knowledge about human nature the new humanistic theory of wellbeing suggests that a life is good to the extent that it allows us to perform our humanness well The theory further defines a well performed humanness as the fulfilment of three universal human needs the need for stability the need for change and the need to and for care To reach this standpoint the author critically examines major concepts in the wellbeing literature such as values happiness life satisfaction affect hedonia eudaimonia and the good life Based on these reviews the author argues that a science of wellbeing cannot be strictly descriptive and value free A life

should not be considered good only because it feels good or is thought of as good for the person living it A good life must also be committed to a universal morality Therefore the humanistic theory of wellbeing suggests that it is good to like one's life but even better to like it for the right reasons

Constructing Irregular Theology Paul Chung, 2009-10-26 The project of constructing Asian irregular theology in East Asian perspective based on life word of Bamboo and social political reality of minjung embraces Dr Chung's cross cultural existence as he develops his long standing interest and expertise in Christian minjung theology in new ways with the image of bamboo as a symbol for the theological perspective of grass roots marginality Using the ancient Chinese story The Seven Sages of the Bamboo Grove Dr Chung engages with Christian eschatological discourse to support an aesthetical utopian theological ethics that is opposed to an ethics concerned with legitimization of a socio economic status quo In addition Dr Chung's develops his deep commitment to the Lutheran theology of the cross and the suffering Christ through the Buddhist concept of dukkha suffering to create in the end a genuinely East Asian contextual theology

Broad's Critical Essays in Moral Philosophy (Routledge Revivals) David Cheney, 2013-10-18 The ideas of C D Broad have affected the work of moral philosophers throughout the twentieth century to the present day First published in 1971 this edited volume contains Broad's best essays on the philosophical problems of Ethics mostly written and published between 1914 and 1964 Among the essays are Broad's important critiques of G E Moore's ethical theory his lecture entitled Determinism Indeterminism and Libertarianism and other pieces discussing topics as broad as Conscience Egoism and Free Will This reissue serves as an important companion to Broad's other works a number of which have also been reissued within the Routledge Library Editions series and will be invaluable to students interested in Broad's theories and twentieth century philosophical thought

The Oxford Handbook of Moral Realism Paul Bloomfield, David Copp, 2023 Morality seems to play a special role in human life distinct from conventional norms like those of etiquette or simple preferences based on subjective tastes There are various theories of the foundations of morality some of which treat morality as subjective in an important way Moral realism is however a family of theories that take morality to have an objective factual basis such that morality is not up to us and is not under our control The contributions in this Oxford Handbook explore the central ideas and themes constituting moral realism and defend particular views about it

The Metaethics of Constitutional Adjudication Bosko Tripkovic, 2018-01-11 In this book Bosko Tripkovic develops a theory of value based arguments in constitutional adjudication In contrast to the standard question of constitutional theory that asks whether the courts get moral answers wrong it asks a more fundamental question of whether the courts get the morality itself wrong Tripkovic argues for an antirealist conception of value one that does not presuppose the existence of mind independent moral truths and accounts for the effect this ought to have on existing value based arguments made by constitutional courts The book identifies three dominant types of value based arguments in comparative constitutional practice arguments from constitutional identity common sentiment and universal reason and explains why they fail as self

standing approaches to moral judgment It then suggests that the appropriate moral judgments emerge from the dynamics between practical confidence which denotes the inescapability of the self and the evaluative attitudes it entails and reflection which denotes the process of challenging and questioning these attitudes The book applies the notions of confidence and reflection to constitutional reasoning and maintains that the moral inquiry of the constitutional court ought to depart from the emotive intuitions of the constitutional community and then challenge these intuitions through reflective exposure to different perspectives in order to better understand and develop the underlying constitutional identity The book casts new light on common constitutional dilemmas and allows us to envisage new ways of resolving them *The Moral Foundation of Economic Behavior* David C. Rose,2011-11-25 It then identifies specific characteristics that moral beliefs must have for the people who possess them to be regarded as trustworthy *Evolutionary Debunking Arguments* Diego E. Machuca,2022-09-09 Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains *Out of Eden* David P. Barash,2016 Out of Eden explores the intersection of human polygamous tendencies and the monogamous expectations of Western society through evolutionary biology **The Galileo Connection** Charles E. Hummel,1986-02-17 Telling the fascinating stories of Copernicus Kepler Galileo Newton and Pascal Charles E Hummel provides a historical perspective on the relationship between science and Christianity
