Nostradamus and Other Prophets and Seers Jo Durden-Smith,2007 **Nostradamus and Other Prophets and Seers** Jo Durden Smith,2022-08-30 *The Mammoth Book of Prophecies* Damon Wilson,2003 Nostradamus the most prolific and accurate of all the prophets is the primary focus of this in depth look at some of the chillingly accurate prophecies and predictions of catastrophe Here he is found alongside Mother Shipton the Brahan Seer pagan prophecy and police prophets There is a special focus on three predictions that all too alarmingly came true the sinking of the Titanic the 1967 Silver Bridge collapse in West Virginia and the events in New York on 11 September 2002 Consulting psychics is neither as far fetched nor as rare as it sounds however reluctant most of us are to admit it And public interest in prophecy and prophets increases dramatically in times of international tension In the years leading up to the Second World War in the months after the Cuban missile crisis following the first manned landing on the moon interest in prophecy was at an all time high as people look for clues to the future As indeed we are still doing today

Douglas Kenyon, Have we lost our way Lost our psychic sense of smell The conventional notion of the human psyche is that it is a product of our mass culture and we are conditioned to see and understand only the stimulus that is provided to it However there is a deeper process at work something coming from our innate ability to discern greater truth Tapping into this subconscious truth detector is key in determining whether we buy into the premises of the many mainstream truths presented to us in popular culture and popular science In the quest to reestablish that universal connection editor J Douglas Kenyon has culled from the pages of Atlantis Rising magazine this collection of 34 concise and well illustrated articles by world class philosophers and theoreticians who offer thought provoking insights from the lost secrets of ancient and primordial wisdom Featuring Secrets of the Alchemists by Joseph Robert Jochmans The Psi in CSI by Barbara Jason Can We See into the Future by Robert M Schoch Psychokinesis by Robert M Schoch The Superhero Factor by Len Kasten Deathbed Visitations by Michael Tymn War and Reincarnation by John Chambers Time Travel Evidence by Joseph Robert Jochmans The Case for Immortality by Patrick Marsolek *Fin de Siecle and Other Essays on America and Europe* Walter Laqueur, 2018-01-18 The essays collected in *Fin de Si cle and Other Essays on America and Europe* cover the political and cultural spectrum of our time specifically the rise fall and reemergence of radical movements of what was once called the extreme left and right If the essays have a common denominator it is that they do not join in the chorus of rejoicing after the end of the cold war When the Soviet Empire collapsed and the cold war came to an end there was a general celebration similar to the joy expressed after World Wars I and II Walter Laqueur in contrast to many of his peers realized that Russia's and Eastern Europe's road to freedom would be at best protracted and arduous with many setbacks And as he shows ten years after the reforms in the communist world power such as it is is again in the hands of the communists or of nationalists closely cooperating with communists While they may not be old Stalinists their style remains authoritarian and no one can say for certain whether the conversion to democracy is lasting Throughout Europe the extreme right has reemerged in force in France Italy Russia and Austria these parties are among the strongest While only a few years have passed since the demise of communism there is already nostalgia among many in Russia with regard to the good old days when vodka was cheap and order prevailed in the streets In the West the positive aspects of Nazism and fascism are being rediscovered One might argue that it should have been obvious that the end of the cold war would in many ways create new and greater uncertainties rather than a new world order in international affairs In certain nations including the United States there has been an unmistakable trend toward isolationism How to explain such attitudes In a brilliant assemblage of published and hitherto unpublished essays Laqueur brings his concerns about these issues in a post cold war environment Essays include The Long Way to Europe Russian Nationalism In Praise of Menshevism The End of the Cold War Feuchtwanger and Gide and The Empire Strikes Out Laqueur includes a profile of Andrei Sakharov who played such a crucial role in the movement of

Burrows,2007-04-01 Using Space to Save Earth Veteran science journalist William E Burrows offers a bold new mission for the U S space program to protect the Earth from the ever growing number of perils that threaten our way of life and even our very survival We are living through one of the most dangerous times in human history Nuclear chemical and biological weapons technology are proliferating and missile technology is falling into more and more hands Extreme natural disasters like hurricanes floods fires and earthquakes are becoming increasingly costly not only in dollars but in lives as population expands Environmental crises threaten to provoke massive famines and widespread social collapse Asteroids the size of battleships streak within striking distance of the earth every year One strategy offers the best hope of protecting us from all of these dangers a revitalized national space program that coordinates efforts in global defense in environmental protection in communications and in military security *The Survival Imperative* offers an impassioned argument for this bold initiative To demonstrate the urgency of his cause Burrows presents a vivid scenario an impact by a

moderately large asteroid that triggers a series of nuclear exchanges environmental devastation and the slow disintegration of civilization And he examines the existing space program from the heady days of the Moon landing through the political compromises that have characterized the history of NASA in the 35 years following our retreat from the Moon Most of all Burrows warns that the primary obstacle to achieving a true planetary defense program is not financial or scientific but social an unwillingness to acknowledge the urgency of the crisis and to take the political risks needed to address it The question says Burrows is not whether we can do it but whether we will act before it s too late At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied
