In Detail

Designed to create next generation apps Google's Dart offers a much more robust framework and also supersedes JavaScript in several aspects. Familiar yet innovative compact yet scalable it blows away the accumulated JavaScript legacy limitations. Dart was designed for great tool ability and developer productivity allowing you to create better application faster than before Google chose it for their billion dollar advertising business and you have its power for your projects too.

The first module will introduce you the Dart language starting from its conception to its current form and where it headed is through engaging substantial practical projects. You will be taken through building typical applications and exploring the exciting new technologies of HTML5.

The second module will show you how to add internationalization support to your web applications and how i18n and i10n access can be embedded into your code to design applications that can be localized easily. You will be shown how to organize client to server communication and how different HTML5 features can be used in Dart. Finally this module will show you how you can store data locally break the storage limit and prevent security issues in your web application.

The third module is a pragmatic guide that will increase your expertise in writing all kinds of applications including web apps scripts and server side apps. It provides rich insights on how to extend your Dart programming skills. Altogether this course provides you the power to create powerful applications with Dart without worrying about your knowledge leading to you having to make compromises to the end product.

This Learning Path has been curated from three Packt products: *Dart By Example* By Davy Mitchell, *Mastering Dart* By Sergey Akopkokhyants, *Dart Cookbook* By Ivo Balbaert.
