Managing Government Property Assets Olga Kaganova,2006 Governments own a vast array of real property from large stretches of land to public housing projects from water distribution systems and roads to office buildings Typically management of public property is highly fragmented with responsibility for each type of asset falling within a different agency or bureaucracy In almost all countries different classes of property are managed according to their own rules often following traditional practices rather than any assessment of what type of management is appropriate Over the past decade however a new discipline has emerged that examines this important component of public wealth and seeks to apply standards of economic efficiency and effective organizational management Managing Government Property Assets reviews and analyzes this recent wave of activity The authors draw upon a wide variety of national and local practices both in countries that have been leaders in management reforms and in countries just beginning to wrestle with the problem This comparison reveals that the issues of public property management are surprisingly similar in different countries despite striking differences in institutional contexts and policy solutions

standard preservation and rejuvenation options available to a real estate portfolio manager

What is Asset Management

People are more accustomed to thinking about asset management of money or stocks or a package of annuity and savings accounts Real estate asset management is a slower longer term process The properties in your portfolio especially in affordable housing have life cycles of 30 40 or infinite time periods Most nonprofit owners are not interested in selling to capture any appreciation on their properties Their goal is to provide housing for the foreseeable future as long as the asset can perform Many nonprofits and mid size property owners do not have a dedicated asset manager It is extraordinarily important that someone take on that long term analysis be it for 10% 25% or 50% of a full time employee The next step is to benchmark your properties How are you doing compared to the world Not just on straight bottom line consideration but how about in human services Have you saved sufficient money to replace the roof or add the sprinklers that will be required at the next renovation The Asset Management Handbook provides well established objective criteria for 25 different variables We ve seen participants in the asset management practicum expand that up to 40 variables to analyze on an annual basis We ll see how benchmarking and risk ranking of your portfolio are essential first steps in establishing its viability and needs

Capital Needs and Their Funds

In this meat of the manual we walk you through essential policies that define how your properties will operate over the long term We show how policies made by lenders bankers and other short term partners can be self destructive and damaging to property owners holding for the long term First example of the dichotomy the lender is suggesting the reserve is sufficient when two years after their loan matures the property will require 4 million of replacement expenditures This is fine for investment property held for resale You just flip it and get down the road Most affordable housing owners do not consider selling the property as a positive outcome Even if you ve never performed a property inspection before the Handbook offers you easy methods of counting and sorting components into well established remaining economic lives Then it is on to the massive spreadsheet that calculates the future need and the various waves in which it will appear Exterior paint first then roofs windows and doors and kitchens and baths follow and then it starts all over again Most capital needs assessments performed by third parties make financial assumptions that are untenable Their interest rates on earnings are overstated and their inflation rate on the components are generally understated leaving you with significant shortfalls even if you have escrowed according to directions We will keep you out of that trap showing you the realistic funds that are required and the time periods when the inevitable refinancing windows will occur

Risk and Solutions

In the final section we evaluate your primary risks Which properties should you address first Which properties have the strength and energy to function on their own Then what should you do about it Refinance Renegotiate Value engineer Raise rents In the foot race the runner is always caught by the tsunami of required replacements It is just a fact of the business that every 20 to 30 years you ve got to re invest a significant amount of money

Public Sector Property Asset Management Malawi Ngwira, David Manase, 2016-03-22 In many public sector organisations there has been little or no

adoption of a proactive asset management strategy Where an extensive property portfolio exists this can result in poor overall utilisation of the portfolio exemplified by excessive vacant property or properties not being put to best use In such situations there is a risk that the building stock deteriorates more rapidly than expected leading to expensive maintenance and repair charges Lack of a proactive asset management strategy will impact on the services delivered by such organisations Public Sector Property Asset Management covers all aspects of asset management in the public sector including the overall concept the development of asset management strategies and the implementation of asset management practices It evaluates asset management strategies processes and practices to show how effective management of property assets support business activities or service delivery functions The reader will understand the importance of improving decision making through the recognition of all costs of owning and operating those assets throughout their lifecycle leading to improved business process activities or service delivery functions which greatly assist in meeting the social and economic objectives of such organisations Written for all practitioners currently involved in asset management the book will also be useful in the university environment to those teaching researching or learning about asset management in the public sector
