America strikingly different from what it was just forty years ago Gone is the idealized vision of a two parent father supported Ozzie and Harriet society In its place is an America of varied races and ethnic backgrounds where families take on many forms and mothers frequently work outside the home Drawing on a definitive analysis of the past four U S censuses author Reynolds Farley reveals a country that offers new opportunities for a broader spectrum of people while at the same time generating frustration and apprehension for many who once thought their futures secure The trends that have so transformed the nation were kindled in the 1960s a watershed period during which many Americans redefined their attitudes toward the rights of women and blacks The New American Reality describes the activism federal policymaking and legal victories that eliminated overt racial and sexual discrimination But along with open doors came new challenges Divorce and out of wedlock births grew commonplace forcing more women to raise children alone and despite improved wages increasing their chances of falling into poverty Residential segregation inadequate schooling and a particularly high ratio of female headed families severely impaired the economic progress of African Americans many of whom were left behind in declining central cities as businesses migrated to suburbs A new generation of immigrants from many nations joined the ranks of those working to support families and improve their prospects and rapidly transformed the nation s ethnic composition In the 1970s unprecedented economic restructuring on a global scale created unexpected setbacks for the middle class The long era of postwar prosperity ended as the nation s dominant industry shifted from manufacturing to services competition from foreign producers increased interest rates rose and a new emphasis on technology and cost cutting created a demand for more sophisticated skills in the workplace The economic recovery of the 1980s generated greater prosperity for the well educated and highly skilled and created many low paying jobs but offered little to remedy the stagnant and declining wages of the middle class Income inequality became a defining feature in the economic life of America overall the rich got richer while the poor and middle class found it increasingly difficult to meet their financial demands The New American Reality reports some good news about America Our lives are longer and healthier the elderly are much better off than ever before consumer spending power has increased and minorities and women have many more opportunities But this book does not shy away from the significant problems facing large portions of the population and provides a valuable perspective on efforts to remedy them The New American Reality offers the information necessary to understand the critical trends affecting America today from how we earn a living to how and when we form families where we live and whether or not we will continue to prosper A Volume in the Russell Sage Foundation Census Series

Socio-cultural Dimensions of Reproductive Child Health Rabindra Nath Pati, 2003 In This Book Socio Cultural Dimensions Of Reproductive Health Have Been Critically Analysed Eminent Social Scientists And Demographers Of India Have Contributed Empirical Articles On Various Issues Of Reproductive Health Of Women Natural Law, Science, and the Social Construction of Reality Bernie Koenig, 2004 Natural Law Science and the Social Construction of Reality looks at changes in knowledge and the relationship to values from the

modern era to today Author Bernie Koenig examines Newton s influence on Locke and Kant how Kant influenced Darwin and Freud and the implications of their work for both anthropology and moral theory **Of Death and Birth** Barbara Schuler,2009 Scholars of popular Hindu religion in India have always been fascinated by oral texts and rituals but surprisingly only few attempts have as yet been made to analyse the relationship between rituals and texts systematically This book contributes to the filling of this gap Focusing on the dynamics of a local non Brahmanical ritual its modular organisation and inner logic the interaction between narrative text and ritual and the significance of the local versus translocal nature of the text in the ritual context the study provides a broad range of issues for comparison It demonstrates that examining texts in their context helps to understand better the complexity of religious traditions and the way in which ritual and text are programmatically employed The author offers a vivid description of a hitherto unnoticed ritual system along with the first translation of a text called the Icakkiamman Katai IK Composed in the Tamil language the IK represents a substantially longer and embellished form of a core versio which probably goes as far back as the seventh century C E Unlike the classical source this text has been incorporated into a living tradition and is being constantly refashioned A range of text versions have been encapsulated in the form of a conspectus which will shed light on the text s variability or fixity and will add to our knowledge of bardic creativity Includes a film by the author on DVD
