Modern Science Fiction: A Critical Analysis James Gunn, Michael R. Page, 2018-05-25 James Gunn one of the founding figures of science fiction scholarship and teaching wrote in 1951 what is likely the first master's thesis on modern science fiction. Portions were in the short-lived pulp magazine *Dynamic* but it has otherwise remained unavailable. Here in its first full publication the thesis explores many of the classic Golden Age stories of the 1940s and the critical perspective that informed Gunn's essential genre history *Alternate Worlds* and his anthology series *The Road to Science Fiction*. The editor's introduction and commentary show the historical significance of Gunn's work and its relevance to today's science fiction studies.

Saving the World Through Science Fiction Michael R. Page, 2017-02-28 One of the major figures in science fiction for more than sixty years James Gunn has been instrumental in making the genre one of the most vibrant and engaging areas of literary scholarship. His genre history *Alternate Worlds* and his *The Road to Science Fiction* anthologies introduced countless readers to science fiction. He founded the Gunn Center for the Study of Science Fiction in 1982. But Gunn has also been one of the genre's leading writers. His classic novels *Star Bridge* with Jack Williamson, *The Joy Makers*, *The Immortals*, and *The Listeners* helped shape the field. Now in his nineties he remains a prominent voice. His forthcoming novel is *Transformation*. Drawing on materials from Gunn's archives and personal interviews with him, this study is the first to examine the life career and writing of this science fiction grandmaster.

Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-12-10 Despite the growing importance of economics in our lives, literary scholars have long been reluctant to consider economic issues as they examine key texts. This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics, with some attention to related fields such as politics and government. Its seventeen contributors include five award-winning scholars, five science fiction writers, and a widely published economist. Three topics are covered: what noted science fiction writers like Robert A. Heinlein, Frank Herbert, and Kim Stanley Robinson have had to say about our economic and political future; how the competitive and ever-changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today; and how the scholars who examine science fiction have themselves been influenced by the economics of academia. Although the essays focus primarily on American science fiction, the traditions of Russian and Chinese science fiction are also examined. A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject.

Science Fiction, Canonization, Marginalization, and the Academy Gary Westfahl, George Slusser, 2002-01-30 Science fiction occupies a peculiar place in the academic study of literature For decades scholars have looked at science fiction with disdain and have criticized it for being inferior to other types of literature But despite the sentiments of these traditionalists many works of science fiction engage recognized canonical texts such as the Odyssey and many traditionally canonical works contain elements of science fiction More recently the canon has been subject to revision as scholars have deliberately sought to include works that reflect diversity and have participated in the serious study of popular culture But these attempts to create a more inclusive canon have nonetheless continued to marginalize science fiction This book examines the treatment of science fiction within the academy The expert contributors to this volume explore a wide range of topics related to the place of science fiction in literary studies These include academic attitudes toward science fiction the role of journals and cultural gatekeepers in canon formation and the marginalization of specific works and authors by literary critics In addition the volume gives special attention to multicultural and feminist concerns In discussing these topics the book sheds considerable light on much broader issues related to the politics of literary studies and academic inquiry
