## **Robert Delaunay Light Color:**

**Robert Delaunay; Light and Color** Gustav Vriesen, Max Imdahl, 1957 Collection of images by and writings about 20th century painter Robert Delaunay 1885 1941 who pioneered French abstractionist art *Robert Delaunay* Gustav Vriesen, 1967 **Robert Delaunay** Gustav Vriesen, 1967 *Color and Culture* John Gage, 1999 An encyclopaedic work on color in Western art and culture from the Middle Ages to Post Modernism **Robert Delaunay** Gustav Vriesen, 1969

**The New Art of Color** Robert Delaunay, Sonia Delaunay, 1978 The Delaunays efforts to ensure that their work would be perceived as they had conceived it prompted several essays and lectures numerous letters and volumes of notebooks most of which have never been translated into English The light they shed on the life and thought of this exciting period in the history of art will be invaluable to any student of modern art *The Colour of Angels* Constance Classen, 2002-01-04 The Colour of Angels uncovers the gender politics behind our attitude to the senses Using a wide variety of examples ranging from the sensuous religious visions of the middle ages through to nineteenth century art movements this book reveals a previously unexplored area of womens history *The Color of Modernism* Deborah Ascher Barnstone, 2021-12-30 One of the most enduring and pervasive myths about modernist architecture is that it was white pure white walls both inside and out Yet nothing could be further from the truth The Color of Modernism explodes this myth of whiteness by offering a riot of color in modern architectural treatises polemics and buildings Focusing on Germany in the early 20th century one of modernism s most foundational and influential periods it examines the different scientific and artistic color theories which were advanced by members of the German avant garde from Bruno Taut to Walter Gropius to Hans Scharoun German color theory went on to have a profound influence on the modern movement and Germany serves as the key case study for an international phenomenon which encompassed modern architects worldwide from le Corbusier and Alvar Aalto to Berthold Lubetkin and Lina Bo Bardi Supported by accessible introductions to the development of color theory in philosophy science and the arts the book uses the German case to explore the new ways in which color was used in architecture and urban design turning attention to an important yet overlooked aspect of the period Much more than a mere correction to the historical record the book leads the reader on an adventure into the color filled worlds of psychology the paranormal theories of sensory perception and pleasure showing how each in turn influenced the modern movement The Color of Modernism will fundamentally change the way the early modernist period is seen and discussed **Modernist Physics** Rachel Crossland, 2018-03-09 Modernist Physics takes as its focus the ideas associated with three scientific papers published by Albert Einstein in 1905 considering the dissemination of those ideas both within and beyond the scientific field and exploring the manifestation of similar ideas in the literary works of Virginia Woolf and D H Lawrence Drawing on Gillian Beer s suggestion that literature and science share the moment s discourse Modernist Physics seeks both to combine and to distinguish between the two standard approaches within the field of literature and science direct influence and the zeitgeist

The book is divided into three parts each of which focuses on the ideas associated with one of Einstein's papers. Part I considers Woolf in relation to Einstein's paper on light quanta, arguing that questions of duality and complementarity had a wider cultural significance in the early twentieth century than has yet been acknowledged and suggesting that Woolf can usefully be considered a complementary rather than a dualistic writer. Part II looks at Lawrence's reading of at least one book on relativity in 1921 and his subsequent suggestion in *Fantasia of the Unconscious* that we are in sad need of a theory of human relativity, a theory which is shown to be relevant to Lawrence's writing of relationships both before and after 1921. Part III considers Woolf and Lawrence together alongside late nineteenth and early twentieth century discussions of molecular physics and crowd psychology, suggesting that Einstein's work on Brownian motion provides a useful model for thinking about individual literary characters.
