Quenemoen, 2013-10-10 A Companion to Roman Architecture presents a comprehensive review of the critical issues and approaches that have transformed scholarly understanding in recent decades in one easy to reference volume Offers a cross disciplinary approach to Roman architecture spanning technology history art politics and archaeology Brings together contributions by leading scholars in architectural history An essential guide to recent scholarship covering new archaeological discoveries lesser known buildings new technologies and space and construction Includes extensive up to date bibliography and glossary of key Roman architectural terms **Materiality in Roman Art and Architecture** Annette Haug, Adrian Hielscher, M. Taylor Lauritsen, 2021-12-31 The focus of this volume is on the aesthetics semantics and function

of materials in Roman antiquity between the 2nd century B C and the 2nd century A D It includes contributions on both architectural spaces and their material design and objects types of artefacts that differ greatly in the way they were used perceived and loaded with cultural significance With respect to architecture the analysis of material aesthetics leads to a new understanding of the performance imitation and transformation of surfaces including the social meaning of such strategies In the case of objects surface treatments are equally important However object form a specific design category which can enter into tension with materiality comes into particular focus Only when materials are shaped do their various qualities emerge and these qualities are to a greater or lesser extent transferred to objects With a focus primarily on Roman Italy the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world

**The Building Program of Herod the Great** Duane W. Roller, 1998 Herod the Great King of Judaea from 444 B C is known as one of the world s great villains This notoriety has overshadowed his actual achievements particularly his role as a client king of Rome during Augustus s reign as emperor An essential aspect of Herod s responsibilities as king of Judaea was his role as a builder Remarkably innovative he created an astonishing record of architectural achievement not only in Judaea but also throughout Greece and the Roman east Duane W Roller systematically presents and discusses all the building projects known to have been initiated by Herod and locates this material in a broad historical and cultural context Bringing together previously inaccessible material Roller enriches our understanding of the enigmatic Herod and provides new insights into Roman architecture Herod was instrumental in the diffusion of the Augustan architectural revolution into the provinces and was the first to build outside Italy such Italian architectural forms as the basilica amphitheater villa and Italian temple Herod s legacy provided a groundwork for the architectural Romanization of the east influencing the construction of the great temple complexes and palaces so familiar from later Roman architecture Herod like Augustus himself was not only interested in architecture but also in diplomatic and financial contacts among cities of the region In addition to providing a repertorium of the building projects this study is also an exploration of international relations in the eastern Mediterranean at the beginning of the Roman imperial period *The Oxford Handbook of Greek and Roman Art and Architecture* Clemente Marconi, 2015 An innovative and up to date synopsis of the field of Greek and Roman Art and Architecture filling a genuine need in the literature **A Companion to Science, Technology, and Medicine in Ancient Greece and Rome, 2**

technology and medicine within the historical cultural and philosophical contexts of Greek and Roman society Organizes its content in two halves the first focuses on mathematical and natural sciences the second focuses on cultural applications and interdisciplinary themes 2 Volumes Technology in Transition A.D. 300-650 Luke Lavan, Enrico Zanini, Alexander Sarantis, 2008-03-31 This book is the first general work to be published on technology in Late Antiquity It seeks to survey aspects of the technology of the period and to respond to questions about technological continuity stagnation and decline The book opens with a comprehensive bibliographic essay that provides an overview of relevant literature The main section then explores technologies in agriculture production metal ceramics and glass engineering and building Papers draw on both archaeological and textual sources and on analogies with medieval and early modern technologies Reference is made not only to the periods which preceded it but to the transition to the Early Middle Ages and to the technological heritage of Late Antiquity to the Islamic world Several papers focus on Italy whilst others consider North Africa Asia Minor and the Near East

**The Oxford Handbook of Engineering and Technology in the Classical World** John Peter Oleson, 2008 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to engineering and technology This text highlights the accomplishments of the ancient societies the research problems and stimulates further progress in the history of ancient technology **Roman Architecture** Rogan Fish, Roman architecture emerged as a distinctive style that blended elements from earlier civilizations primarily Greek and Etruscan influences As Rome expanded from a small settlement into a powerful empire its architectural identity evolved incorporating new techniques and materials that allowed for grander and more functional structures The early foundations of Roman architecture set the stage for innovations that would shape the empire's urban landscape for centuries One of the most significant influences on Roman architecture came from the Etruscans a civilization that dominated central Italy before Rome's rise The Etruscans were skilled builders who introduced techniques such as the use of the arch and vault both of which would later become hallmarks of Roman engineering Etruscan temples with their high podiums and deep porches also served as models for early Roman religious structures Another major influence was Greek architecture which Romans admired and adapted to suit their needs The Greeks provided inspiration in the use of columns decorative friezes and symmetrical design elements that were later integrated into Roman temples public buildings and monuments Roman architectural development was also shaped by advancements in building materials and construction techniques The early Romans initially built using wood and mudbrick but as they refined their skills they transitioned to more durable materials like stone and concrete The introduction of concrete was a groundbreaking innovation allowing for stronger and more flexible structures Unlike the Greeks who relied heavily on marble the Romans preferred concrete for its affordability and adaptability enabling them to construct larger and more complex buildings such as amphitheaters aqueducts and domes Roman Architecture Janet DeLaine, 2024-05-09 Roman Architecture casts new light not only on many familiar monuments of the city of Rome but also

on less well known examples from across the Roman empire Rome and its empire were fundamental to the development of western architecture and its forms and motifs remain significant elements of our own built environments Roman Architecture places the varied architecture of ancient Rome from its humble apartment blocks to its grand public structures within the broader context of Roman society It takes as its starting point the writings of the Roman architect Vitruvius as one voice in a broader contemporary debate about the nature and value of architecture What did the Romans themselves think architecture was for What was built by whom and why How was architecture represented in text and image The interplay of type and variation that are the hallmark Roman architecture are here traced back to the human actions and choices from which they originated Janet DeLaine explores how the desires of patrons for novelty and individuality were met by architects and builders working within the practical constraints of available materials and the moral prescriptions of religious and social norms to create new forms Ranging from early Rome to the late empire this volume casts new light on many familiar monuments of the city of Rome but also on less well known examples from across the empire Through an examination of the key types of buildings at the heart of Roman society and their decoration it reveals the symbolic meaning of architecture in terms of competitive power displays and commemoration and it explores how architecture helped to define being Roman at different times and in different places of the empire

**Materials, Technologies and Practice in Historic Heritage Structures** Maria Bostenaru-Dan, Richard Pøikryl, Akos Török, 2009-12-15 One distinct feature of human society since the dawn of civilization is the systematic use of inorganic building materials such as natural stone unburnt and burnt soil adobe and brick inorganic binders like lime and cement and reinforced concrete Our heritage has cultural architectural and technological value and preserving such structures is a key issue today Planners and conservation scientists need detailed site surveys and analyses to create a database that will serve to guide subsequent actions One factor in this knowledge base is an understanding of how historic materials were prepared and the crucial properties that influence their long term behaviour Any assessment of the way such materials perform must crucially be based on an understanding of the methods used for their analysis The editors here add to the knowledge base treating the materials used in historic structures their properties technology of use and conservation and their performance in a changing environment The book draws together 18 chapters dealing with the inorganic materials used in historic structures such as adobe brick stone mortars concrete and plasters The approach is complex covering material characterisation as well as several case studies of historic structures from Europe including Germany Ireland Italy Poland Portugal Scotland Slovenia and Spain and the My Son Temples in Vietnam An equally important component of the book covers the analysis of materials together with a treatment of sustainable development such as the protection of monuments from earthquakes and climate change The authors are all leading international experts drawn from a variety of backgrounds architecture civil engineering conservation science geology and material science with close links to professional organisations such as ICOMOS or universities and research
