Romances With Schools A Life Of Education:

Romances with Schools John I. Goodlad, 2016-07-15 John I Goodlad has been an unflagging voice for humanistic ideals in education for more than six decades and has helped reframe the modern discourse on the role and function of schools For Goodlad the goal of public education is to help children become free and full participants in a democratic society by instilling them with a love of learning and a sense of civic responsibility goals that are incompatible with our present system of schooling that teaches to standardized tests In *Romances with Schools* John Goodlad steps out from behind the public persona of distinguished scholar and advocate for public schooling to offer a moving personal account of a life devoted to educating the young He deftly interweaves fascinating personal details with reflections on many of the larger issues in education that he has explored throughout his career John s early encounters with formal schooling began just before the Great Depression in Canada with the humble North Star School From there we are taken through sixty plus years in education starting with John s first teaching job as the sole instructor of a one room schoolhouse through his years as an education activist dean of the UCLA Graduate School of Education and national voice for educational renewal Along the way he treats us to vivid characterizations of the men women and above all children who shaped him as a person and inspired his thinking on education *Romances with Schools* is both a poignant memoir and a persuasive argument for the need to renew public education to fit the demands of a free society Stephen Goodlad John s son has written a moving Prologue to the book that provides behind the scenes insight into John s life An Epilogue by Roger Soder a long time colleague places John s work of school renewal in the context of political change

Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and

students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily **America's Public Schools** William J. Reese,2011-04-01 In this update to his landmark publication William J Reese offers a comprehensive examination of the trends theories and practices that have shaped America s public schools over the last two centuries Reese approaches this subject along two main lines of inquiry education as a means for reforming society and ongoing reform within the schools themselves He explores the roots of contemporary educational policies and places modern battles over curriculum pedagogy race relations and academic standards in historical perspective A thoroughly revised epilogue outlines the significant challenges to public school education within the last five years Reese analyzes the shortcomings of No Child Left Behind and the continued disjuncture between actual school performance and the expectations of government officials He discusses the intrusive role of corporations economic models for enticing better teacher performance the continued impact of conservatism and the growth of home schooling and charter schools Informed by a breadth of historical scholarship and based squarely on primary sources this volume remains the standard text for future teachers and scholars of education **School Life** ,1957

from 1838 to 1883 Arthur N Howard,2024-01-23 Reprint of the original first published in 1883 Scientists in the Classroom J. Rudolph,2002-05-02 During the 1950s leading American scientists embarked on an unprecedented project to remake high school science education Dissatisfaction with the soft school curriculum of the time advocated by the professional education establishment and concern over the growing technological sophistication of the Soviet Union led government officials to encourage a handful of elite research scientists fresh from their World War II successes to revitalize the nations science curricula In Scientists in the Classroom John L Rudolph argues that the Cold War environment long neglected in the history of education literature is crucial to understanding both the reasons for the public acceptance of scientific authority in the field of education and the nature of the curriculum materials that were eventually produced Drawing on a wealth of previously untapped resources from government and university archives Rudolph focuses on the National Science Foundation supported curriculum projects initiated in 1956 What the historical record reveals according to Rudolph is that these materials were designed not just to improve American science education but to advance the professional interest of the American scientific community in the postwar period as well *Journal of Education* ,1883

The romance of missions, or, Inside views of life and labor in the land of Ararat Maria Abigail West,1876 *The Romance of Missions; Or, Inside Views of Life and Labor, in the Land of Ararat. ... the writings of Klein Winnicott and their colleagues French analysts e g Piera Aulagnier Didier Anzieu Laurent Danon Boileau Fran oise Dolto Maud Mannoni and Catherine Mathelin and Italian infant child analyst Alessandro Piontelli This work is valuable but often inaccessible to school professionals because the writing is somewhat specialized and because there is no tradition of teaching such work in professional preparation in those fields This collection is theoretically grounded in that the authors share a commitment to valuing children s emotions and understand the usefulness of psychoanalytic approaches for enhancing children s lives It is laden with examples to invite into this discussion those students and professionals who value these ideas but for whom this book may be their first introduction to progressive educational ideals and psychodynamic ways of working with children Psychodynamic Perspectives on Working with Children Families and Schools provides an introductory volume to open the door to the possibility of introducing psychodynamic frameworks to education and human service professors and school professionals and professionals working with children The Journal of Education ,1908
