Romantic Weather Arden Reed,1983 **Rhetorical Traditions and British Romantic Literature** Don H.

Bialostosky, Lawrence D. Needham,1995 The contributors are Stephen C Behrendt Don H Bialostosky Jerome Christensen Richard W Clancey Klaus Dockhorn James Engell David Ginsberg Bruce E Graver Scott Harshbarger Theresa M Kelley J Douglas Kneale John R Nabholz Lawrence D Needham Marie Secor Nancy S Struever Leslie Tannenbaum and Susan J Wolfson **Coleridge and Shelley** Sally West,2016-05-23 Sally West's timely study is the first book length exploration of Coleridge's influence on Shelley's poetic development Beginning with a discussion of Shelley's views on Coleridge as a man and as a poet West argues that there is a direct correlation between Shelley's desire for political and social transformation and the way in which he appropriates the language imagery and forms of Coleridge often transforming their original meaning through subtle readjustments of context and emphasis While she situates her work in relation to recent concepts of literary influence West is focused less on the psychology of the poets than on the poetry itself She explores how elements such as the development of imagery and the choice of poetic form often learnt from earlier poets are intimately related to poetic purpose Thus on one level her book explores how the second generation Romantic poets reacted to the beliefs and ideals of the first while on another it addresses the larger question of how poets become poets by returning the work of one writer to the literary context from which it developed Her book is essential reading for specialists in the Romantic period and for scholars interested in theories of poetic influence The New Cambridge Companion to Coleridge Tim Fulford,2022-11-24 This new collection enables students and general readers to appreciate Coleridge's renewed relevance 250 years after his birth An indispensable guide to his writing for twenty first century readers it contains new perspectives that reframe his work in relation to slavery race war post traumatic stress disorder and ecological crisis Through detailed engagement with Coleridge's pioneering poetry the reader is invited to explore fundamental questions on themes ranging from nature and trauma to gender and sexuality Essays by leading Coleridge scholars analyse and render accessible his extraordinarily innovative thinking about dreams psychoanalysis genius and symbolism Coleridge is often a direct and gripping writer yet he is also elusive and diverse This Companion's great achievement is to offer a one volume entry point into his incomparably rich and varied world **British Weather and the Climate of Enlightenment** Jan Golinski,2010-11-15 Enlightenment inquiries into the weather sought to impose order on a force that had the power to alter human life and social conditions British Weather and the Climate of Enlightenment reveals how a new sense of the national climate emerged in the eighteenth century from the systematic recording of the weather and how it was deployed in discussions of the health and welfare of the population Enlightened intellectuals hailed climate's role in the development of civilization but acknowledged that human existence depended on natural forces that would never submit to rational control Reading the Enlightenment through the ideas beliefs and practices concerning the weather Jan Golinski aims to reshape our understanding of the movement and its

legacy for modern environmental thinking With its combination of cultural history and the history of science British Weather and the Climate of Enlightenment counters the claim that Enlightenment progress set humans against nature instead revealing that intellectuals of the age drew characteristically modern conclusions about the inextricability of nature and culture *Isotopography* Niels Wilde,2024-08-19 While the concept of place remains undertheorized in Kierkegaard research this study argues that place is at the center of Kierkegaard s thinking The first part of the book shows that Kierkegaard s notion of situatedness as being placed in a socio historical situation conditioned by a situation prior to situatedness points to a realist position and a flat ontology Secondly the book develops a detailed analysis of the ontological structure of the existential place the place we ourselves are and concrete places the places where we are Place opens a qualified space within bounds the existence sphere an atmosphere of elemental attunement and attuned elementality Finally the book collects the dots from part one and two in a topological realist approach to Kierkegaard s theology and three main definitions of God God is love God is that everything is possible and God is the middle term The book concludes that Kierkegaard s existential topography reveals a realist position where we are is never exhausted by being the place where we are

Cinema as Weather Kristi McKim,2013-03-05 How do cinematic portrayals of the weather reflect and affect our experience of the world While weatherly predictability and surprise can impact our daily experience the history of cinema attests to the stylistic and narrative significance of snow rain wind sunshine clouds and skies Through analysis of films ranging from The Wizard of Oz to The Umbrellas of Cherbourg from Citizen Kane to In the Mood for Love Kristi McKim calls our attention to the ways that we read our atmospheres both within and beyond the movies Building upon meteorological definitions of weather s dynamism and volatility this book shows how film weather can reveal character interiority accelerate plot development inspire stylistic innovation comprise a momentary attraction convey the passage of time and idealize the world at its greatest meaning making capacity unlike our weather film weather always happens on time whether for tumultuous romantic violent suspenseful or melodramatic ends Akin to cinema s structuring of ephemera cinematic weather suggests aesthetic control over what is fleeting contingent wildly environmental and beyond human capacity to tame This first book length study of such a meteorological and cinematic affinity casts film weather as a means of artfully and mechanically conquering contingency through contingency of taming weather through a medium itself ephemeral and enduring Using film theory history formalist phenomenological analysis and eco criticism this book casts cinema as weather insofar as our skies and screens become readable through our interpretation of changing phenomena

Emerson and the Climates of History Eduardo Cadava, 1997 This book brings together a wide range of materials from history religion philosophy horticulture and meteorology to argue that Emerson articulates his conception of history through the language of the weather Focusing on Emerson's persistent use of climatic and meteorological metaphors the book demonstrates that Emerson's reflections on the weather are inseparable from his preoccupation with the central historical and political issues of his day The author suggests that Emerson's writings may be read as both symptomatic and critical of the governing rhetorics through which Americans of his day thought about the most important contemporary issues and that what has often been seen as Emerson's retreat from the arena of history into the domain of spirit is in fact an effort to retreat or rethink the nature of history in terms of questions of representation What distinguishes this book from the work of other critics who are reassessing Emerson's relation to history is its attempt to think through the way in which the figures of Emerson's rhetoric figures like frost snow the auroras and nature in general which often seem to have nothing to do with either history or politics are themselves traversed by the conflictual histories of slavery race destiny revolution and the meaning of America It differs that is in proposing a textual model for reading Emerson that measures his engagement with changing historical and political relations in terms of the way he works to revise the language he inherits There can be no reading of Emerson the author suggests that does not trace the movement of his figures and tropes as they become something else as they open onto questions of history

Predicting the Weather Katharine Anderson, 2010-11-15 Victorian Britain with its maritime economy and strong links between government and scientific enterprises founded an office to collect meteorological statistics in 1854 in an effort to foster a modern science of the weather But as the office turned to prediction rather than data collection the fragile science became a public spectacle with its forecasts open to daily scrutiny in the newspapers And meteorology came to assume a pivotal role in debates about the responsibility of scientists and the authority of science Studying meteorology as a means to examine the historical identity of prediction Katharine Anderson offers here an engrossing account of forecasting that analyzes scientific practice and ideas about evidence the organization of science in public life and the articulation of scientific values in Victorian culture In Predicting the Weather Anderson grapples with fundamental questions about the function intelligibility and boundaries of scientific work while exposing the public expectations that shaped the practice of science during this period A cogent analysis of the remarkable history of weather forecasting in Victorian Britain Predicting the Weather will be essential reading for scholars interested in the public dimensions of science

Literature and Weather Johannes Ungelenk, 2018-02-19 Literature and Weather Shakespeare Goethe Zola is dedicated to the relation between literature and weather i.e. a cultural practice and an everyday phenomenon that has played very different epistemic roles in the history of the world The study undertakes an archaeology of literature's affinity to the weather which tells the story of literature's weathery self reflection and its creative reinventions as a medium in different epistemic and social circumstances The book undertakes extensive

close readings of three exemplary literary texts Shakespeare's *The Tempest* Goethe's *The Sufferings of Young Werther* and Zola's *The Rougon Macquarts* These readings provide the basis for reconstructing three distinct formations negotiating the relationship between literature and weather in the 17th the 18th and the 19th centuries The study is a pioneering contribution to the recent debates of literature's indebtedness to the environment It initiates a rewriting of literary history that is weather sensitive the question of literature's agency its power to affect cannot be raised without understanding the way the weather works in a certain cultural formation

Scotland and the Fictions of Geography Penny Fielding, 2008-12-11 Focusing on the relationship between England and Scotland and the interaction between history and geography Penny Fielding explores how Scottish literature in the Romantic period was shaped by the understanding of place and space This book examines geography as a form of regional national and global definition addressing national surveys local stories place names and travel writing and argues that the case of Scotland complicates the identification of Romanticism with the local Fielding considers Scotland as North Britain in a period when the North of Europe was becoming a strong cultural and political identity and explores ways in which Scotland was both formative and disruptive of British national consciousness Containing studies of Robert Burns Walter Scott and James Hogg as well as the lesser known figures of Anne Grant and Margaret Chalmers this study discusses an exceptionally broad range of historical geographical scientific linguistic antiquarian and political writing from throughout North Britain

Daniel Defoe Romanticism and Colonial Disease Alan Bewell, 2003-05-22 Colonial experience was profoundly structured by disease as expansion brought people into contact with new and deadly maladies Pathogens were exchanged on a scale far greater than ever before Native populations were decimated by wave after wave of Old World diseases In turn colonists suffered disease and mortality rates much higher than in their home countries Not only disease but the idea of disease and the response to it deeply affected both colonizers and those colonized In Romanticism and Colonial Disease Alan Bewell focuses on the British response to colonial disease as medical and literary writers in a period roughly from the end of the eighteenth century to the middle of the nineteenth century grappled to understand this new world of disease Bewell finds this literature characterized by increasing anxiety about the global dimensions of disease and the epidemiological cost of empire Colonialism infiltrated the heart of Romantic literature affecting not only the Romantics framing of disease but also their understanding of England's position in the colonial world The first major study of the massive impact of colonial disease on British culture during the Romantic period Romanticism and Colonial Disease charts the emergence of the idea of the colonial world as a pathogenic space in need of a cure and examines the role of disease in the making and unmaking of national identities

The Global Wordsworth Katherine Bergren, 2019-05-24 The Global Wordsworth charts the travels of William Wordsworth's poetry around the English speaking world But as Katherine Bergren shows Wordsworth's afterlives reveal more than his influence on other writers his appearances in novels and essays from the antebellum U S to post Apartheid South Africa change how we understand a poet we think we know Bergren analyzes writers like Jamaica Kincaid J M Coetzee and Lydia Maria Child who plant Wordsworth in their own writing and bring him to life in places and times far from his own and then record what happens By working beyond narratives of British influence Bergren highlights a more complex dynamic of international response in which later writers engage Wordsworth in conversations about slavery and gardening education and daffodils landscapes and national belonging His global reception critical appreciative and ambivalent inspires us to see that Wordsworth was concerned not just with local English landscapes and people but also with their changing place in a rapidly globalizing world This study demonstrates that Wordsworth is not tangential but rather crucial to our understanding of Global Romanticism Published by Bucknell University Press Distributed worldwide by Rutgers University Press

The Invention of Clouds Richard Hamblyn, 2002-08-03 Presents the story of Luke Howard an amateur meteorologist and his groundbreaking work that began with naming and classifying clouds

The Shaping of Text John Porter Houston, 1993 The Shaping of Text pays homage to the work of the late John Porter Houston who wrote extensively on style rhetoric and narrative and poetic techniques in Western European literature It is appropriate that the essays in this volume focus on the form of the literary work and the ways in which form determines meaning William Calin's essay on the saint's life analyzes the use of antithesis as a poetic and structural device that illustrates the saint's fundamental understanding of the relationship between the ephemeral reality of his physical existence and the absolute timeless reality to

which he aspires Raymond LaCharite's study of Rabelais focuses on the author's self-conscious awareness of this relationship and of Renaissance preoccupation with reading as both an act of creation and interpretation George Joseph's study of three Renaissance poets focuses on the use of paradox as both a figure of speech and as a genre that serves both as a structure and as a basis for the interaction in the poetry David Rubin's essay on La Fontaine emphasizes the ways in which the register of style in the Fables is used to set the tone and control the meaning of the language In the chapters devoted to nineteenth and twentieth century literature one can see the continuing closer relationship between the book as a work of art and the reality in which it interacts Suzanne Nash analyzes the strategy Mme de Stael uses in writing *De l'Allemagne* a book written less to present an accurate portrayal of Germany than to promote her own republican ideals for France Ross Chambers's essay probes the question of the theme of melancholy in Romantic writing and its relationship to the social and political structures of the period Edward Kaplan shows how a growing ethical social concern can be seen in Baudelaire's revised *Les Fleurs du Mal* Rima Reck and Edward Kaplan reflect the growing use of literature as a vehicle for influencing public opinion Stirling Haig analyzes Flaubert's careful use of style and his awareness that reality is ultimately shaped by the beholder's perspective Finally Virginia La Charite's chapter on Proust returns to the idea of a structure within a structure in this case the architecture of the cathedral as a metaphor of synthesis an aesthetic device that gives an intelligible structure to Proust's enormous but intricately complex mass of details If John Porter Houston focused on form and style it is because he understood the semiotic nature of all things that a writer's style is a subtle form of refined communication or as Houston wrote style is an absolute manner of seeing things for Proust a question of vision and so constitutes the ultimate reality of literature
