Love: the Most Precious Gift of Life Pejman Aghasi, 2007-08 Love is the only hope It is only because of love that man finds it possible to reach god If there were no love there would be no religion no prayer If there were no love there would be no creativity no music no dance no art no poetry If there were no love there would be no beauty no friendship no happiness no intimacy All that is valuable in life comes through love Love is the source of all that is nourishing and fulfilling Love is the only heavenly phenomenon on this earth Everything else is earthly therefore it is only through love that one can reach to god and heavenly states of being Without love life becomes dull repetitive and unfulfilling Love The Most Precious Gift of Life shows us that we must live with love because that is the only way to really live The deeper and realer your love is the deeper and more meaningful your life is We must think of love and life as being the same and synonymous If love has so many blessings why do many couples struggle and face so many difficulties in their relationships In the second part of Love The Most Precious Gift of Life the root social and psychological causes of these conflicts are uncovered and a solution for solving each problem is also presented And in doing so it helps us to keep our relationships healthy and intimate and enable us to embrace love and through love reach to our highest potential which is self realization and enlightenment **The Cultural**

Roots of Strategic Intelligence Gino LaPaglia, 2019-11-20 Strategic Intelligence is a form of meaning that promises the possibility of strategic advantage dignity the achievement of objective and the fulfillment of potential in hostile environments In The Cultural Roots of Strategic Intelligence Gino LaPaglia demonstrates that the strategic aspect of reason arising in human experience encoded as value and born by culture as a strategic resource has been encoded as values that have been memorialized in culturally authoritative sources in various Eurasian cultures for thousands of years These sources have validated a strategic orientation in the world legitimized the strategist as a heroic identity and transmitted a coherent world view that enables the practitioner of strategy to overcome asymmetric threat By excavating the provenance of strategic thought expressed in the cultural identity of the strategist in the most culturally authoritative mythological literary philosophical and religious sources and excavating the underlying strategic values expressed in cultural products LaPaglia

demonstrates that the strategic aspect of human rationality is one of the most basic structural dynamics of human meaning and that the transmission of this strategic way of being and acting in the world offers hope for life's underdogs Fungal Biology in the Origin and Emergence of Life David Moore, 2013-01-24 Contents 1 **The Timetree of Life** S. Blair Hedges, Sudhir Kumar, 2009-04-23 The evolutionary history of life includes two primary components phylogeny and timescale. Phylogeny refers to the branching order relationships of species or other taxa within a group and is crucial for understanding the inheritance of traits and for erecting classifications. However, a timescale is equally important because it provides a way to compare phylogeny directly with the evolution of other organisms and with planetary history such as geology, climate, extraterrestrial impacts and other features. The Timetree of Life is the first reference book to synthesize the wealth of information relating to the temporal component of phylogenetic trees. In the past, biologists have relied exclusively upon the fossil record to infer an evolutionary timescale. However, recent revolutionary advances in molecular biology have made it possible to not only estimate the relationships of many groups of organisms but also to estimate their times of divergence with molecular clocks. The routine estimation and utilization of these so-called time trees could add exciting new dimensions to biology, including enhanced opportunities to integrate large molecular data sets with fossil and biogeographic evidence and thereby foster greater communication between molecular and traditional systematists. They could help estimate not only ancestral character states but also evolutionary rates in numerous categories of organismal phenotype, establish more reliable associations between causal historical processes and biological outcomes, develop a universally standardized scheme for biological classifications, and generally promote novel avenues of thought in many arenas of comparative evolutionary biology. This authoritative reference work brings together for the first time experts on all major groups of organisms to assemble a timetree of life. The result is a comprehensive resource on evolutionary history which will be an indispensable reference for scientists, educators, and students in the life sciences, earth sciences, and molecular biology. For each major group of organism, a representative is illustrated, and a timetree of families and higher taxonomic groups is shown. Basic aspects of the evolutionary history of the group, the fossil record, and competing hypotheses of relationships are discussed. Details of the divergence times are presented for each node in the timetree, and primary literature references are included. The book is complemented by an online database, www.timetree.net, which allows researchers to both deposit and retrieve data. *A Study of Dōgen* Masao Abe, 1991-11-08 This complete translation of Masao Abe's essays on Dogen probes the core of the Zen master's philosophy and religion. This work analyzes Dogen's formative doubt concerning the notion of original awakening as the basis for his unique approach to nonduality in the doctrines of the oneness of practice and attainment, the unity of beings and Buddha nature, the simultaneity of time and eternity, and the identity of life and death. Abe also offers insightful critical comparisons of Dogen and various Buddhist and Western thinkers, especially Shinran and Heidegger. *Tree Of Life* Paul Foster Case, 2021-01-28 There are thirty-seven lessons based on the Tarot in this book, with an

introduction objective and about higher consciousness This book is occult in nature and taught to students of BOTA
