## **Roots Of Civic Identity:**

Roots of Civic Identity Miranda Yates, James Youniss, 1999 Miranda Yates and James Youniss have brought together an international collection of essays that describe the state of community participation among the world's youth. Authors from around the globe use empirical data to present portraits of youth constructing their civic identities through such means as community service. Youth seek to resolve ideological tensions such as in Northern Ireland and Palestine to overcome corrupting political practices such as in Italy and Taiwan to deal with disillusionment such as in Palestine and the emerging Eastern European nations and to bridge barriers against youth's meaningful participation in the working of society such as in Canada and Japan. Special conditions such as the diminution of the welfare state for instance in former West Germany and the rapid turn towards democracy in former East Germany offer insight into the process through which youth try to establish meaningful person-state relationships.

**Encyclopedia of Identity** Ronald L. Jackson II, 2010-06-29 The two volumes of this encyclopedia seek to explore myriad ways in which we define ourselves in our daily lives. Comprising 300 entries, the Encyclopedia of Identity offers readers an opportunity to understand identity as a socially constructed phenomenon, a dynamic process both public and private, shaped by past experiences and present circumstances and evolving over time. The Encyclopedia of Identity is designed for readers to grasp the nature and breadth of identity as a psychological, social, anthropological, and popular idea. Key Themes: Art, Class, Developing Identities, Gender, Sex, and Sexuality, Identities in Conflict, Language and Discourse, Living Ethically, Media and Popular Culture, Nationality, Protecting Identity, Race, Culture, and Ethnicity, Relating Across Cultures, Religion, Representations of Identity, Theories of Identity.

**The ^ASocial Roots of Authoritarianism** Natalia Forrat, 2024-10-25 In this book, Natalia Forrat describes two models of authoritarianism: the first in which people see the state as their team leader and the other where they trust informal, non-state leaders and see the state as a source of perks or punishment. Forrat compares the structures of political machines in four Russian regions, finding that the two maintaining unity based authoritarianism demonstrated a stable performance across multiple elections while the other two delivered less stable results. Carefully crafted and sophisticated, Forrat's theory of authoritarian power sheds new light on state-society relations in Russia and helps explain the divergent patterns of regime maintenance strategies in authoritarian countries throughout the world.

**In From the Margins**, 2006-01-01 This book focuses at the margins of adult education work and civil society. Rather than focusing on active participants and active participation, the objective is to scrutinize the whole adult population in terms of participation and to pay special attention to those who are so easily left out of studies concerning adult education learning at work or active participation in civil society. The aim of the book is to bring into the discussion the views of those who do not find attending adult education possible and who thus form a challenge for

the promotion of active citizenship In the collection of articles researchers from various disciplines and with cross disciplinary interests in adult education and marginalisation meet and discuss with each other within and beyond their own disciplines

**The European Roots of Canadian Identity** Philip Resnick,2005-04-01 What makes Canada a different kind of society from the United States In this book length essay Philip Resnick argues that in more ways than one Canada has been profoundly marked by its European origins This is most apparent where the European historical underpinnings both of English speaking and French speaking Canada are concerned but it is no less true when one examines Canada s multiple national identities robust social programs increasingly secular values and multilateral outlook on international affairs today As the war in Iraq brought home and the 2004 federal election reinforced Canada is a more European type society than is our neighbour to the south This does not come without its own complexities or problems On the contrary there are significant parallels between the ambiguous versions of national identity that one finds in Canada and what one finds on the European continent There are parallels too between the elements of self doubt that characterize Canadians overall when they think about their country and those of Europeans caught up in their own often fractious attempts to forge a more integrated Europe The author argues that Canada needs Europe as an effective counter weight to the influence of the United States He further argues that at a deeper existential level Canadians need relevant European references to better understand what makes them the kind of North Americans that they are

**Liberal Roots of Far Right Activism** Lars Erik Berntzen,2019-10-16 This book explores the anti Islamic turn and expansion of the far right in Western Europe North America and beyond from 2001 and onwards Driven by terror attacks and other moral shocks the anti Islamic cause has undergone four waves of transnational expansion in the period since 2001 The leaders and intellectuals involved have varied backgrounds many coming from the left uniting historically opposed sets of values under their banner of a civilizational struggle against Islam The findings presented in this book indicate that anti Islamic initiatives in Western Europe and the United States form a transnational movement and subculture characterized by a fragile balance between liberal and authoritarian values The author draws on a broad array of data sources and methods including network analysis and sentiment analysis to analyze the impact of the anti Islamic expansion and turn at a macro level and the theoretical implications for our understanding of the current far right flowing from this Offering an overview of anti Islamic activism the book explores the background of their leaders and ideologues provides an in depth look at their ideology online organizational networks and the views expressed by their online members as well as which emotions and messages continue to drive their mobilization The book will be of interest to scholars in the social movement field as well as political scientists sociologists and general readers interested in issues such as populism extremism and understanding the ways in which the contemporary far right challenges liberal democracies

**Myth, Locality, and Identity in Pindar's Sicilian Odes** Virginia M. Lewis,2019-09-12 Myth Locality and Identity argues that Pindar engages in a striking innovative style of mythmaking that

represents and shapes Sicilian identities in his epinician odes for Sicilian victors in the fifth century BCE. While Sicily has been thought to be lacking in local traditions for Pindar to celebrate, Lewis argues that the Sicilian odes offer examples of the formation of local traditions: the monster Typho, whom Zeus defeated to become king of the gods, for example, now lives beneath Mt Aetna. Persephone receives the island of Sicily as a gift from Zeus, and the Peloponnesian river Alpheos travels to Syracuse in pursuit of the local spring nymph Arethusa. By weaving regional and Panhellenic myth into the local landscape, as the book shows, Pindar infuses physical places with meaning and thereby contextualizes people, cities, and their rulers within a wider Greek framework. During this time period, Greek Sicily experienced a unique set of political circumstances: the inhabitants were continuously being displaced, cities were founded and resettled, and political leaders rose and fell from power in rapid succession. This book offers the first sustained analysis of myth in Pindar's odes for Sicilian victors across the island that accounts for their shared context. The nodes of myth and place that Pindar fuses in this poetry reinforce and develop a sense of place and community for citizens locally; at the same time, they raise the profile of physical sites and the cities attached to them for larger audiences across the Greek world. In addition to providing new readings of Pindaric odes and offering a model for the formation of Sicilian identities in the first half of the fifth century, the book contributes new insights into current debates on the relationship between myth and place in classical literature.
