Law Clerks and the Judicial Process John B. Oakley, Robert S. Thompson, 2024-07-26 This is the first in depth empirical and historical study of the use of law clerks by American judges Although possessing a hundred year heritage the institution has been ignored as an important component of the process of judicial decision making Law clerks are in the authors words subordinate anonymous but often quite powerful lawyers who function as the non commissioned officers in the army of the judiciary American courts are currently altering the traditional use of law clerks through the introduction of important innovations that enhance the ability of judges to dispose of cases rapidly but detract from personal judicial control over individual decisions The authors investigate the clash of tradition and innovation through interviews with sixty three judges of federal courts and appellate courts in California They find distinctly different models of law clerk usage in the state and federal systems which they analyze on the basis of the judges own perceptions of the qualitative and quantitative impact on their decision of variations in the character tenure and duties of staff assistants They offer suggestions on how modern courts can cope with the crisis of volume without unduly sacrificing traditional standards of judicial autonomy Because of the confidential nature of judicial deliberations judges are rarely willing to discuss publicly their use of law clerks This study employs unconventional techniques for penetrating the secrecy of judicial chambers while respecting the confidentiality and the individuality of its sources It presents important new information on the internal operating procedures of the courts studies collating interview data with facts abstracted from pre existing but often obscure sources and providing a particularly close look at the inner workings of the Supreme Court of California and the United States Court of Appeals for the Ninth Circuit Revealing the significance of public funding of judicial staff in determining patterns of law clerk usage it should promote further investigation and debate regarding the proper structure and role of staff assistance in the judicial process This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980

Steigerwalt,Artemus Ward,2013-05-15 The U S Supreme Court typically rules on cases that present complex legal questions Given the challenging nature of its cases and the popular view that the Court is divided along ideological lines it s commonly assumed that the Court routinely hands down equally divided decisions Yet the justices actually issue unanimous decisions in approximately one third of the cases they decide Drawing on data from the U S Supreme Court database internal court documents and the justices private papers The Puzzle of Unanimity provides the first comprehensive account of how the Court reaches consensus Pamela Corley Amy Steigerwalt and Artemus Ward propose and empirically test a theory of consensus they find consensus is a function of multiple concurrently operating forces that cannot be fully accounted for by ideological attitudes In this thorough investigation the authors conclude that consensus is a function of the level of legal certainty and its ability to constrain justices ideological preferences **Courtiers of the Marble Palace** Todd C.
