Setting Priorities For Environment Management An Application To The Mining Sector In Bolivia:

Setting Priorities for Environmental Management Wendy S. Ayres, Kathleen A. Anderson, David Hanrahan, 1998 Mining and industrial activities if poorly managed can damage the environment and leave behind contaminated soils polluted groundwater and waste material The two papers in this volume illustrate the methodologies developed for selecting priority sites for remediating environmental problems due to mining It also describes the high priority investments that would provide the greatest benefits for the available resources The methodologies have broad application and could be used to identify priority remediation investments in other sectors where past activities have led to environmental problems *An Environmental Study of Artisanal, Small, and Medium Mining in Bolivia, Chile, and Peru* Gary McMahon, 1999-01-01 Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years a figure which increases to 500 percent if Chile is excluded Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors In light of this legislation this report examines the environmental effects of artisanal small and medium mines in three Latin American Countries Bolivia Chile and Peru Four of the most important elements to be considered are The age of the mine Management of tailings The heterogeneity of the artisanal and small mine sectors The increasing need to take cultural considerations into account in the decision making process The paper contains results of the studies on the various mining sectors strategy and policy recommendations and country study summaries *Environmental Management and Institutions in OECD Countries* Magda Lovei, Charles Weiss, 1998 As environmental protection is attracting increasing political attention and public support many developing countries are designing and putting into practice environmental institutions This study analyzes the experience of several OECD countries in order to identify factors that influence the role and success of environmental management possible causes of the discrepancy between national environmental objectives and actual performance and implications of lessons learned and recommendations for countries that are in the process of establishing or redesigning their environmental management systems Economic Reform and Environmental Performance in Transition Economies Gordon Hughes, Magda Lovei, 1999-01-01 transition has proved to be a much longer and more difficult process than most had anticipated and progress has varied By 1998 only one country Poland which embarked on economic reform before the rest of the region had reestablished sustained economic growth and surpassed the pretransition level of real gross domestic product GDP From Economic Reform and Environmental Performance in Transition Economies Most global economy and environmental watchers expect the transition to a market economy to yield environmental benefits The changing incentives that a market economy introduces should foster more efficient production better use of resources and increased community input The advanced reformers of the Central and Eastern European CEE countries proved this to be the case They improved energy efficiency and reduced emissions intensity of pollutants The slower reforming countries of the Newly Independent States NIS

also experienced lower pollution However that downturn coincided with the economic decline which shut down many major polluters This report reviews progress in environmental trends since transition began It looks at air and water pollution and health indicators in the trends and in light of the environmental issues identified in the Environmental Action Programme for Central and Eastern Europe It continues and builds on the World Bank s work in analyzing the environmental effects of transition restructuring and privatization with a view to identifying priority areas for investment and policy initiatives The report will interest environmental policy makers and practitioners *Agriculture Sector Programs* Nwanze

Okidegbe,1998-01-01 This sourcebook provides practical guidance to policymakers and program planners in countries and to development agencies on how to carry out or support an agricultural sector program from initial discussions to developing the program concept to securing broad stakeholder involvement to implementation It explains the reasons why countries may wish to undertake a sector or subsector program and describes the conditions which can help ensure the program s success provides details on how to formulate a sector strategy and bring about institutional reforms focuses on core public sector activities based on a detailed expenditure review and suggests ways of encouraging donors to work together under the leadership of the partner country government **Assessment of Corporate Sector Value and Vulnerability** Dale F.

Gray,1999-01-01 Once equity has fallen below a certain threshold for a significant period of time it triggers a suspension of debt payments and distorts incentives for equity holds and managers But what is a significant period of time You or I could pay a 10 million annual mortgage payment for a day or two but not two or three months Similarly owners and managers can withstand short periods of illiquidity or negative equity but not longer ones At some point in time the inability to meet obligations and perception of continued difficulties creates a system wide breakdown in debt payments The relationship between the corporate sector and a country s macroeconomy is receiving increased attention from policymakers and investors especially those affected by the Asian crisis Recent crises have pointed out the importance of improving our understanding of the links between the corporate sector the financial sector and the macroeconomy in a world of volatile capital flows Assessing the vulnerability of the corporate sector and its links to financial and exchange rate crisis is important for both improved surveillance and in the design of policies in crisis countries However the analytical and operational tools available to policymakers and investors to analyze this problem have been limited This Technical Paper was prepared as part of an initiative to develop new frameworks which can integrate state of the art corporate finance principles macroeconomic and financial sector analysis An innovative yet practical framework is provided which has numerous applications for assessing corporate sector vulnerability design of corporate restructuring strategies as well as financial sector and macroeconomic policies It will be of interest to bankers economic policymakers corporate finance specialists and macroeconomists *Overcoming Obstacles to Liberalization of the Telecom Sector in Estonia, Poland, the Czech Republic, Slovenia, and Hungary* Robert Bruce,1999-01-01 This study emerges from discussions with representatives of the World Bank

and high level representatives of government and the telecommunications services industry in Hungary Estonia Poland the Czech Republic Slovenia and Hungary It considers the problems inherent with the liberalization of the telecom sector This publication is a Technical Paper sponsored by the Poverty Reduction and Economic Management Network of the World Bank's Europe and Central Asia Division It is part of a comprehensive series regarding the many important factors that influence European Union EU accession in the Central and East European countries CEEC The topics in the series cover both the social and economic aspects of accession across a broad range of sectors The series also provides background information for specific acceding countries These publications will be of interest to EU member and candidate countries their ministries and any one studying the accession issue

Soil Fertility Management in Sub-Saharan Africa W. Graeme Donovan, Frank Casey, 1998-01-01 World Bank Technical Paper No 408 This report is a critical review of the technical economic and institutional constraints on improving soil fertility in Sub Saharan Africa and the actions recommended to address them Action plans prepared for Ghana Kenya Malawi and Mali examine the demand for and supply of mineral fertilizers the exploitation of local mineral resources the prevention of soil erosion and increasing soil water retention and soil fertility management using organic technologies and management practices

Management of Water Resources Musa Asad, 1999-01-01 Although procedures for pricing retail distribution have been established for a long time methods for pricing bulk or wholesale water supplies are still evolving How to finance the infrastructure and service of bulk water supply and how to use pricing to achieve efficient allocation and use of water as a resource are the central issues that emerge from discussions about bulk water pricing Efficiency will lead to allocating water resources better reducing water losses caused by poor maintenance of the supply systems and increased monitoring of water quality At first glance Brazil may not appear to be a relevant country from which to draw lessons in distributing scarce water resources since it contains 12 percent of the world's fresh water supply However with its vast territory and issues of regional drought and population explosion Brazil provides a unique environment in which to demonstrate how adequate pricing of bulk water on a regional level can help allocate water efficiently This paper offers a framework for bulk water pricing reform and examines the lessons from recent analytical work and practice in Brazil as well as relevant international experience It then offers recommendations for the development of both water pricing and allocation policies to facilitate continued implementation of bulk water pricing in Brazil

The East Asian Miracle and Information Technology Nagy Hanna, 1999 World Bank Discussion Paper No 326 Draws on the successful experiences of five East Asian economies Japan the Republic of Korea Singapore Taiwan China and Hong Kong to show how they have exploited the opportunities made possible by the information technology revolution and built sustainable competitive advantages in many high value added industries and services The study examines the role of government in unleashing private sector response promoting the information technology industry diffusing technology and focusing resources on strategic elements of the national information infrastructure It also explores the role of the private

sector in influencing the development and use of the new technologies

Successful Conversion to Unleaded Gasoline in Thailand Philip Sayeg, 1998-01-01 The Government of Thailand within a five year period 1991-95 introduced a series of initiatives that resulted in the elimination of leaded gasoline and reduction of ambient lead by a factor of 10 This report describes the strategies the government employed educating about the dangers of airborne lead setting a lower price at pump for unleaded gasoline helping the oil companies establish a system to distribute unleaded gasoline throughout the country conducting monitoring and follow up studies and adjusting environmental regulations as necessary to support these policies

Groundwater Salman M. A. Salman, 1999-01-01 Water is becoming an increasingly scarce resource for most of the world's citizens The current trends indicate that the overall situation is likely to deteriorate further at least for the next decade unless the water profession eschews business as usual practices which can only allow incremental changes to occur Groundwater is the least understood and least appreciated yet the most important natural resource available to mankind Groundwater represents about 97% of the existing fresh water resources excluding the resources locked in polar ice More than one and a half billion people in the urban parts of the world today depend on groundwater Groundwater supply is more reliable than the seasonal and sometimes erratic surface water and provides the main line of defense against drought Moreover the quality of groundwater is by and large superior to surface water and cheaper to develop However when available data on groundwater is very scanty As a result the World Bank is now paying increasing attention to this valuable resource through both operations and sector work This publication represents the proceedings of the seminar Groundwater Legal and Policy Perspectives that was organized by the Legal Vice Presidency of the World Bank It explains some basic technical aspects of groundwater surveys the regulatory framework for it and discusses the World Bank experience and international law regarding this precious resource It is a timely publication and should also assist in a better understanding and appreciation of this valuable source It will be of interest to Bank staff borrowing country officials international agencies and research organizations working on groundwater

Hungary, 1999-01-01 Published by Oxford University Press for the World Bank Some people may believe that crises are an inevitable feature of the capitalist system Others hold that exchange rate crises will vanish as more and more countries adopt floating exchange rates But some of us believe that crises can be avoided or at least limited by good economic management and that having a reasonable idea of where the equilibrium exchange rate lies is an essential requirement for good macro management John Williamson Chief Economist South Asia Region World Bank Exchange Rate Misalignment provides a comprehensive treatment of the conceptual and empirical issues concerning measuring exchange rate misalignment in developing countries The report hopes to provide policymakers and their advisors with a compendium of practical techniques for estimating equilibrium real exchange rates The book analyzes in detail four methodologies for the empirical estimation of the long run equilibrium real exchange rate The findings of the report include An assessment of alternative empirical measures of the internal and external real exchange rates An up to

date survey of the literature on estimating equilibrium exchange rates in both industrial and developing countries A detailed presentation of currently available methodologies for empirically estimating the equilibrium exchange rate in developing countries The analytical depth and practical techniques provided in *Exchange Rate Misalignment* make this book an invaluable resource for policymakers and foreign exchange specialists in the public and private sector
