Alfred, 2010-09-01 In a most timely volume addressing many of the connections among current fiscal and employment crises to adult education Learning for Economic Self Sufficiency highlights the problems and challenges that low literate adults encounter in various environments Moreover this book presents strategies for addressing the chronic illiteracy among low income workers The power of this volume is that the reader gains a holistic view of the complexities of educating a population of low literate adult learners from various life conditions From language literacy issues in corrections the workplace and access to higher education and migrant workers literacy learning barriers to technology literacies and consumerism myths Learning for Economic Self Sufficiency goes far deeper than prior volumes in exploring the complex scope of issues face by low income low literate adults as they seek learning for economic self sufficiency The overall objective of the book is to help readers explore economic self sufficiency for low literate and low income adults from various contexts and the role of adult and higher education in developing these learners for greater economic independence Noting that literacy is only a first step to economic mental and physical health as well as responsible citizenship each chapter provide specific case examples and recommendations to educators and trainers of adults for creating learning programs and environments to facilitate the development of a more literate and economically stable population *Financial Intelligence for IT Professionals* Julie Bonner, 2021-12-08 There are many books written for the accounting and finance community However there are very few books written to help the non financial career professionals who still need to understand the conceptual fundamentals of accounting and finance In 20 years of teaching this material to non financial professionals Dr Bonner has perfected a teaching approach that works to help the non financial professional engage with the material to use

financial information in leveraging their career without becoming overloaded with information that is not helpful to them. Learning this material takes repetition, application, and building the thinking processes necessary for effectiveness. Many think the challenge with finance is the math, but as this book will demonstrate, it is a conceptual problem. If you understand the conceptual framework, you will understand the math.

Dr. Julie Bonner is currently a tenured professor at Central Washington University in the information technology and administrative management department. Her career has spanned business and education for over 30 years. Initially, she received a Bachelor of Science degree in accounting, whereafter she earned an MBA and then a doctorate in organizational leadership.
