In recent years the field of study variously called local indigenous or traditional environmental knowledge TEK has experienced a crisis brought about by the questioning of some of its basic assumptions This has included reassessing notions that scientific methods can accurately elicit and describe TEK or that incorporating it into development projects will improve the physical social or economic well being of marginalized peoples The contributors to this volume argue that to accurately and appropriately describe TEK the historical and political forces that have shaped it as well as people's day to day engagement with the landscape around them must be taken into account TEK thus emerges not as an easily translatable tool for development experts but as a rich and complex element of contemporary lives that should be defined and managed by indigenous and local peoples themselves      *Peace Settlements and Political Transformation in Divided Societies* Adrian Guelke, 2022-10-03

Peace Settlements and Political Transformation in Divided Societies examines what happened to Northern Ireland and South Africa after their miraculous political settlements in the 1990s in which comparison between the two cases played a small but significant role The author extends the story by exploring the connections between these two deeply divided societies during the consolidation of their settlements He shows the ways in which their paths have subsequently diverged in both reality and perception At the outset of the transformation of the two polities the similarities between the two cases tended to be overstated In this context the book explains how the South African case came to be misidentified as an example of consociationalism and the influence that this has continued to exert

on comparative studies of power sharing In the process other aspects of South Africa's political transformation including respect for the constitution and the rule of law have been overlooked and underappreciated In the case of Northern Ireland a missing element in the treatment of its settlement as a model for other deeply divided societies has been the role that external mediation played in the creation and survival of its institutions Northern Ireland's dependence on favourable external circumstances explains in large part why the Good Friday Agreement is now facing a threat to its survival By contrast South Africa's political institutions seem relatively secure despite the vast scale of the country's socio economic problems This book will be of interest to students researchers and scholars of conflict resolution and peace processes comparative politics ethnic politics and democratisation as well as those involved in the governance of deeply divided societies

**Unifying Geography** David T. Herbert, John A. Matthews, 2004-08-05 It can be argued that the differences in content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will

give the discipline renewed strength and direction thus improving its status both within and outside geography
