Freshwater is one of the most valuable commodities on our planet and this resource should be managed in a sustainable way Yet we are less than careful in the way we use water and many of our non marine aquatic habitats are threatened by anthropogenic impacts Eutrophication for example could well turn into one of the major social as well as economic problems of the 21st century Reduction of water quality also has a profound effect on the biota that depend on these water bodies such as micro organisms plants and animals Freshwater Biodiversity is a much underestimated component of global biodiversity both in its diversity and in its potential to act as models for fundamental research in evolutionary biology and ecosystem studies Freshwater organisms also reflect quality of water bodies and can thus be used to monitor changes in ecosystem health The present book deals with all of these aspects of Aquatic Biodiversity It comprises a unique collection of primary research papers spanning a wide range of topics in aquatic biodiversity studies and including a first global assessment of specific diversity of freshwater animals The book also presents a section on the interaction between scientists and science policy managers A target opinion paper lists priorities in aquatic biodiversity research for the next decade and several reactions from distinguished scientists discuss the relevance of these items from different points of view fundamental ecology taxonomy and systematics needs of developing countries present day biodiversity policy at European and at global scales It is

believed that such a platform for the interaction between science and science policy is an absolute necessity for the efficient use of research budgets in the future **The Indian Ocean** Rabin Sen Gupta,Ehrlich Desa,2001 Contributed articles

Chinese History in Geographical Perspective Yongtao Du,Jeff Kyong-McClain,2013-01-30 The authors in this volume believe that long term profound and sometimes tumultuous changes in the last five hundred years of the history of China have been no less geographical than social political or economic From the dialectics of local empire relations to the imperial state s persistent array of projects for absorbing and transforming ethnic regions on the margins of empire from the tripling of imperial territories in the Qing to the disputes over the identity of the former outer zones in the early Republican era and from the universalistic imagination of all under heaven to the fraught processes of re drawing a new set of nation state boundaries in the twentieth century the study of the dynamics of geography broadly conceived promises to provide insight into the contested development of the geographical entity which we today call China **Ancient Pakistan - an**
