

Why is Seurat so Important?

- Seurat was interested in the science behind painting. He developed a style called **Divisionism** or **Pointillism**, in which dots of pure color are dabbed onto a canvas. The eye blends them when viewed from a distance, known as **optical mixing**.

Seurat And The Science Of Painting:

Seurat and the Science of Painting William Innes Homer,1985 *Seurat and the Science of Painting. [Illustr.]*
William Innes Homer,1964 **Georges Seurat and the Science of Painting** William Innes Homer,1964 **The Collected Essays and Criticism, Volume 1** Clement Greenberg,1986 Clement Greenberg is widely recognized as the most influential and articulate champion of modernism during its American ascendancy after World War II the period largely covered by these highly acclaimed volumes of The Collected Essays and Criticism Volume 3 Affirmations and Refusals presents Greenberg s writings from the period between 1950 and 1956 while Volume 4 Modernism with a Vengeance gathers essays and criticism of the years 1957 to 1969 The 120 works range from little known pieces originally appearing Vogue and Harper s Bazaar to such celebrated essays as The Plight of Our Culture 1953 Modernist Painting 1960 and Post Painterly Abstraction 1964 Preserved in their original form these writings allow readers to witness the development and direction of Greenberg s criticism from his advocacy of abstract expressionism to his enthusiasm for color field painting With the inclusion of critical exchanges between Greenberg and F R Leavis Fairfield Porter Thomas B Hess Herbert Read Max Kozloff and Robert Goldwater these volumes are essential sources in the ongoing debate over modern art **Painting, Science, and the Perception of Coloured Shadows** Paul Smith,2021-03-17 Many artists and scientists including Buffon Goethe and Philipp Otto Runge who observed the vividly coloured shadows that appear outdoors around dawn and dusk or indoors when a candle burns under waning daylight chose to describe their colours as beautiful Paul Smith explains what makes these ephemeral effects worthy of such appreciation or how depictions of coloured shadows have genuine aesthetic and epistemological significance This multidisciplinary book synthesises methodologies drawn from art history close pictorial analysis psychology and neuroscience theories of colour constancy history of science the changing paradigms used to explain coloured shadows and philosophy theories of perception and aesthetic value drawn from Wittgenstein and Merleau Ponty This title will be of interest to scholars in art history art theory and the history of science and technology *The Graph Music of Morton Feldman* David Cline,2016-05-26 Morton Feldman is widely regarded as one of America s greatest composers His music is famously idiosyncratic but in many cases the way he presented it is also unusual because in the 1950s and 1960s he often composed in non standard musical notations including a groundbreaking variety on graph paper that facilitated deliberately imprecise specifications of pitch and at times other musical parameters Feldman used this notation intermittently over seventeen years producing numerous graph works that invite analysis as an evolving series Taking this approach David Cline marshals a wide range of source materials many previously unpublished in clarifying the ideology organisation and generative history of these graphs and their formative role in the chronicle of post war music This assists in pinpointing connections with Feldman s compositions in other formats works by other composers notably John Cage and contemporary currents in painting Performance practice is examined through analysis of Feldman s non notated

From Point to Pixel Meredith Hoy, 2017-01-03 In this fiercely ambitious study Meredith Anne Hoy seeks to reestablish the very definitions of digital art and aesthetics in art history She begins by problematizing the notion of digital aesthetics tracing the nineteenth and twentieth century movements that sought to break art down into its constituent elements which in many ways predicted and paved the way for our acceptance of digital art Through a series of case studies Hoy questions the separation between analog and digital art and finds that while there may be sensual and experiential differences they fall within the same technological categories She also discusses computational art in which the sole act of creation is the building of a self generating algorithm The medium isn't the message what really matters is the degree to which the viewer can sense a creative hand in the art

Nature's Experiments and the Search for Symbolist Form Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature's experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de siècle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism Nature's Experiments and the Search for Symbolist Form demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism
