Seven Clues On Le A Scientific Detective Story:

Life On The Edge Michael Gross, 2008-01-03 Can life exist in the Antarctic ice in the deep subsurface in dilute sulfuric acid in hot springs even on Mars What degree of high or low temperature pressure or salt concentration can living cells tolerate In recent years scientists have discovered many single cell creatures that exist in in fact are perfectly adapted to extreme environments that were considered uninhabitable just one or two decades ago In *Life on the Edge* author Michael Gross explores how microorganisms adapt to their hostile environments and how they affect our current definition of the normal conditions for life He also describes the vast implications of these extremophiles and other amazing creatures from potential breakthroughs in medicine and biotechnology to the search for life elsewhere in the universe *The Sex*

Imperative Kenneth E. Maxwell, 2013-11-11 The sex imperative the irresistible impulse to engage in sexual relations has enabled animals to share their genes and evolve Maxwell traces the progress of sex from the simple sharing of genes between cells to the elaborate courtship rituals that developed so sperm could merge with egg In the effort to join sperm and egg species have developed some astounding and unusual sexual adaptations As Maxwell vividly describes the sex lives of various creatures he attests to the resiliency and amazing adaptability of life to its everchanging environment By focusing on the diversity of animal sexual relationships Maxwell enables us to question the very basis of sexuality What is sex Why did it evolve How does sexuality and survival shape the social behavior of animals and humans The sex imperative is indeed the driving force behind Darwin's theory of random variation and natural selection better known as survival of the fittest

Maxwell goes so far as to investigate our latest accomplishment in the science of begetting offspring genetic engineering This awe inspiring and unique work celebrates the power and wonder of life and sexuality of all creatures including humans
