**Carcinogens and Anticarcinogens in the Human Diet** National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Comparative Toxicity of Naturally Occurring Carcinogens, 1996-03-12 Despite increasing knowledge of human nutrition the dietary contribution to cancer remains a troubling question Carcinogens and Anticarcinogens assembles the best available information on the magnitude of potential cancer risk and potential anticarcinogenic effect from naturally occurring chemicals compared with risk from synthetic chemical constituents The committee draws important conclusions about diet and cancer including the carcinogenic role of excess calories and fat the anticarcinogenic benefit of fiber and other substances and the impact of food additive regulation The book offers recommendations for epidemiological and diet research Carcinogens and Anticarcinogens provides a readable overview of issues and addresses critical questions Does diet contribute to an appreciable proportion of human cancer Are there significant interactions between carcinogens and anticarcinogens in the diet The volume discusses the mechanisms of carcinogenic and anticarcinogenic properties and considers whether techniques used to evaluate the carcinogenic potential of synthetics can be used with naturally occurring chemicals The committee provides criteria for prioritizing the vast number of substances that need to be tested Carcinogens and Anticarcinogens clarifies the issues and sets the direction for further investigations into diet and cancer This volume will be of interest to anyone involved in food and health issues policymakers regulators researchers nutrition professionals and health advocates

**Dioxins and Health** A. Schechter, 2013-11-11 This book originated in a series of cross disciplinary conversations in the years 1984 1990 between the editor who is a physician researcher involved in clinical and laboratory research and a dioxin toxicologist During the years in which the conversations took place an extraordinary amount of new scientific literature was published related to dioxins defined for purposes of this text as the chlorinated dibenzo p dioxins dibenzofurans polychlorinated biphenyls PCBs and other compounds that are structurally and toxicologically similar to 2,3,7,8-tetrachlorodibenzo p dioxin 2,3,7,8-TCDD the most extensively studied and most toxic of this group of chemicals Dioxins

also began to interest not only chemists and toxicologists but also specialists from diverse disciplines such as wildlife and environmental science immunology neuroscience public health epidemiology medicine government law sociology and journalism Specialists from such varied disciplines while familiar with their own literature frequently did not have time to follow the dioxin literature outside their specialty area In addition each specialty had unique knowledge methods and perspectives Cross disciplinary conversation was necessary but all too frequently specialists from the various disciplines did not speak the same language resulting in misunderstanding Federal Register ,1993 *Federal Register Index* ,1994
