Ecological Data William K. Michener, James W. Brunt, 2009-04-01 Ecologists are increasingly tackling difficult issues like global change loss of biodiversity and sustainability of ecosystem services These and related topics are enormously challenging requiring unprecedented multidisciplinary collaboration and rapid synthesis of large amounts of diverse data into information and ultimately knowledge New sensors computers data collection and storage devices and analytical and statistical methods provide a powerful tool kit to support analyses graphics and visualizations that were unthinkable even a

few years ago New and increased emphasis on accessibility management processing and sharing of high quality well maintained and understandable data represents a significant change in how scientists view and treat data These issues are complex and despite their importance are typically not addressed in database ecological and statistical textbooks This book addresses these issues providing a much needed resource for those involved in designing and implementing ecological research as well as students who are entering the environmental sciences Chapters focus on the design of ecological studies data management principles scientific databases data quality assurance data documentation archiving ecological data and information and processing data into information and knowledge The book stops short of a detailed treatment of data analysis but does provide pointers to the relevant literature in graphics statistics and knowledge discovery The central thesis of the book is that high quality data management systems are critical for addressing future environmental challenges This requires a new approach to how we conduct ecological research that views data as a resource and promotes stewardship recycling and sharing of data Ecological Data will be particularly useful to those ecologists and information specialists that actively design manage and analyze environmental databases However it will also benefit a wider audience of scientists and students in the ecological and environmental sciences

Scientific and Statistical Database Management, 7th International Working Conference On ,1994 *Pattern Discovery in Biomolecular Data* Jason T. L. Wang,Bruce A. Shapiro,Dennis Shasha,1999-10-28 Finding patterns in biomolecular data particularly in DNA and RNA is at the center of modern biological research These data are complex and growing rapidly so the search for patterns requires increasingly sophisticated computer methods Pattern Discovery in Biomolecular Data provides a clear up to date summary of the principal techniques Each chapter is self contained and the techniques are drawn from many fields including graph theory information theory statistics genetic algorithms computer visualization and vision Since pattern searches often benefit from multiple approaches the book presents methods in their purest form so that readers can best choose the method or combination that fits their needs The chapters focus on finding patterns in DNA RNA and protein sequences finding patterns in 2D and 3D structures and choosing system components This volume will be invaluable for all workers in genomics and genetic analysis and others whose research requires biocomputing

New Trends in Data Warehousing and Data Analysis Stanisław Kozielski,Robert Wrembel,2008-11-21 Most of modern enterprises institutions and organizations rely on knowledge based management systems In these systems knowledge is gained from data analysis Today knowledge based management systems include data warehouses as their core components Data integrated in a data warehouse are analyzed by the so called On Line Analytical Processing OLAP applications designed to discover trends patterns of behavior and anomalies as well as finding dependencies between data Massive amounts of integrated data and the complexity of integrated data coming from many different sources make data integration and processing challenging New Trends in Data Warehousing and Data Analysis brings together the most recent research and practical achievements in the DW and OLAP technologies It provides an up to date bibliography of published works and the resource of research achievements Finally the book assists in the dissemination of knowledge in the field of advanced DW and OLAP

Next Generation Information

Technologies and Systems Ron Y. Pinter, Shalom Tsur, 2003-07-31 The Next Generation Information Technologies and Systems NGITS workshop series is a biannual event held in Israel since 1993. Like its predecessors NGITS 99 brings together active members of the international research community interested in information technology and knowledge based systems. Many of the base technologies in the traditional areas of database management systems, information retrieval and resource optimization are being deployed nowadays in novel systems and applications that flourish with the astonishing increase in computational power, storage capacity, communication and of course the advent of the world wide web. These new fronts in turn present an ever growing set of challenges to the technologies such as data availability, information integrity and knowledge extraction fuelling an exciting set of activities. Our workshop clearly reflects this trend offering a rich sample of the state of the art at the close of the millennium and a glimpse of what is to come in the next one. In response to the call for papers we received 34 high quality submissions, 22 of which were carefully selected by the Program Committee for presentation at the workshop and inclusion in these proceedings. These include 17 full length papers as well as 5 short papers that will be accompanied by demonstrations during the workshop. In addition it is our pleasure to feature two invited talks given by Professor J. Ullman of Stanford University and IBM Fellow C. Mohan. Database Technologies: Concepts, Methodologies, Tools, and Applications Erickson, John, 2009-02-28 This reference expands the field of database technologies through four volumes of in depth advanced research articles from nearly 300 of the world's leading professionals. Provided by publisher.

Moving Objects Management Xiaofeng Meng, Zhiming Ding, Jiajie Xu, 2014-04-04 Applications 2nd Edition focuses on moving object management from the location management perspective to determining how constantly changing locations affect the traditional database and data mining technology. The book specifically describes the topics of moving objects modeling and location tracking, indexing and querying, clustering, location uncertainty, traffic aware navigation and privacy issues as well as the application to intelligent transportation systems. Through the book the readers will be made familiar with the cutting edge technologies in moving object management that can be effectively applied in LBS and transportation contexts. The second edition of this book significantly expands the coverage of the latest research on location privacy, traffic aware navigation and uncertainty. The book has also been reorganized with nearly all chapters rewritten and several new chapters have been added to address the latest topics on moving objects management. Xiaofeng Meng is a professor at the School of Information Renmin University of China. Zhiming Ding is a professor at the Institute of Software Chinese Academy of Sciences (ISCAS). Jiajie Xu is an assistant professor at the ISCAS.

Unsupervised Learning Algorithms M. Emre Celebi, Kemal Aydin, 2016-04-29 This book summarizes the state of the art in unsupervised learning. The contributors discuss how with the proliferation of massive amounts of unlabeled data, unsupervised learning algorithms which can automatically discover interesting and useful patterns in such data have gained popularity among researchers and practitioners. The authors outline how these algorithms have found numerous applications including pattern recognition, market basket analysis.

web mining social network analysis information retrieval recommender systems market research intrusion detection and fraud detection They present how the difficulty of developing theoretically sound approaches that are amenable to objective evaluation have resulted in the proposal of numerous unsupervised learning algorithms over the past half century The intended audience includes researchers and practitioners who are increasingly using unsupervised learning algorithms to analyze their data Topics of interest include anomaly detection clustering feature extraction and applications of unsupervised learning Each chapter is contributed by a leading expert in the field Electronic Collaboration in Science Stephen H. Koslow, Michael F. Huerta, 2000-06 This bk offers the 1st clear comprehensive account of the scientific social challenges opportunities of electronic collaboration in science Throughout the bk illuminate their general points w concrete examples of the ways in which **Data Warehouses and OLAP** Robert Wrembel, Christian Koncilia, 2007-01-01 Data warehouses and online analytical processing OLAP are emerging key technologies for enterprise decision support systems They provide sophisticated technologies from data integration data collection and retrieval query optimization and data analysis to advanced user interfaces New research and technological achievements in the area of data warehousing are implemented in commercial database management systems and organizations are developing data warehouse systems into their information system infrastructures Data Warehouses and OLAP Concepts Architectures and Solutions covers a wide range of technical technological and research issues It provides theoretical frameworks presents challenges and their possible solutions and examines the latest empirical research findings in the area It is a resource of possible solutions and technologies that can be applied when designing implementing and deploying a data warehouse and assists in the dissemination of knowledge in this field *Scalable Input/Output* Daniel A. Reed, 2003-10-24 The major research results from the Scalable Input Output Initiative exploring software and algorithmic solutions to the I/O imbalance As we enter the decade of data the disparity between the vast amount of data storage capacity measurable in terabytes and petabytes and the bandwidth available for accessing it has created an input output bottleneck that is proving to be a major constraint on the effective use of scientific data for research Scalable Input Output is a summary of the major research results of the Scalable I/O Initiative launched by Paul Messina then Director of the Center for Advanced Computing Research at the California Institute of Technology to explore software and algorithmic solutions to the I/O imbalance The contributors explore techniques for I/O optimization including I/O characterization to understand application and system I/O patterns system checkpointing strategies collective I/O and parallel database support for scientific applications parallel I/O libraries and strategies for file striping prefetching and write behind compilation strategies for out of core data access scheduling and shared virtual memory alternatives network support for low latency data transfer and parallel I/O application programming interfaces
