Seventy Years In The Silicon Valley:

Seventy Years in the Silicon Valley Clarence Robert Tower, 2023 California's Santa Clara Valley was a wonderful place to live even before it became known worldwide as Silicon Valley the birthplace of high technology Historian author artist Bob Tower's anecdotes about growing up in Santa Clara provide an engaging easy to read history of the Valley of Heart's Delight Silicon Valley the place he's called home for more than eighty years My Seventy Years in the Silicon Valley Clarence Robert Tower, 1999 **Legendary Locals of Santa Clara** Clarence Robert Tower and Ken Lichtenstein, 2014 The city of Santa Clara lies in the very heart of the Santa Clara Valley directly south of San Francisco Bay It is the home base of the internationally famous Santa Clara Swim Club the equally famous synchronized swim team the Santa Clara Aquamaids the International Swim Center and the San Francisco 49ers professional football team It boasts world class parks theaters museums acting groups a featured chorale a nationally ranked drum and bugle corps a major theme park a convention center and a first class hotel system for those who wish to visit **Legendary Locals of Santa Clara** celebrates the people who guided all of this to its realization Reality Check Guy Kawasaki, 2008 For nearly three decades Guy Kawasaki has earned a stellar reputation as an entrepreneur venture capitalist and irreverent pundit His 2004 bestseller *The Art of the Start* has become the most acclaimed bible for small businesses and his blog is one of the 50 most popular in the world Now Kawasaki has compiled his best wit wisdom and contrarian opinions in handy book form from competition to customer service innovation to marketing he shows readers how to ignore fads and foolishness while sticking to common sense practices *Seventy Years in the Silicon Valley* Tower Clarence Robert (author), 1901 **A Uterus Is a Feature, Not a Bug** Sarah Lacy, 2017-11-14 A rallying cry for working mothers everywhere that demolishes the distracted emotional weak stereotype and definitively shows that these professionals are more focused decisive and stronger than any other force Working mothers aren't a liability They are assets you and every manager and executive want in your company in your investment portfolio and in your corner There is copious academic research showing the benefits of working mothers on families and the benefits to companies who give women longer and more flexible parental leave There are even findings that demonstrate women with multiple children actually perform better at work than those with none or one Yet despite this concrete proof that working mothers are a lucrative asset they still face the Maternal Wall widespread unconscious bias about their abilities contributions and commitment Nearly eighty percent of women are less likely to be hired if they have children and are half as likely to be promoted Mothers earn an average 11 000 less in salary and are held to higher punctuality and performance standards Forty percent of Silicon Valley women said they felt the need to speak less about their family to be taken more seriously Many have been told that having a second child would cost them a promotion Fortunately this prejudice is slowly giving way to new attitudes thanks to more women starting their own businesses and companies like Netflix Facebook Apple and Google implementing more parent friendly policies But the most important barrier to change isn't about men Women must rethink

the way they see themselves after giving birth As entrepreneur Sarah Lacy makes clear in this cogent persuasive analysis and clarion cry the strongest most lucrative and most ambitious time of a woman s career may easily be after she sees a plus sign on a pregnancy test

Measured Success Peter Cebon,2008-07-15 For several years Australia has been slipping behind the rest of the OECD in its rate of business innovation If as economists believe innovation is the fundamental driver of prosperity this is a harbinger of long term problems for the country To find a successful way forward we need to understand the nature and limitations of our innovation achievements Measured Success analyses eleven cases of Australian high technology innovation exploring where we have gone right and where more could have been achieved Drawing lessons from both the successes and failures the authors provide valuable insights into Australian innovation management and the challenges that lie ahead Measured Success is an important commentary on the state of innovation in Australia and offers fresh direction for policy in this area

Unretirement Chris Farrell,2014-09-02 The budget battles of recent years have amplified the warnings of demographic doomsayers who predicted that a wave of baby boomers would bleed America dry bankrupting Social Security and Medicare as they faded into an impoverished old age On the contrary argues award winning journalist Chris Farrell we are instead on the verge of a broad positive transformation of our economy and society The old idea of retirement a word that means withdrawal describing a time when people gave up productive employment and shrank their activities was a short lived historical anomaly Humans have always found meaning and motivation in work and community Farrell notes and the boomer generation poised to live longer in better health than any before is already discovering unretirement extending their working lives with new careers entrepreneurial ventures and volunteer service Their experience wisdom and importantly their continued earnings will enrich the American workplace treasury and our whole society in the decades to come Unretirement not only explains this seismic change now in its early stages it provides key insights and practical advice for boomers about to navigate this exciting but unsettled new frontier drawing on Chris Farrell s decades of covering personal finance and economics for Bloomberg Businessweek and Marketplace Money This will be an indispensable guide to the landscape of unretirement from one of America s most trusted experts

A Year of Movies Ivan Walters,2015-11-12 While watching a movie how many viewers notice some of the finer details of the film such as the time of day during a scene or even the date itself For instance does anyone remember what day detention is served by the high schoolers in *The Breakfast Club* or can guess when aliens first make their presence known in *Independence Day* And perhaps only history buffs or fanatics of Leonardo DiCaprio can cite the exact date the Titanic sunk In *A Year of Movies* 365 Films to Watch on the Date They Happened Ivan Walters provides a selection for every day on the calendar in which at least some of the events in the film take place For some films the entire drama occurs on a very specific day For other films such as *The Right Stuff* the date in question is represented in a key scene or two or even for just a few pivotal seconds Certain films to be sure are obvious candidates for inclusion in this book What other movie would make sense to watch on February

2nd than Groundhog Day Is there a more appropriate film to consider for June 6th than The Longest Day Representing a variety of genres from comedies and dramas to westerns and film noir these films offer fans a unique viewing opportunity While helping viewers decide what to watch on a given day this book will also introduce readers to films they may not have otherwise considered Aimed at film buffs and casuals viewers alike A Year of Movies is also an ideal resource for librarians who want to offer creative programming for their patrons

Behind the Startup Benjamin Shestakofsky, 2024-03-19 As dreams of our technological future have turned into nightmares some blame harmful algorithms or greedy CEOs for the negative consequences of innovation Behind the Startup takes a different approach Drawing on 19 months of participant observation research inside a successful Silicon Valley startup this book examines how the company was organized to meet the needs of the venture capital investors who funded it Investors push startups to scale as quickly as possible to inflate the value of their asset I show how these demands created organizational problems that managers could only solve by combining high tech systems with low wage human labor With its focus on the financialization of innovation Behind the Startup explains how the gains generated by Silicon Valley companies are funneled into the pockets of a small cadre of elite investors and entrepreneurs Readers will come away from the book with the understanding that if we want to promote innovation that benefits the many rather than the few we need to focus less on fixing the technology and more on changing the financial infrastructure that supports it

Lighthouse Shadows of an unseen world pulling him toward answers he isn't sure he wants to find As he wrestles with his past and an uncertain future Demir is forced to confront the one question that has haunted him all along Is there a way out or is he destined to keep falling A gripping darkly poetic exploration of burnout loneliness and the quiet battles we fight within ourselves blurring the line between reality and something far more ancient **The Ghost Forest** Greg King, 2023-06-06 The definitive story of the California redwoods their discovery and their exploitation as told by an activist who fought to protect their existence against those determined to cut them down Every year millions of tourists from around the world visit California's famous redwoods Yet few who strain their necks to glimpse the tops of the world's tallest trees understand how unlikely it is that these last isolated groves of giant trees still stand at all In this gripping historical memoir journalist and famed redwood activist Greg King examines how investors and a growing U.S. economy drove the timber industry to cut down all but 4 percent of the original two million acre redwood ecosystem King first examined redwood logging in the 1980s as an award winning reporter What he found in the woods convinced him to leap the line of neutrality and become an activist dedicated to saving the very last ancient redwood groves remaining in private hands The land grab began in 1849 when a green gold rush of migrants came to exploit the legendary redwoods that grew along the Russian River Several generations later in 1987 Greg King discovered and named Headwaters Forest at 3,000 acres the largest ancient redwood habitat remaining outside of parks and he led the movement to save this grove After a decade of one of the longest most dramatic and violent environmental campaigns in US history in 1999 the state and federal governments protected Headwaters Forest The Ghost Forest explores a central question an overhanging mystery What was it like this botanical Elysium that grew only along the Northern California coast a forest so spectacular but also uniquely valuable as a cornerstone of American economic growth that in the end it would inspire life and death struggles Few but loggers and surveyors ever saw such magnificent trees ancient sentinels that like ghosts have informed King's understanding of the world On a lifelong journey King finds himself through the generations and through the trees A Next Big Idea Club Must Read Title **Stumbling Giant** Timothy Beardson, 2013-05-21 A thoughtful reconsideration of China's actual place in the new world order based on reality rather than fanciful speculation Kirkus Reviews Can anything prevent China surpassing the United States and becoming the world's top superpower While predictions that China's rise to global supremacy is a near certainty have resulted in this belief becoming almost conventional wisdom this book boldly counters such widely held assumptions Investment strategist Timothy Beardson brings to light the daunting array of challenges that today confront China as well as the inadequacy of the policy responses Threats to China come on many fronts Beardson shows and by their number and sheer weight these problems will thwart any ambition to become the world's Number One power Drawing on extensive research and experience living and working in Asia over the last 35 years the author spells out China's situation an inexorable demographic future of a shrinking labor force relentless aging extreme gender disparity and even a falling population Also the nation faces social instability a

devastated environment a predominantly low tech economy with inadequate innovation the absence of an effective welfare safety net an ossified governance structure and radical Islam lurking at the borders Beardson s nuanced firsthand look at China acknowledges its historic achievements while tempering predictions of its imminent hegemony with a no nonsense dose of reality Why Cities Matter Stephen T.
