Severe And Unusual Weather:

Understanding Severe and Unusual Weather Joe R. Eagleman, 2021-01-04 An understanding of severe and unusual weather should be a fundamental part of everyone's storehouse of knowledge. We live in a world that is at least occasionally dominated by severe and unusual weather. Many types of severe weather are sufficiently rare that a common defense mechanism of many people is to assume that they will never be directly affected. However, there is hardly a place in the whole world that does not have some peculiar aspect of weather that requires some degree of understanding and preparedness in order to avoid loss of property and perhaps even life itself. Fortunately, no particular location has all the different kinds of unusual and severe weather; thus, coastal areas are exposed to the tremendous power of the hurricane that brings high winds and frequently produce flood conditions, while within the interior United States, where hurricanes are not a threat, such severe types of weather as tornadoes, hailstorms, and blizzards are sufficiently frequent that an understanding of these storms is essential when traveling or living in this part of the United States. Although lightning is a greater hazard in some parts of the world than others, there are very few locations, including Alaska and the Desert Southwest, where occasional severe thunderstorms do not develop numerous lightning strokes. A proper understanding is important for flash flooding, derechos, mountain waves, haboobs, and other unusual weather. People have different responses to everyday weather, from resistant to feeling dominated by it. You can find your level of response from a self-test that is provided.

Severe and Unusual Weather Jessie Ann Foley, 2025-05-13 In this poignant novel, a young girl leaves her troubled home and, while investigating a destructive tornado with the class outcast, learns the importance of letting her guard down. A must-read for fans of Erin Entrada Kelly, Dan Gemeinhart, and Corey Ann Haydu, Nadine has rules for surviving as the new kid: Keep your head down. Mind your own business. Don't stick your neck out for anyone. Especially not for Francis Pepper, the boy everyone in school picks on. Nadine just wants to get through the rest of the year without any trouble. She knows that once her mom is out of rehab, it'll be back to the unpredictable in Chicago. But when she's paired with Francis for a project about Centralia, Illinois, her new hometown, she's drawn to his story. Francis was born the exact day that a tornado, the Great Tornado of the New Millennium GTNM, destroyed the area. The cyclone even killed his mom. Then Nadine finds a mysterious book that contains instructions for channeling weather. Before she can blink, she and Francis are caught in the swirling whispers and lies that surround the GTNM. Try as they might, they can't figure out two things: Who would want to summon a tornado to Centralia? And why would they want to hurt Francis's family?
