

SEX, EVOLUTION & BEHAVIOR

Martin Daly & Margo Wilson

Sex Evolution And Behavior

John Bancroft

Sex Evolution And Behavior:

Sex, Evolution, and Behavior Martin Daly, Margo Wilson, 1983 This text provides an elementary level discussion of recent theory relating to the evolutionary and adaptive aspects of reproductive behaviour The relation between ultimate and proximate levels of explanation is the major theme of the book Two new chapters in this edition incorporate findings from recent research and there is also new material on humans physiology and development Sex and reproductive behaviour are examined from an evolutionary comparative perspective and numerous empirical studies and examples are cited *Sex, Evolution, and Behavior* Martin Daly, 1978 *Evolution and Human Sexual Behavior* Peter B. Gray, 2013-04-01 A comprehensive survey of the evolutionary science of human sexual behavior *Evolution and Human Sexual Behavior* invites us to imagine human sex from the vantage point of our primate cousins in order to underscore the role of evolution in shaping all that happens biologically and behaviorally when romantic passions are aroused **Spent** Geoffrey Miller, 2010 A leading evolutionary psychologist probes the unconscious instincts behind American consumer culture Illuminating the hidden reasons for why we buy what we do *Spent* applies evolutionary psychology to the sensual wonderland of marketing and perceived status that is American consumer culture Geoffrey Miller starts with the theory that we purchase things to advertise ourselves to others and then examines other factors that dictate what we spend money on With humor and insight Miller analyzes an array of product choices and deciphers what our decisions say about ourselves giving us access to a new way of understanding and improving our behaviors to become happier consumers *Biopolitics and Gender* Meredith W Watts Jr, 2012-12-06 Here is an important book for social scientists interested in the influence of gender on certain types of behavior Several perspectives are presented on the general topic of biopolitics and gender including the points of view of brain science endocrinology ethology psychophysiology and such conventional interests as political attitudes socialization participation social structure and political hierarchy The varied and provocative ideas explored in this volume will broaden discussions of gender beyond an exclusive focus on sex links to oppression and discrimination *Why Sex Matters* Bobbi S. Low, 2015-01-04 Why are men like other primate males usually the aggressors and risk takers Why do women typically have fewer sexual partners In *Why Sex Matters* Bobbi Low ranges from ancient Rome to modern America from the Amazon to the Arctic and from single celled organisms to international politics to show that these and many other questions about human behavior largely come down to evolution and sex More precisely as she shows in this uniquely comprehensive and accessible survey of behavioral and evolutionary ecology they come down to the basic principle that all organisms evolved to maximize their reproductive success and seek resources to do so but that sometimes cooperation and collaboration are the most effective ways to succeed This newly revised edition has been thoroughly updated to include the latest research and reflect exciting changes in the field including how our evolutionary past continues to affect our ecological present *Human Sexuality* Ami Rokach, Karishma Patel, 2021-01-22 Human sexuality touches us all pun intended We all either enjoy it struggle

with it or may have been victims of it Sexuality is not just about sex but about human sexual function the physiology of sex the hormones involved and how they affect us and the cultural norms related to it Sexual function and dysfunction are closely tied to one's self esteem self respect and to relationships with intimate partners Human Sexuality Function Dysfunction Paraphilias and Relationships explores the interplay of intimacy and sexuality how it can enhance relationships and how it can negatively affect them or be affected by them When individuals or partners encounter sexual problems or dysfunctions it can have a long lasting affect both biologically and psychologically Dr Rokach explores the causes and the reasons that these dysfunctions are maintained and successful treatment methods Chapters on sexual offenses and paraphilias and what treatment options are available to sexual offenders are also included This book is the first book to place sexuality where it belongs within the context of relationships demonstrating how sexuality relates to intimacy by both enhancing and negatively affecting it Explains psychological biological and sociological theories of sexuality Addresses sexual dysfunctions according to various models of sex therapy Discusses the biological developmental and sociological theories of sexual orientation Explores the specific hormones in male and female sexual behavior *The Princeton Guide to Evolution* David A. Baum, Douglas J. Futuyma, Hopi E. Hoekstra, Richard E. Lenski, Allen J. Moore, Catherine L. Peichel, Dolph Schluter, Michael C. Whitlock, 2017-03-21

The essential one volume reference to evolution The Princeton Guide to Evolution is a comprehensive concise and authoritative reference to the major subjects and key concepts in evolutionary biology from genes to mass extinctions Edited by a distinguished team of evolutionary biologists with contributions from leading researchers the guide contains some 100 clear accurate and up to date articles on the most important topics in seven major areas phylogenetics and the history of life selection and adaptation evolutionary processes genes genomes and phenotypes speciation and macroevolution evolution of behavior society and humans and evolution and modern society Complete with more than 100 illustrations including eight pages in color glossaries of key terms suggestions for further reading on each topic and an index this is an essential volume for undergraduate and graduate students scientists in related fields and anyone else with a serious interest in evolution Explains key topics in some 100 concise and authoritative articles written by a team of leading evolutionary biologists Contains more than 100 illustrations including eight pages in color Each article includes an outline glossary bibliography and cross references Covers phylogenetics and the history of life selection and adaptation evolutionary processes genes genomes and phenotypes speciation and macroevolution evolution of behavior society and humans and evolution and modern society Human Reproductive Behaviour Laura Betzig, Monique Borgerhoff Mulder, Paul Turke, 1988-03-31 **The MIT Encyclopedia of the Cognitive Sciences (MITECS)** Robert A.
