Peasant Power In China The Era Of Rural Reform 1979 1989:

Peasant Power in China Daniel Roy Kelliher, 1992 From 1979 1989 rural life in China was transformed communes were dismantled and government domination eased From field work in Hubei and south central China Kelliher traces the origins of reform in family farming marketing and private entrepreneurship and shows how peasants instigated reform **Peasant Power in China** Daniel Kelliher, 1992-11-25 Between 1979 and 1989 rural life in China was transformed the communes were dismantled tiny family farms were created government domination of commerce and enterprise was eased and many entrepreneurial ventures were brought to life China's rural reform was arguably the most massive single act of privatization in history Although Deng Xiaoping's government claimed credit for the dramatic innovations Daniel Kelliher shows that it was the peasants themselves with no organization or legal political voice of their own who instigated the most radical changes of the reform era Drawing on his fieldwork in Hubei Province and neighboring provinces in south central China Kelliher traces the origins of reform in three areas family farming marketing and private entrepreneurship and details the local conspiracies deceptions and illegal experiments that peasants used to push state policy in new directions He also addresses the larger issue of how disenfranchised peasants could affect politics at all under a strong state like that of China Analyzing the evolution of state socialism in China Kelliher explains how state ambitions for modernization in the post Mao era made the state socialist system vulnerable to rising peasant power He also shows why the state seized upon economic privatization as a way of securing its political base among the peasantry The book not only offers a wide ranging portrait of rural politics in contemporary China but also uses the Chinese case to illuminate state peasant relations reform in state socialism and privatization in other third world nations **Paradoxes of Post-Mao Rural Reform** Frederick C. Teiwes, Warren Sun, 2015-12-22 The decollectivization of Chinese agriculture in the early post Mao period is widely recognized as a critical part of the overall reform program But the political process leading to this outcome is poorly understood A number of approaches have dominated the existing literature 1 a power policy struggle between Hua Guofeng's alleged neo Maoists and Deng Xiaoping's reform coalition 2 the power of the peasants and 3 the leading role of provincial reformers The first has no validity while second and third must be viewed through more complex lenses This study provides a new interpretation challenging conventional wisdom Its key finding is that a game changer emerged in spring 1980 at the time Deng replaced Hua as CCP leader but the significant change in policy was not a product of any clash between these two leaders Instead Deng endorsed Zhao Ziyang's policy initiative that shifted emphasis away from Hua's pro peasant policy of increased resources to the countryside to a pro state policy that reduced the rural burden on national coffers To replace the financial resources policy measures including household farming were implemented with considerable provincial variations The major unexpected production increases in 1982 confirmed the arrival of decollectivization as the template on the ground The dynamics of this policy change has never been adequately explained **Paradoxes of Post Mao Rural Reform** offers a deep

empirical study of critical developments involving politics from the highest levels in Beijing to China's villages and in the process challenges many broader accepted interpretations of the politics of reform. It is essential reading for students and scholars of contemporary Chinese political history.

China's Long March to Freedom Kate Zhou, 2017-09-08. China is more than a socialist market economy led by ever more reform-minded leaders. It is a country whose people seek liberty on a daily basis. Their success has been phenomenal despite the fact that China continues to be governed by a single party. Clear distinctions between the people and the government are emerging, underlining the fact that true liberalization cannot be imposed from above. Although a large percentage of the Chinese people have been part of China's long march to freedom, farmers, entrepreneurs, migrants, Chinese gays, sex pleasure seekers, and black marketers played a particularly important role in the beginning. Lawyers, scholars, journalists, and rights activists have jumped in more recently to ensure that liberalization continues. Social dissatisfaction with the government is now published in the media, addressed in public forums, and deliberated in courtrooms. Intellectuals devoted to improvement in human rights and continued liberalization are part of the process. This grassroots social revolution has also resulted from the explosion of information available to ordinary people, especially via the Internet and far-reaching international influences. All have fundamentally altered key elements of the moral and material content of China's party-state regime and society at large. This social revolution is moving China towards a more liberal society despite its government. The Chinese government reacts rather than leads in this transformative process. This book is a landmark a decade in the making.

Central Control and Local Discretion in China Chae-ho Chŏng, 2000. This book analyses the decollectivization reform in China during the early 1980s in order to gauge the impact of post-Mao decentralization on central control and provincial discretion. The volume challenges the notion that the decision to decentralize administrative authority ipso facto produces local discretion properly keyed to local conditions. In fact, outcomes often differ from the intended goals. While generally local interests and central local clientilistic networks determine the policy responses of the provinces, bureaucratic careerism also plays a crucial role. In the case of post-Mao decollectivization, national-level analyses suggest that a majority of provinces adopted household farming neither too quickly nor too slowly, since both pioneering and resisting entailed potentially enormous political risks. Once Beijing's preference appeared firmly fixed, however, they all quickly bandwagoned by popularizing the policy as swiftly as possible. Three detailed case studies of Anhui as a pioneer, Shandong as a bandwagoner, and Heilongjiang as a resister further highlight the evolutionary process in which provincial variations came to be replaced by uniform compliance imposed by Beijing. Theoretically, this study contends that the overall scope of local discretion is circumscribed by the dominant norms and incentive relations embedded in the implementation dynamics. Methodologically, the book employs a combination of aggregate analyses and comparative case studies. Empirically, on the basis of newly available materials, including classified documents and interviews, it challenges the peasant power school, which has somehow allowed local governments to evaporate in its descriptions of post-Mao

publications and interview data this book seeks to re-examine the ever-changing but under-researched societal dynamics driving social transformations in China from 1964 when the communist heir narrative was rebranded and utilised to 2000 when Jiang Zemin formulated the Three Represents theory to modify the ideological political thinking of China's ruling elites. This analysis focuses on how a high proportion of aspirational citizens have kept repositioning themselves in China's changing distributions of social resources and social structure how their attitudes and behaviours have been shaped over time what characteristics of their choices are at different stages and how their preferences have resulted in the zig-zag patterns of China's recent social change.
