Featuring some of the field's most expert thinkers this is an adroitly constructed volume of essays in conflict and security law The writing here offers a distillation of the major legal projects in the area while dissolving some of international law's most rigid demarcations e.g. between war and peace or the *jus ad bellum* and *jus in bello* Gerry Simpson University of Melbourne Australia A most important and timely collection of essays that places the established international rules in their modern and challenging context Philippe Sands QC University College London UK Events of the past fifteen years have sharpened the focus on well known issues in international conflict and security law What responses to international terrorism are permissible Can humanitarian intervention be justified under international law The Research Handbook on International Conflict and Security Law addresses these and other debates across the areas of conflict prevention use of force and post conflict reconstruction with the critical insight for which the contributors are known James Crawford University of Cambridge UK This innovative Research Handbook brings together leading international law scholars from around the world to discuss and highlight the contemporary debate regarding issues of conflict prevention and the legality of resorting to the use of armed force through to those arising during an armed conflict and in the phase between conflict and peace The Handbook covers key conceptual topics drawn from across the three areas of *jus ad bellum* *jus in bello* and *jus post bellum* The subject matter of the included chapters range from conflict prevention through to reparation and compensation via coverage of issues such as disarmament the role of the Security Council self defence humanitarian intervention and the responsibility to protect targets war crimes private military contractors peacekeeping and the protection of human rights
