

A vibrant, futuristic illustration of a city street. In the foreground, a man in a grey jacket holds a smartphone, looking down at it. The street is filled with people walking, some carrying bags. In the background, there are tall, modern buildings. The sky is filled with various flying vehicles: a large drone with a camera, several smaller drones, and a sleek, futuristic car. The scene is overlaid with a large, stylized text title. The overall color palette is dominated by blues, greys, and oranges, giving it a high-tech, urban feel.

Responsible Technology Stephen V. Monsma, Calvin Center for Christian Scholarship, 1986 This is a print on demand book and is therefore non returnable This book provides a multi disciplinary Christian analysis of the forces shaping the operation of modern technology and offers an alternative framework of biblically rooted normative principles It argues that technology is a value laden activity and presents principles for basing it on God s will **Prophecy in a Technocratic Era**

Arend Theodoor van Leeuwen, 1965 **Hope in the Thought of Jacques Ellul** Lawrence J. Terlizese, 2005-10-30

Hope expresses more than an area of concentration in Ellul s thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world s embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul s thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction **Reclaiming Democracy** Marguerite

Scientists as Prophets Lynda Walsh, 2013-06-11 Why did an atheist like Carl Sagan talk so much about God Why does NASA climatologist James Hansen plead with us in his recent book not to waste Our Last Chance to Save Humanity Because science advisors are our new prophets Lynda Walsh argues in Scientists as Prophets A Rhetorical Genealogy She does not claim as some scholars have that these public scientists push scientism as a replacement for religion Rather she puts forth

the provocative argument that prophetic ethos is a flexible type of charismatic authority whose function is to manufacture certainty Scientists aren't our only prophets Walsh contends but science advisors predictably perform prophetic ethos whenever they need to persuade their publics to take action or fund basic research Walsh first charts the genealogy of this hybrid scientific prophetic ethos back to its roots in ancient oracles before exploring its flourishing in 17th century Europe She then tracks its performances and mutations through several important late modern events in America Robert Oppenheimer's role in the opening of the atomic age Rachel Carson's interventions in pesticide use the mass media polemics of science popularizers such as Carl Sagan Stephen Hawking and Stephen Jay Gould and finally the UN's climate change panel and their role in Climategate Along the way Walsh highlights the special ethical and political defects embedded in the genealogy of the scientist prophet and she finishes by evaluating proposed remedies She concludes that without a radical shift in our style of deliberative policy making there is little chance of remedying the dysfunctions in our current science advising system A cogent rhetorical analysis of over 1 000 archival documents from 10 historic cases Scientists as Prophets engages scholars of scientific rhetoric history and literacy but is also accessible to readers interested in the roots of current political debates about the environment nuclear energy and science education Religious Pluralism and World Community
