Quality of Work Life and Organisational Citizenship Behaviour of Faculty Members in Higher Learning Centres in Kerala Dr. Jyothilakshmi , Dr. Ebby Joseph Idicula & Dr. Rajesh P., 2024-12-03 Teachers are the pillars of education The education system can excel with its effective measures

only by the effective performance of teachers. If the teachers are inefficient and indifferent, no educational institution, even with an excellent infrastructure and a good curriculum, can achieve its goal. Teachers not only inculcate the various subjects of study into students but they also mould a quality generation for the nation. According to the American Commission on Teacher Education, 1974, 'The quality of a nation depends upon the quality of its citizens and the quality of its citizens depends upon the quality of their teachers. Teachers are the ones who contribute to the social reconstruction of the country. They play a crucial role, not as a mere transmitter of knowledge and culture but as a changing agent.' Our former president and eminent educationist Dr S Radhakrishnan says, 'Teachers place in society is of vital importance.' Personnel Bibliography Series, United States. Office of Personnel Management. Library, 1979.

**QUALITY OF WORK LIFE - AN OVERVIEW ON BANKING SYSTEM** Dr. Sudhanshu Pandiya, 2015-01-01. This book is an outcome of banking activities regarding analyzing the implications that new forms of work organization have for the different aspects of conditions of employment such as hours of work, the intensification of work and health at the workplace, pay systems, security of employment, work and family, and social dialogue. The organization of work has great implications for the quality of work life and this is clearly demonstrated by the ongoing study on changes in work organization in the direction of greater flexibility and their potential and actual effects on employees. While it is widely assumed that flexible forms of work organization can have desirable influences on both the banks and its employees, these outcomes are often not realized in practice. Even when a new form of work organization results in positive outcomes overall, the gain is not always shared by all the participants involved. In many cases, some workers benefit from the change but others do not. Thus, changes in work organization, i.e. implementing quality of work life programmes, should be approached from the perspective of employees as well as employers in order to allow their social implications to be fully explored.
