Social Citizenship in an Age of Welfare Regionalism Mark Simpson, 2022-06-30 This book presents a socio legal examination of

national and devolved level developments in social protection in the UK through the eyes of politicians and officials at the heart of this process Since its inception in 1998 devolution has altered the character of the UK welfare state with dramatic change in the 10 years since 2010 A decade of austerity at national level has exposed diverging view in how governments in London Edinburgh and Belfast view the social rights of citizenship This political divide has implications for both social security law as the devolved countries begin to flex their muscles in this key area for citizens economic welfare and the constitutional settlement The book reflects on the impact of austerity the referendum on Scottish independence and subsequent changes to the devolution settlement Northern Ireland s hesitant moves away from parity with Westminster in social protection withdrawal from the European Union Brexit and the possible retreat from austerity during the COVID 19 pandemic The social union may or may not be weakening its character is unquestionably changing and the book lays bare the ideological and pragmatic considerations driving legal developments TH Marshall s theory of citizenship provides the lens through which these processes are viewed while itself being reinterpreted in light of the national government s increasing delegation of responsibility for social rights whether to individuals the voluntary sector or lower tiers of government

Nationalism and Social Policy Daniel Béland, André Lecours, 2010-08-12 Despite the recent proliferation of literature on nationalism and on social policy relatively little has been written to analyse the possible interaction between the two Scholars interested in social citizenship have indirectly dealt with the interaction between national identity and social programs such as the British NHS but they have seldom examined this connection in reference to nationalism Specialists of nationalism rarely mention social policy focusing instead on language culture ethnicity and religion The main objective of this book is to explore the nature of the connection between nationalism and social policy from a comparative and historical perspective At the theoretical level this analysis will shed new light on a more general issue the relationships between identity formation territorial politics and social policy Although this book refers to the experience of many different countries the main cases are three multinational states that is states featuring strong nationalist movements Canada Quebec the United Kingdom Scotland and Belgium Flanders The book looks at the interplay between nationalism and social policy at both the

state and sub state levels through a detailed comparison between these three cases In its concluding chapter the book brings in cases of mono national states i e France Germany Sweden and the United States to provide broader comparative insight on the meshing of nationalism and social policy The original theoretical framework for this research is built using insight from selected scholarship on nationalism and on the welfare state The Politics of Belgium Marleen Brans,Lieven De Winter,Wilfried Swenden,2013-09-13 For too long Belgium remained an unexplored terrain by comparative political scientists Belgium s politics were best known through the writings of Arend Lijphart who considered it a model case of consociationalism Over the past ten to fifteen years the analysis of consociationalism has been complemented by a more detailed coverage of Belgium s spectacular transformation process from a unitary into a federal state moving rapidly now to disintegration Likewise several peculiar aspects of Belgian politics such as the record fragmentation of its party system have been covered in edited volumes or international journals However given the complexity of the Belgian configuration of political institutions and actors any inclusion of particular aspects of the Belgian case in comparative work calls for an in depth and integrated understanding of the broader political system This is the first book which provides such an analysis It brings together a team of 19 political scientists and sociologists who aim to explain the dynamics and incentives of institutional change and seek to analyze the intricate interplay between the main institutional components of the Belgian body politic The sociological political and institutional determinants and the consequences of the federalisation process of Belgium is the central theme that links each of the individual chapters This book will be essential reading for students who want to understand the politics of Belgium and for anyone with a strong interest in West European Politics comparative politics and comparative federalism This book was published as a special issue of West European Politics
