Regional Great Powers In International Politics:

Regional Great Powers in International Politics Iver B. Neumann, 1992-01-01 This book illuminates the complex interplay between specifically regional concerns and the wider international context which together define the regional hierarchy of states On top of that hierarchy is the regional great power Building on seven case studies of Brazil India Indonesia Israel Poland South Africa and Vietnam the authors demonstrate how this status cannot be attained simply by building up a huge military or economic power base The attitudes and ambitions of the aspiring state its regional neighbours and the great powers with global interests and reach must all be taken into consideration The sheer number of factors which sustain regional great powerhood makes that status a precarious one Although the end of the cold war may open up new regional space for regional great powers to exploit and so make them more important in providing for regional order the autonomy of regions may still easily be overestimated

power is often expected to have a positive influence on region specific problems of conflict economic deprivation and political instability In reality an achievement expectations gap can be seen in many regional powers which can be analysed and understood through observable variation in regional power The author discovers that in addition to the management of the internal regional order regional powers have to establish individuality whilst fitting into the global international environment altering both regional dynamics and creating variance in the level of control within the region Elucidating concepts and definitions this book is an accessible and in depth study that both introduces key concepts and provides a framework for the future study of regional power in international relations Redefining Regional Power in International Relations will be of interest to students and scholars of regionalism and international relations Regional Security Structures in Asia Ashok Kapor, 2018-10-24 Kapor argues that explanations of international relations in Asia in the post Second World War period have relied too much on the Cold War as a key explanatory factor and have not given enough emphasis to the useful concepts of regional power formation conflict formation and conflict resolution The author outlines these concepts and goes on to elaborate on them and to apply them to three key Asian regions northeast southeast and south Asia discussing practical strategic issues in an historical perspective and arguing that these concepts and other concepts which he discusses are extremely helpful in making sense of the complex pattern of international relations in Asia **Iran-Turkey Relations, 1979-2011** Suleyman Elik, 2013-03 This book explores the diplomatic security and energy relations of Turkey and Iran analysing the impact of religious political and social transformation on their bilateral relationship It examines Turkey and Iran s security relations with the wider Middle East including the Kurdish Turkish War the Kurdish Iranian War and the Kurdish Arab War and their impact on regional politics *Regional and International Cooperation in South America After COVID* Melisa Deciancio, Cintia Quiliconi, 2022-07-22 This volume analyses South American regional and international cooperation during the COVID19 crisis started in 2020 Across thirteen chapters a collection of leading experts address how regional collaboration has developed evolved and recoiled The chapters explore the state of regionalism at the pandemic surge and the challenges and opportunities this situation has opened for regional and international cooperation Authors analyze the role of extra regional powers and traditional regional leaders during the pandemic identifying the extent to which regional cooperation has been possible across several policy agendas They argue that fragmented visions of regionalism ideological polarization and weak leadership has prevailed from before the pandemic which accompanied by adverse interactions among major powers has ensured that cooperation has remained bilateral rather than regional Ultimately all these factors have created a complex scenario in which disintegration dynamics have emerged darkening even more the South American regional panorama *Regional and International Cooperation in South America After COVID* will be an invaluable resource for students scholars and policy specialists of regionalism and regional integration Latin American studies international relations and international political economy **The International Politics of EU-China Relations**

Liu Fei, 2007-12-13 The EU China relationship is fast developing in its own context and in the wider context of international politics In these essays major scholars from Europe and China debate the nature problems and potential of the emerging strategic relationship between these two international actors The New International Politics of South Asia Vernon Hewitt, 1997-09-15 Revised and substantially updated The new international politics of South Asia argues that the politics of the individual states of South Asia cannot be understood without reference to the regional and international context The author emphasises the need to consider rapid political social and economic change in the context of debates over ethnic identity and changes within the international system following the collapse of the Soviet Union Recent changes have opened up new opportunities for the region but have also exposed specific weaknesses The author discusses India s evolving relationship with the international economic system economic reforms in Pakistan and Sri Lanka as well as key issues such as the regional position on the NPT treaty the Comprehensive Test Ban treaty environmental issues and the post Cold War world order **South Asian Insecurity and the Great Powers** Barry Buzan, Gowher Rizvi, Rosemary Foot, 1986-06-18

Regions, Power, and Conflict William R. Thompson, Thomas J. Volgy, Paul Bezerra, Jacob Cramer, Kelly Marie Gordell, Manjeet Pardesi, Karen Rasler, J. Patrick Rhamey Jr., Kentaro Sakuwa, Rachel Van Nostrand, Leila Zakhirova, 2022-08-16 The three main levels of analysis in international relations have been the systemic the national and the individual A fourth level that falls between the systemic and the national is the region It is woefully underdeveloped in comparison to the attention afforded the other three Yet regions tend to be distinctive theaters for international politics Otherwise we would not recognize that Middle Eastern interstate politics somehow does not resemble Latin American interstate politics or interstate politics in Southern Africa although once the Middle East and Southern Africa may have seemed more similar in their mutual fixation with opposition to domestic policies in Israel and South Africa respectively This book divided into three parts first makes a case for studying regional politics even though it must also be appreciated that regional boundaries are also hazy and not always easy to pin down empirically The second part examines power distributions within regions as an important entry point to studying regional similarities and differences Two emphases are stressed One is that regional power assessments need to be conditioned by controlling for weak states which are more common in some regions than they are in others The other emphasis is on regional power hierarchies Some regions have strong regional hierarchies while others do not Regions with strong hierarchies operate much differently from those without them in the sense that the former are more pacific than the latter The third part of the book focuses on regional differences in terms of conflict behavior order preferences rivalries and rivalry termination *The Oxford Handbook of Peaceful Change in International Relations* T. V. Paul, Deborah Welch Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur

yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors evaluate the peaceful change that occurred in the world s key regions In the final part the editors address prospective research agenda and trajectories on this important subject matter
