Globalization and Capitalist Geopolitics Daniel Woodley, 2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non western states to challenge and overcome domination of the rest of the world by the West This book argues that although the US continues to preside over a quasi imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining

leading approaches to globalization and political economy in international relations and international political economy

Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order

Regional Aspects of Monetary Policy in Europe Jürgen von Hagen, Christopher J. Waller, 2013-04-17 Monetary union has dawned in Europe Now that the common currency is a reality questions concerning the practical conduct of monetary policy in the European Monetary Union EMU are moving to the forefront of the policy debate Among these one of the most critical is how the new monetary union will cope with the large heterogeneity of its member economies Given the large differences in economic and financial structures among the EMU member states monetary policy is likely to affect different member economies in different ways

Regional Aspects of Monetary Policy in Europe collects the proceedings of an international conference held at the Center for European Integration Studies of the University of Bonn dedicated to this issue The contributions to this conference fall into two parts The first part consists of empirical and theoretical studies of the regional effects of monetary policy in heterogeneous monetary unions The second part consists of papers analyzing the political economy of monetary policy in a monetary union of heterogeneous regions or member states The papers all support the conclusion that regional differences in the responses to a common monetary policy will make European monetary policy especially difficult in the years to come Such differences arise from a variety of sources and they cannot be expected to be mere teething troubles that will disappear after a while Even if they were ignored in the run up to the EMU Europe's central bankers and economic policy makers will have to learn how to cope with such differences in the future

Regional Integration, Economic Development and Global Governance Ulrich Volz, 2011 This book explores a central issue of the world economy today the role of regional integration for economic development and global governance The importance of this issue comes from the fact that the globalisation process that we have been experiencing in recent decades is also a process of open regionalism To what extent does this process contribute to development The reader will find many interesting answers to this question in the book which is an outstanding contribution to this debate I welcome its publication and look forward to its influence on global debates on the relations between regional integration development and global governance From the foreword by Jos Antonio Ocampo Columbia University US The contributors expertly provide a comparative perspective on regional integration in different regions of the world while at the same time analysing the various facets of integration relating to trade FDI finance and

Central America, Panama, and the Dominican Republic Mr.Marco Pinon, Mr.Alejandro Lopez Mejia, M. (Mario) Garza, Mr.Fernando L Delgado, 2012-06-28 Central America Panama and the Dominican Republic coped well with the global financial crisis of 2008 09 The impact was generally less severe and shorter lived than in previous episodes the balance of payments adjustment was orderly and the stability of the financial system was not compromised This resilience can be attributed to a large extent to the strengthening of the fiscal frameworks monetary management and financial reforms conducted in the years preceding the global crisis Nevertheless the region faces considerable challenges for the period ahead including the need to raise medium term growth above historical levels and protect macroeconomic and financial stability This book argues that meeting these challenges will have to come from within in light of the anticipated modest demand growth from trade partners Raising growth in the region will depend on the adoption of structural reforms that generate substantial productivity gains Rebuilding fiscal space and securing debt sustainability will hinge on efforts to increase tax revenue and reorienting spending to social and investment priorities In the non officially dollarized economies it will also be essential to strengthen the monetary policy frameworks to keep inflation low and increase exchange rate flexibility and improve financial regulation and supervision

Financial Stability Issues: The Case of East Asia Mamiko Yokoi-Arai, 2002-07-08 Whatever can be said about the financial crises that have plagued East Asian countries since the early 1990s it must be averred that they teach us a great deal Many earlier assumptions about finance and investment have been called into question and the field is more open than it has been in many decades to legal and economic analysis and theory In particular issues of financial sector reform have come into sharp focus Here is a new proposal solidly grounded in current reality for a regional zone of law designed to supplement and benefit domestic reforms

under way in Japan and the three emerging economies of Indonesia South Korea and Thailand The author draws on a wide range of relevant material including exploration of international standards and best practices in banking and finance the experience of the U S and the U K in planning and implementing reform measures and the theoretical literature respecting financial crises and what causes them In this context the specific reforms applied in the four Asian countries under consideration are discussed in detail with lessons to be learned about crisis detection containment and prevention During the course of the analysis the author reveals fundamental policy areas where meaningful and effective reform can take place

Financial Stability Issues The Case of East Asia offers numerous practical applications at the same time as it strikes a rich vein of theory in the field Its fresh sensible approach will be greatly appreciated not only by academic theorists but by hardheaded business people policymakers and regulators as well

Financial Governance in East Asia Gordon De Brouwer, Yunjong Wang, 2004-08-02 The focus of international financial reform in recent years has largely been at the global level in terms of improving the international financial architecture and at the national level in terms of getting domestic economic and structural policies right But there is also a growing appetite for addressing some issues at a regional level This debate has focused on improving regional policy dialogue and surveillance processes as well as developing regional mechanisms to provide financial support to prevent and resolve financial crises In East Asia for example governments have sought deeper regional policy dialogue by the creation of ASEAN 3 forum and enhanced financial cooperation by setting up the Chiang Mai Initiative These developments raise many questions What is best practice regional policy dialogue How is a regional financial architecture complementary to the global architecture What sorts of institutions work well at a regional level Do regions need a regional monetary fund What is going on in East Asia and how is it different to other regions This volume brings together a range of policy practical and conceptual papers to explore these and other issues
