Regional International Organizations:

Regional International Organizations / Structures and Functions Paul A. Tharp, 1971-06-18 Regional Security
Rodrigo Tavares, 2009-12-16 Regional organizations are an inescapable feature of global politics Virtually all countries in the world are members of at least one regional or other intergovernmental organization The involvement of international organizations in the realm of regional peace and security and their cooperation in this domain with the United Nations has reached an unprecedented level Regional organizations have traditionally been formed around economic political or environmental objectives however over the last decades these organizations have gradually penetrated into the security sphere and developed their capacities in conflict prevention peacekeeping or post war reconstruction In Europe Africa Asia or the Americas regional and other intergovernmental organizations have been concurrently empowered by the UN and their own member states to maintain peace and security Despite suffering from important discrepancies in both their mandates and capacities regional organizations have become indisputable actors that play a role from the outbreak of a crisis to the reconstruction efforts in the aftermath of a conflict Presenting the most up to date critical and comparative analysis of the major regional security institutions assessing a wide range of regional organizations and providing an accessible and comprehensive guide to 11 key organizations this book is the first systematic study of the capacities of the most recognized intergovernmental organizations with a security mandate Regional Security is essential reading for all students of international organizations peace and security studies and global governance **Interactions between Regional and Universal Organizations** Laurence Boisson de Chazournes, 2016-11-01 Cooperation through international organizations is fundamental to the international legal order International organizations are nowadays ubiquitous and come in many different manifestations each allowing for different levels of international cooperation The profile of regional and universal organizations may vary greatly from one organization to another At the same time they do not live apart and this has led to the creation of a complex network of relationships These relationships have seldom been the object of scholarship and this book seeks to address that gap In general the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another demarcations of competence membership of other organizations and various forms of collaboration involving the conclusion of agreements between organizations Optimal coexistence cooperation and coherence all play a role in optimizing the relations between international organizations The volume concludes by analysing current challenges including those of legal identity responsibility and accountability as well as making proposals for reform such as through the development of a common law between organizations Regional International Organizations Tharp, 1971-06 Authoritarian Regionalism in the World of International Organizations
Anastassia V. Obydenkova, OBYDENKOVA & LIBMAN., The post Cold War world has witnessed the extensive development of regional international organizations world wide The relationship between their membership and democratization remains a

topic of intense scholarly debate This book opens up a new aspect of the debate by examining regional organization as set up by autocracies e g Iran Saudi Arabia Venezuela Russia and China referring to them as non democratic regional organizations How do these newly emerged organizations counteract and confront the democratization process in their own member states and beyond their borders How and why do the political regimes the economic development and the cultures of their member states impac the foundation and development of these organizations What influence do these organizations have on migration trade conflicts and democratization The book addresses these questions by developing a new theory of authoritarian regionalism Employing quantitative analysis of authoritarian regionalism world wide and its historical development since the 1950s as well as analysing case studies of post Soviet Eurasia the book argues that authoritarian regionalism is a new phenomenon in world politics and that modern non democratic organizations differ from their historical predecessors and that their influence has radically increased in terms of geographic scope and intensity in the last few years As such authoritarian regionalism is an important addition to studies of comparative regionalism and the international dimension of authoritarianism From the policy perspective non democratic regional organizations pose a challenge for Western actors in promoting democracy around the world

Graham Taylor,Paul Taylor,1995-01-01 An examination of the impact of international organisation at regional and global levels **Exit Threats in Regional International Organizations** Diana Panke,Lukas Grundseld,Pawel

Tverskoi,2025-09-30 Available open access digitally under CC BY NC ND licence This book offers a comprehensive analysis of why and when member states threaten to withdraw from regional international organizations RIOs A unique dataset covers over 120 exit threats across RIOs from all world regions The book explains variation as a result of limited specific and diffuse support such as the inability to exert influence or prevail under majority decision making as well as a lack of democratic socialization With nationalism and populism on the rise this timely study unpacks crucial pressure points in international institutions offering invaluable insights into how they can maintain stability in the face of internal contestations Crafting

Cooperation Amitav Acharya,Alastair Iain Johnston,2007-11-22 Regional institutions are an increasingly prominent feature of world politics Their characteristics and performance vary widely some are highly legalistic and bureaucratic while others are informal and flexible They also differ in terms of inclusiveness decision making rules and commitment to the non interference principle This is the first book to offer a conceptual framework for comparing the design and effectiveness of regional international institutions including the EU NATO ASEAN OAS AU and the Arab League The case studies by a group of leading scholars of regional institutions offer a rigorous historically informed analysis of the differences and similarities in institutions across Europe Latin America Asia Middle East and Africa The chapters provide a more theoretically and empirically diverse analysis of the design and efficacy of regional institutions than heretofore available **Regional**

Cooperation, and the Role of International Organizations and Regional Integration Maurice Schiff, 2016 Schiff and Winters examine regional cooperation among neighboring countries in the area of regional public goods. These public goods include water basins such as lakes, rivers, and underground water; infrastructure such as roads, railways, and dams; energy; and the environment. Their analysis focuses on developing countries and the potentially beneficial role that international organizations and regional integration may play in bringing the relevant countries to a cooperative equilibrium. A major problem in reaching a cooperative solution is likely to be the lack of trust. If neighboring countries do not trust each other because of past problems, they may fail to reach a cooperative solution as each tries to maximize its gain from the regional public good. These strategies typically do not account for spillover effects and ultimately lead to losses for all parties. Other constraints on reaching a cooperative solution are its complexity and the financial requirements. Two types of institutions may help resolve some or all of these problems. International organizations can help with trust, expertise, and financing. The United Nations and the World Bank have been involved in a number of such projects in Africa, Asia, and elsewhere and have been successful in helping parties reach cooperative solutions. Regional integration agreements, though not necessary for regional cooperation, may also be helpful by embedding the negotiations on regional cooperation in a broader institutional framework. The authors examine these issues with the support of both analysis and a number of case studies. This paper is a product of the Trade Development Research Group, is part of a larger effort in the group to examine the role and effects of regional integration. Authoritarian Regionalism in the World of International Organizations Anastassia V. Obydenkova, Alexander Libman, 2019-05-02 The interconnection between international organizations (IOs), membership, and democratization has become a topic of intense debate. However, the main focus of the literature so far has been on IOs created by democratic states and comprised mostly of democracies, for example, the European Union. In contrast to existing studies, this book focuses on another group of regional IOs referred to as non-democratic IOs, which are organizations founded by autocracies. How do these newly emerged organizations interrelate and interact with the outside world? How do they counteract and confront the danger of democratization in their own member states and neighboring states? This book aims to address these questions by developing a new theory of authoritarian regionalism and by combining both quantitative and qualitative analysis to test it. The quantitative analysis uses a large dataset of all regional organizations worldwide for the post-World War II period with the aim of defining historical trends in development and the modification of regionalism over the last seven decades (1945–2015). Qualitative analysis refines and develops the argument by looking at the case of post-Soviet Eurasia. The book uncovers a new type of regionalism, authoritarian regionalism, and traces its historical roots as well as its implications for modern politics. The book is the first attempt to systematically investigate the functioning and the impact of authoritarian regionalism as a new phenomenon as well as its implications for democratization worldwide. The book contributes to the theory of regionalism, international

with a bipolar institutional structure where organs of States are usually juxtaposed with the Secretariat On these premises in Non Governmental Interests in Regional Organizations The Role of Parliamentary Socio Economic and Territorial Institutions Elisa Tino aims at analysing the unexplored phenomenon of institutional multipolarism of regional organizations namely the trend to establish institutions representing non governmental interests Particularly illustrating their diffusion in various geographic areas explaining rationales underlying their establishment and investigating their institutional aspects Elisa Tino pinpoints the contribution of these institutions to the development of regional organizations both according to the functionalist approach and the constitutionalist one Thus she aims at providing food for thought in the study of international organizations

International Organizations and the Management of Regime Complexity Diana Panke, Sören Stapel, 2025-05-15 Regime complexity which is characterized by overlap between international organizations IOs concerning both policy competencies and member states has been increasing over time It is a defining feature of today's international system As the regime complexity literature points out overlaps between IOs carry potential negative effects such as duplicated efforts or incompatible norms This book argues that IOs can actively manage regime complexity and potentially avoid negative side effects or even create positive benefits Yet overlapping IOs differ in how they react To explain under what conditions IOs disregard overlaps or manage them by resorting to confrontation or collaboration this book addresses the following research questions Why do organizations differ in their responses to overlaps Why do some opt for disregard while others choose confrontation or engage in collaboration These questions are answered by studying a subset of IOs namely regional international organizations RIOs which recruit their member states on the basis of geographic criteria It introduces a novel theoretical selection model on three junctures saliency ideological fit and contextual uncertainties This influences whether overlapping RIOs disregard one another and do not actively manage regional regime complexity low saliency when they choose confrontation high saliency but low ideological fit and when they opt for one of two ways to engage in collaboration namely coordination high saliency high ideological fit limited contextual uncertainty or cooperation high saliency high ideological fit high contextual uncertainty The corresponding hypotheses are comprehensively analyzed in qualitative case studies from Africa the Americas Asia and Europe Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks It brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford

Regionalism in International Law Ján Klučka, 2017-12-01 International Law

Aspects of Regionalism evaluates regionalism in its various relationships and forms with respect to international law as well as the importance and duties of international law in respect to the establishment and functioning of various forms of regional groups. A great deal of attention has been paid to regionalism from the global political economic security aspects but a complex evaluation of the impact it has had on international law and vice versa is still lacking. The main purpose of this volume is to eliminate this gap and present the latest state of knowledge on the topic. This text will be of interest both to students at an advanced level, academics and reflective practitioners. It addresses the topics with regard to international law and regionalism and will be of interest to academics dealing with legal aspects of current regionalism and for the specialized courses in the faculties of law as well as anyone studying diplomacy and international studies, international relations, regional integration, law, EU law, international law and international relations.

International Organizations Amid Global Crises

Diana Panke, Gordon M. Friedrichs, 2024-10-23. International Organizations (IOs) have been at the forefront of responding to crises in the 21st century and yet there is little comparative research on how and how effectively they have done this. This book fills this gap by exploring what roles IOs take in response to global crises and to what effect. Bringing together a range of international contributors, the book examines a vast array of international and regional organizations including the International Organization for Migration, World Health Organization, African Union and European Union. Aiming to answer key questions about IO behaviour, the book investigates these IOs' responses to pressing issues including the global COVID-19 pandemic, the liberal order and security and the climate crisis.
